Report No. 478 (56/2.2/2)

Unorganised Manufacturing Sector in India:

2000 - 2001

Characteristics of Enterprises

NSS 56th round
(July 2000 – June 2001)

National Sample Survey Organisation
Ministry of Statistics and Programme Implementation
Government of India

September 2002

Preface

National Sample Survey Organisation (NSSO) conducted an integrated survey of households and unorganised manufacturing enterprises during July 2000 to June 2001. The subjects covered were unorganised manufacturing enterprises and consumer expenditure, employment and unemployment. The enterprise / establishment level data obtained from the Economic Census 1998 were used as the frame for sampling of villages / urban blocks, to the extent possible, for conducting the survey.

The present report is the second in a series of reports based on the survey on unorganised manufacturing enterprises conducted during 2000-2001. It contains information on some characteristics like ownership type of enterprise, their location, maintenance of written accounts, registration status, months of operation, problems faced in running the enterprise, etc. of the unorganised manufacturing enterprises at the all India level for different industry groups and at the level of States / UT's for all the industry groups together.

Field Operations Division (FOD) of the organisation conducted the fieldwork of the survey and the data were processed and tabulated by the Data Processing Division (DPD) of the NSSO. Coordination and Publication Division (CPD) coordinated the overall survey activity. The Survey Design and Research Division (SDRD) of the NSSO developed the survey methodology and prepared the report. I am grateful to the members of the Governing Council of NSSO as well as members of the working group, editor of the report and officers of the Ministry of Statistics and Programme Implementation for their suggestions to improve the quality of the report.

I hope the report will be useful to the planners and policy makers. Comments and suggestions for improvement will be most welcome.

Highlights

	rural India	urban India	all-India
1. Number of first stage units surveyed	5586	8942	14528
2. Number of enterprises surveyed (in thousands)			
(i) OAME	47.5	54.3	101.8
(ii) NDME	8.1	24.9	33.0
(iii) DME	5.1	12.6	17.7
(iv) all	60.7	91.8	152.5
3. Estimated number of enterprises (in lakhs) in the country			
(i) OAME	110.6	36.1	146.7
(ii) NDME	6.3	10.8	17.1
(iii) DME	2.4	4.0	6.4
(iv) all	119.3	50.9	170.2
4. Percentage distribution of enterprises			
(i) OAME	92.6	70.9	86.1
(ii) NDME	5.3	21.2	10.1
(iii) DME	2.1	7.9	3.8
(iv) all	100	100	100
5. Estimated number of workers (in lakhs)			
(i) OAME	191.5	59.1	250.6
(ii) NDME	19.3	36.3	55.6
(iii) DME	29.1	35.5	64.6
(iv) all	239.9	130.9	370.8
6. Percentage distribution of enterprises by type of ownership			
(i) Proprietary (male)	73.1	70.5	72.3
(ii) Proprietary (female)	26.0	26.4	26.1
(iii) Partnership (same household)	0.5	1.8	0.9
(iv) Partnership (different households)	0.4	1.2	0.6
(v) Others	0.0	0.1	0.1
(vi) Total	100.0	100.0	100.0
7. Percentage distribution of enterprises by nature of operation			
(i) Perennial	91.0	96.8	92.7
(ii) Seasonal	7.8	2.4	6.2
(iii) Casual	1.2	0.8	1.1
(iv) all	100.0	100.0	100.0
8. Percentage distribution of enterprises by location			
(i) Within household premises	76.1	55.3	70.0
(ii) Outside household premises but with fixed location	18.8	41.1	25.3
(iii) Outside household premises but without fixed location	5.1	3.6	4.7
(iv) Total	100.0	100.0	100.0
9. Percentage of enterprises furnishing information from books of accounts			
(i) OAME	0.5	0.8	0.6
(ii) NDME	2.8	5.8	4.7
(iii) DME	11.1	18.2	15.5
(iv) all	0.9	3.3	1.6
10. Percentage of enterprises registered under/with any Act / Authority			
(i) OAME	3.3	10.0	5.0
(ii) NDME	27.0	39.8	35.1
(iii) DME	46.1	58.4	54.0
(iv) all	5.5	20.1	9.9

OAME: own account manufacturing enterprises, i.e., enterprises with no hired worker on a fairly regular basis

NDME: non directory manufacturing establishments, i.e., enterprises with at least 1 hired worker and less than 6 total workers

DME: directory manufacturing establishments, i.e., enterprises with at least 1 hired worker and 6 or more total workers

Highlights

	rural India	urban India	all-India
11. Percentage of enterprises operating for more than 6 months during the last 365 days			
(i) OAME	88.9	93.0	90.0
(ii) NDME	84.6	91.3	88.9
(iii) DME	58.1	91.4	78.7
(iv) all	79.0	92.5	89.5
12. Percentage of enterprises undertaking more than one economic activity			
(i) OAME	54.0	22.0	46.1
(ii) Establishments (NDME & DME)	49.1	16.1	28.6

(ii) NDME	GUJ	GUJ	GUJ
(iii) DME	PUN	GUJ	ASM
(iv) all	GUJ	GUJ	GUJ
19. States* with the highest percentage of enterprises registered under/with any Act/Authority			
(i) OAME	MAH	GUJ	MAH
(ii) NDME	J&K	GUJ	GUJ
(iii) DME	JRK	J&K	J&K
(iv) all	KER	GUJ	GUJ
20. States* with the highest percentage of enterprises working on contract			
(i) OAME	J&K	WB	WB
(ii) NDME	WB	WB	WB
(iii) DME	TN	WB	TN
(iv) all	J&K	WB	WB

*only major states considered

Abbreviations used for State names: Assam (ASM), Gujarat (GUJ), Jammu & Kashmir (J&K), Jharkhand (JRK), Kerala (KER), Maharashtra (MAH), Orissa (ORS), Punjab (PUN), Tamil Nadu (TN) and West Bengal (WB).

Section One

Introduction, Concepts and Definitions

1.1 **Introduction:** The unorganised sector holds the key to understanding the economic situation in developing countries such as India. The importance of this sector and the need for statistical information about it had been realised by the Indian planners and policy makers in the 1950s. The National Sample Survey Organisation (NSSO) has been conducting periodic surveys on household-based non-agricultural activities since its inception. The household approach of identifying the units excluded the units not owned by households, like the cooperative societies, trusts, incorporated units etc. A review of the surveys conducted by NSSO indicated that a better sampling frame was necessary to generate more useful statistics on the unorganised sector. The need for basic information on enterprises together with the need (that) for identifying areas of concentration of enterprises for developing more efficient sampling designs culminated in conducting the periodic Economic Censuses which provided the frame for the follow-up sample surveys on non-agricultural enterprises.

1.1.1 The first Economic Census conducted in 1977 was limited to non-agricultural enterprises employing at least one hired worker on a fairly regular basis. The enterprises employing at least one hired worker are called 'establishments'. Following this census, a survey of small establishments and enterprises not employing any hired worker on a fairly regular basis (these units are called 'Own Account Enterprises' (OAEs)) engaged in manufacturing and repairing activities was taken up during NSS 33rd round (1978-79).

1.1.2 The second Economic Census was undertaken in 1980 along with the house-listing operations of the 1981 population census. The scope and coverage of the second Economic Census was enlarged to include the own account enterprises (OAEs) engaged in activities other than crop production and plantation. The establishments were divided into two categories as (i) Directory Establishments (DEs) and (ii) Non-Directory Establishments (NDEs), the difference being that the former employed a total of six or more workers, while the latter employed a total of five or less workers. Thus, in the second Economic Census, three types of enterprises were formed, viz., (i) OAEs, (ii) NDEs and (iii) DEs. As a follow-up to this economic census, OAEs and NDEs engaged in manufacturing and repairing activities were surveyed in the 40th (July 1984-June 1985) and 45th (July 1989-June 1990) rounds of NSS respectively. The trading enterprises (OAEs and NDEs) were covered in 41st (July 1985-June 1986) and 46th rounds (July 1990-June 1991). The Directory manufacturing and trading Establishments (DEs) were, however, surveyed by field staff of NSSO under the technical guidance of CSO.

1.1.3 The third Economic Census was conducted in 1990 along with the house-listing operations of the 1991 population census. As a follow-up to the third Economic Census, the first integrated survey on unorganised manufacture covering own account manufacturing and repairing enterprises (OAMEs), Non-Directory manufacturing and repairing establishments (NDMEs) and Directory manufacturing and repairing establishments (DMEs) was undertaken during the 51st round (July 1994-June 1995) by NSSO. However, during 53rd round (January-December 1997)

only Own account (OAE) and Non-Directory trading enterprises (NDE) were covered by NSSO whereas the Directory Trading Enterprises (DTE), were surveyed by field staff of NSSO under the technical guidance of CSO. Besides, CSO also conducted follow-up surveys of economic census covering activities other than manufacturing, repairing and trade through the field staff of NSSO.

1.5 A fourth Economic Census was conducted by CSO during 1998. As a follow-up survey of this Economic Census, survey on unorganised manufacturing was conducted during 56th round (July 2000-June 2001). In this survey, information from 1998 Economic Census was used for stratification and the list of villages and blocks was used as frame for selection of first stage units.

1.2 The Survey in brief: National Sample Survey Organisation (NSSO) conducted an integrated survey of enterprises and households in its 56th round during July 2000 to June 2001. The main focus of the survey was manufacturing enterprises in the unorganised sector. In addition, the survey also covered household consumer expenditure including some key characteristics on employment-unemployment. Information on characteristics of the enterprises, fixed assets, employment, operating expenses and receipts, value added, etc. was collected from the enterprises surveyed. This report presents results based on the information collected from the manufacturing enterprises in the unorganised sector.

1.2.1 Unorganised Manufacturing Sector: The 56th round covered broadly all unorganised manufacturing enterprises under the two-digit codes 15 to 37 (Tabulation Category 'D' of NIC 1998) and enterprises under cotton ginning, cleaning and baling (NIC 98 code 01405). To give further details, the survey covered:

- (a) Manufacturing enterprises, which are not registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948.
- (b) Manufacturing enterprises registered under Section 85 of Factories Act, 1948.
- (c) Enterprises engaged in cotton ginning, cleaning and baling that are not covered under Annual Survey of Industries (ASI).
- (d) Enterprises manufacturing bidi and cigar that are not covered under ASI (irrespective of registration under Bidi and Cigar Workers (condition of employment) Act, 1966).

The manufacturing enterprises, registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948, are covered in the Annual Survey of Industries undertaken by CSO.

1.2.2 Objective of the Survey: The main aim of the survey on unorganised sector manufacturing enterprises was to estimate the total number of enterprises, workers, gross value added per worker and other related characteristics of enterprises.

1.2.3 Coverage and sample size : The survey covered the whole of the Indian Union except (i) Leh and Kargil districts of Jammu & Kashmir, (ii) villages situated beyond 5 kms. of bus route in the state of Nagaland and (iii) inaccessible villages of Andaman and Nicobar Islands and (iv) some first stage units (numbering less than 0.1% of the total) where Economic Census 1998 (EC 98, for short) could not be conducted. Thus, the corresponding State/UT level estimates and the

All-India results presented in this report are based on the areas under survey coverage. A total of 14788 first stage units (5696 villages and 9092 urban blocks) were selected for this survey. The number of sample villages and blocks allotted for survey and actually surveyed in different States is given in Statement 1 (see Section Two).

1.2.4 Sample Design: A stratified sampling design was adopted for selection of the sample first-stage units (FSUs). The FSUs were villages (Panchayat wards in Kerala) in rural areas and UFS blocks in urban areas. List of villages / urban blocks along with enterprise level information of EC 98 was used as the sampling frame except in the states of Bihar and Orissa and 66 towns of Karnataka. The Ultimate Stage Units (USUs) were enterprises for the survey on unorganised sector manufacturing enterprises and households for consumer expenditure-cum-employment-unemployment survey. USUs were selected by the method of circular systematic sampling from the corresponding frame in the FSU. Large FSUs were subdivided into smaller areas called hamlet groups (rural) / sub-blocks (urban). Three of these smaller parts were selected; one having maximum number of enterprises was selected with certainty and two others were selected by circular systematic sampling. The first part was called segment 1 and the other two as segment 2. The USUs were selected independently from each of these segments. A detailed note on sample design and estimation procedure followed in the 56th round survey is given in Section Two.

1.2.5 Method of data collection: A team of two or three investigators along with one supervisor (Assistant Superintendent) was deployed for fieldwork in each FSU. The Investigators visited every house / structure in the sample FSU (or selected parts in case of bigger FSUs) and listed all the households and / or enterprises in each house / structure. The list of households and enterprises provided separate frame for selection of households and enterprises. In every FSU, a maximum of 4 households were selected for consumer expenditure-cum-employment-unemployment survey and 16 enterprises were selected for the enterprise survey. Interview method was used for data collection from the sampled households and enterprises. Separate schedules were used for consumer expenditure and for the unorganised sector manufacturing enterprise survey for collecting data.

1.2.6 Sub-round: The entire survey period (1st July 2000 to 30th June 2001) was divided into four sub-rounds of three months' duration each (Sub-round 1: July-September 2000, Sub-round 2: October-December 2000, Sub-round 3: January-March 2001, Sub-round 4: April-June 2001) and equal number of sample villages and blocks were allocated to each sub-round. Each FSU was surveyed during the sub-round period to which it was allocated. Within a particular sub-round, the fieldwork was spread out uniformly over different months to the extent possible.

1.2.7 Schedules canvassed: A listing schedule (Schedule 0.0) was used for listing households and the manufacturing and repairing enterprises mainly for preparing the frame for drawing the required number of sample households and enterprises for collection of detailed information in each selected village/block. Information collected through listing schedule was used for calculating multipliers for estimation purpose. The enterprise schedule (Schedule 2.2) was canvassed in each of the selected sample enterprises for collecting the basic information, such as employment, fixed assets, working capital, borrowings, input, output and value added of the

sampled enterprise. Schedule 1.0 was canvassed to collect detailed information on consumer expenditure and employment-unemployment.

1.2.8 Release of results: The present report is the second in the series of reports to be released on unorganised sector manufacturing enterprises based on the data collected through Schedule 2.2 in NSS 56th round. It contains estimates of some characteristics of the enterprises engaged in manufacturing and repairing activities like type of ownership of enterprise, its location, maintenance of written accounts, registration status, number of months of operation, problems faced, etc. Major findings based on the survey data are discussed in Section Two. The detailed statistical tables are given in Appendix A. A note on sample design and estimation procedure is given in Appendix B.

1.2.9 Reference Period: *Last month* has been used as the reference period to collect most of the data. Various receipts and expenses as well as employment, emoluments, rent, interest and value added for the enterprises was collected for the last month only. *Last month refers to the last 30 days (preceding the date of interview) for perennial and casual enterprises irrespective of the number of days of operation. For seasonal enterprises also, last month referred to the last 30 days (preceding the date of interview), if they had worked continuously for the last 30 days or more (including scheduled holidays) in the current season. Only for seasonal enterprises, which had worked for less than 30 days in the current season, last month referred to an average month in the last working season. If some enterprise was unable to give information for the last 30 days and was able to give information for the latest calendar month from their books, figures for the latest calendar month were taken.* For some of the items like value of fixed assets, amount of loan outstanding, etc., the reference period was 'as on the date of survey'. For other items like net additions to fixed assets, number of months operated, number of other economic activities taken up etc., the reference period was the 'last 365 days preceding the date of interview'.

1.3. Concepts and definitions :

1.3.1 Enterprise: An enterprise is an undertaking engaged in the production and / or distribution of some goods and / or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly on a partnership basis, or by an institutional body.

1.3.2 Own-account enterprise: An enterprise, which is run without any hired worker employed on a fairly regular basis, is termed an own account enterprise. If such an enterprise is engaged in manufacturing and/or repairing activities, it is termed as an Own Account Manufacturing Enterprise (OAME).

1.3.3 Establishment : An enterprise which is **employing at least one hired worker** on a fairly regular basis is termed as an establishment. Paid or unpaid apprentices, paid household member/servant/resident worker in an enterprise are considered hired workers. Establishments have further been categorised into two parts: non-directory and directory.

1.3.4 Non-directory establishment: An establishment employing less than six workers (household and hired workers taken together) is termed non-directory establishment. If such an

establishment is engaged in manufacturing activities, it is termed Non-Directory Manufacturing Establishment (NDME).

1.3.5 Directory establishment: A directory establishment is an establishment which has employed six or more workers (household and hired workers taken together). If such an establishment is engaged in manufacturing activities, it is termed Directory Manufacturing Establishment (DME).

1.3.6 Worker: A worker is defined as one who participates either full time or part time in the activity of the enterprise. The worker may serve the enterprise in any capacity - primary or supervisory. He/she may or may not receive wages / salaries in return to his / her work incidental to or connected with the entrepreneurial activity. A worker need not mean that the same person is working continuously; it only refers to a position. Persons working for less than or equal to half of the normal working hours of the enterprise on a fairly regular basis are considered as part time workers. Full time workers are those who work for more than half of the period of normal working hours of the enterprise on a fairly regular basis. Two part-time workers in an enterprise are counted as 2 and not 1.

1.3.7 Working owner: The owner who personally works in the proprietary or partnership enterprises on a fairly regular basis is called working owner. In fact, in most of the own-account enterprises the owner himself/ herself manages all activities of the enterprise without the help of anyone (on a fairly regular basis). In the case of partnership enterprises, if only one partner or some of the partners or all the partners work in the enterprise on a fairly regular basis then they are considered as 'working owners'.

1.3.8 Hired worker: A hired worker is a person employed directly or through any agency on payment of regular wage / salary in cash or kind. Apprentices, paid or unpaid, are to be treated as hired workers. Paid household workers, servants and resident workers of the enterprise are also to be considered as hired workers.

1.3.9 Other worker / helper: This includes all persons belonging to the household of the proprietor or households of the partners who are working in or for the enterprise without regular salary or wages. Persons working as exchange labourer in the enterprise without salary or wages will also be covered in this category. All unpaid household workers / helpers who are associated with the activities of the enterprise during the reference month are considered in this category.

1.3.10 Fairly regular basis: The term "fairly regular basis" means the major part of the time when operation(s) of an enterprise are carried out during a reference period.

1.3.11 Mixed activity: There are enterprises which carry out a number of activities simultaneously. For example, a grocery shop owner may also sell oil from his own *oil-mill*, a doctor may have a medical shop attached to his dispensary, a restaurant may run an STD booth in its premises, etc. Each such activity was treated as a separate enterprise if information for them was separately available. If the accounts were not separable then the data pertained to the enterprise as a whole and the enterprise was classified as having mixed activities and the activities of such enterprises a mixture of NIC's. The appropriate NIC in such cases was

determined on the basis of **major** activity. Major activity refers to the activity which yielded maximum income/turnover/employment. The above criteria was applied in the given order, i.e., income first, then turnover and then employment, to determine the major activity. The activities may be mixed at any level of NIC, but for the present survey an enterprise was considered to have mixed activities if its activities were different at 2-digit level of NIC-1998.

1.3.12 Multiple activity: Since many of the entrepreneurs belonging to the unorganised sector operate at small or marginal levels, the phenomenon of carrying out more than one activity simultaneously or at different points of time is quite prevalent. If the activities were carried out at one point of time at the same location and the information was not separately available, then it was taken as “mixed activity”. Total number of economic activities carried out by the entrepreneur during the last 365 days is the total number of multiple activities. Some examples of multiple activities are: i) a person carrying out agricultural activity at sowing / harvesting season and running a shop at the same time or at other times, ii) a lady working as regular wage / salary earner and also running a shop in the evenings, etc. However, a manufacturing enterprise manufacturing woollen garments before winter and cotton clothes before summer was not considered as carrying out multiple activities. It may be noted that multiple activity relates to the various economic activities carried out by the entrepreneur whereas mixed activity is carried out by an enterprise.

1.3.13 Fixed assets: Fixed assets are assets held for the purpose of producing or providing goods or services and they are not held for resale in the normal course of entrepreneurial activities. These cover all goods, new or used, that have a normal economic life of more than one year from the date of purchase.

1.3.14 Land and Building: **Land** means the land on which the enterprise is accommodated together with the surrounding area, which is used for the enterprise. This also includes improvement to land. However, if only a portion of the land belonging to the residence of a household is utilised for the enterprise, only that portion of the land is considered as capital assets for the enterprise. Land owned with permanent heritable possession with or without right to transfer the title comes under this category. Land held on long-term lease, say, 30 years or more, is also treated as land owned. **Building** is the structure, where activities of the enterprise are undertaken. This also includes all other structures like shed, house, portions of a house or other structure, building under construction and other conveniences in which the activities of the enterprise are carried out. This also includes other constructions such as passage, wall, water tank, sewerage, tube-well, etc.

1.3.15 Plant and machinery: Plant is generally the name given to an assembly of machinery / equipment / devices installed for the operation of entrepreneurial activities. Machinery means an implement or mechanical device used in the entrepreneurial activities. These are assets of durable nature and can be easily identified.

1.3.16 Transport equipment: All vehicles, power-driven or man / animal-driven, used for transporting persons, goods and materials by the enterprise in connection with its activity are covered in this category. Animals, if used for drawing vehicles or carrying loads, will be treated as part of transport equipment.

1.3.17 Tools and other fixed assets: Tools refer to small loose implements, generally held in hand for operation and having normal life of more than one year. Other fixed assets refer to other durable equipment which are used for the entrepreneurial activity either directly or indirectly. These include furniture, fixtures, laboratory equipment, office equipment etc. Livestock used in oil-mill is also covered under this category.

1.3.18 Net additions to the fixed assets during the last 365 days: Net addition to fixed assets was obtained by subtracting depletion of assets from the additions made during the last 365 days. Addition to the fixed assets could be made through purchase (new or used) or through own construction. Improvements on land, new construction of building, shed, structure, as well as assets produced on own account during the last 365 days were considered as additions to the fixed assets. Depletion of assets was obtained by considering the assets sold and discarded during the last 365 days. The value of assets disposed of in any manner other than sale, were treated as value of assets discarded. Besides obsolescence (gone out of use) of an asset, this included loss due to theft, damage, accident etc.

1.3.19 Loan: Any borrowing in cash or kind to be repaid in cash or kind is termed as loan. Loans taken for the purpose of utilising the same in the entrepreneurial activities of an enterprise were considered even if such loans were used for other purposes. On the other hand, loans taken for other purposes but ultimately used in the enterprise were excluded.

1.3.20 Operating expenses: The total of values of raw materials, electricity, fuel, lubricants and auxiliary materials consumed; cost of maintenance, services purchased and other expenses incurred during the reference period by an enterprise was considered as 'operating expenses'.

1.3.21 Receipts : The sale value of products and by-products manufactured by an enterprise together with the value of services rendered to other concerns and other receipts incidental to entrepreneurial activities are considered as 'total receipts'.

1.3.22 Gross value added: Gross value added represents that part of production which is the actual contribution of an enterprise to the economy. Gross value added is calculated by deducting 'total operating expenses' from the total value of 'total receipts' during the reference period.

1.3.23 Perennial enterprises: Enterprises, which usually operate more or less regularly throughout the year, are called perennial enterprises.

1.3.24 Seasonal enterprises: Seasonal enterprises are those which are usually run in a particular season or in fixed months of a year.

1.3.25 Casual enterprises: Casual enterprises are those which operate occasionally (may be disjoint periods of time throughout the year) but total number of days operated in the last 365 days is 30 days or more.

Section Two

Summary of Findings

2.0 Introduction: The first report based on NSS 56th round data on unorganised manufacturing, viz., “Unorganised manufacturing sector in India, 2000-2001: Key Results” contains estimates of some key parameters like number of enterprises, workers, gross value added, fixed assets and outstanding loans. The present report, the second in the series, contains estimates of some other characteristics of the enterprises engaged in manufacturing and repairing activities like type of enterprise (ownership), their location, maintenance of written accounts, registration status, number of months of operation, problems faced, etc. A summary of these results is presented in this section. Detailed tables are given in Appendix for rural and urban areas and for both the areas combined at the all India and State / UT levels and by different types of industries. These tables give information relating to Own Account Manufacturing Enterprises (OAMEs), Non-Directory Manufacturing Establishments (NDMEs), Directory Manufacturing Establishments (DMEs) as well as on all types of enterprises taken together. In some cases, the figures for totals and proportions presented in detailed tables may vary marginally due to rounding off.

2.0.1 As discussed in Section One, the 56th round of NSS broadly covered all unorganised manufacturing enterprises under the two-digit codes 15 to 37 (Tabulation Category ‘D’ of NIC 1998 or NIC 98) and enterprises engaged in cotton ginning, cleaning and baling (NIC 98 code 01405). More precisely, the survey covered:

- (a) Manufacturing enterprises, not registered under Sections 2m (i) and 2m (ii) of the Factories Act, 1948, and enterprises which are engaged in cotton ginning, cleaning and baling but not covered under Annual Survey of Industries (ASI).
- (b) Manufacturing enterprises registered under Section 85 of Factories Act, 1948.
- (c) Enterprises manufacturing bidi and cigar that are not covered under ASI (irrespective of registration under Bidi and Cigar Workers (condition of employment) Act, 1966).

2.0.2. The manufacturing enterprises registered under Sections 2m (i) and 2m (ii) of the Factories Act, 1948, commonly called the registered manufacturing sector are covered in the Annual Survey of Industries (ASI). Thus, the ASI and this survey together cover the entire gamut of manufacturing enterprises in the country.

2.0.3 The coverage of 56th round survey, however, falls short of NSS 51st round coverage to some extent. The following activities were covered in 51st round but not in the 56th round:

- i) Repair and maintenance of computers and computer based systems (NIC 1987 or NIC 87 code 3941), ii) Repair of office, computing and accounting machinery other than computers and computer based systems (NIC 87 code 3942), iii) Repair of heavy motor vehicles (NIC 87 code 398), iv) Repair of household electrical appliances (NIC 87 code 971), v) Repair of TV, VCR, radio, transistor, tape-recorder and other electronic appliances (NIC 87 code 972), vi) Repair of watches, clocks and jewellery (NIC 87 code 973), vii) Repair of motor vehicles and motor cycles except trucks, lorry and other heavy vehicles (NIC 87 code 974), viii) Repair of bicycles and cycle rickshaws (NIC 87 code 975) and ix) Repair enterprises not elsewhere classified (NIC 87 code 979).

2.0.4 The repair related services of NIC 87 mentioned above have been classified in NIC 98 under various non-manufacturing industry groups, viz, 72501, 72502, 50200, 52602, 52603, 52604, 50404, 52605 and 52609. However, cotton ginning, cleaning and baling activity (NIC 98 code 01405) was covered in the 56th round to keep parity with the coverage of the ASI. Many of the activities covered under NIC 98 divisions 55 to 93 have been covered in NSS 57th round (July 2001 – June 2002) survey.

2.0.5 **Number of first stage units surveyed:** The number of villages and Urban Frame Survey Blocks (i.e. the first stage units or FSUs) allotted and actually surveyed in different State / UTs is given in Statement 1.

Statement 1: Number of first stage units (villages/UFS blocks) allotted and surveyed by State / UT

2.0.6 Statement 2 below shows the different manufacturing activities covered in the 56th round at 2-digit level of NIC 98.

Statement 2: Activities covered in the survey and their NIC 1998 divisions

NIC 98 codes	Activity
01405	Cotton ginning, cleaning and baling
15	Manufacture of food products and beverages
16	Manufacture of tobacco products
17	Manufacture of textiles
18	Manufacture of wearing apparel; dressing and dyeing of fur
19	Tanning and dressing of leather; manufacture of luggage, handbags, saddler, harness and footwear
20	Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials
21	Manufacture of paper and paper products
22	Publishing, printing and reproduction of recorded media
23	Manufacture of coke, refined petroleum products and nuclear fuel
24	Manufacture of chemicals and chemical products
25	Manufacture of rubber and plastics products
26	Manufacture of other non-metallic mineral products
27	Manufacture of basic metals
28	Manufacture of fabricated metal products, except machinery and equipment
29	Manufacture of machinery and equipment n.e.c.*
30	Manufacture of office, accounting and computing machinery
31	Manufacture of electrical machinery and apparatus n.e.c.*
32	Manufacture of radio, television and communication equipment and apparatus
33	Manufacture of medical, precision and optical instruments, watches and clocks
34	Manufacture of motor vehicles, trailers and semi-trailers
35	Manufacture of other transport equipment
36	Manufacture of furniture; manufacturing n.e.c.*
37	Recycling

*n.e.c. – not elsewhere classified

2.0.7 The term ‘major States’, based on the estimated number of enterprises, is used at some places, while discussing the results and in charts. These ‘major States’ along with their names in abbreviated form (in brackets) are: Andhra Pradesh (AP), Assam (ASM), Bihar (BHR), Gujarat (GUJ), Haryana (HAR), Jammu and Kashmir (J&K), Karnataka (KTK), Kerala (KER), Madhya Pradesh (MP), Maharashtra (MAH), Orissa (ORS), Punjab (PUN), Rajasthan (RAJ), Tamil Nadu (TN), Uttar Pradesh (UP), West Bengal (WB), Jharkhand (JRK), Chhattisgarh (CTG) and Uttaranchal (UTC). “ALL” is used to denote all-India in some places. The term enterprise is used in general to represent OAMEs, NDMEs and DMEs together. A “-” has been used in the statements and tables if no enterprise was surveyed in that particular level of disaggregation. On the other hand, the figure “0” has appeared in some levels of disaggregation where the estimated figure is very low and has become 0 due to rounding off.

2.1 A total number of 5696 villages and 9092 NSS Urban Frame Survey blocks (i.e., the first stage units) were allotted for survey at the all-India level and out of which 5586 villages and 8942 blocks were actually surveyed. Number of villages and UFS Blocks allotted and actually

surveyed in different States / UTs has been given Statement 1 in Section Two. It can be seen that a bulk of the FSUs, about 40% of the total, were surveyed from the 5 States of Uttar Pradesh, Maharashtra, Tamil Nadu, Andhra Pradesh and West Bengal.

2.2 Number of enterprises surveyed: Before looking into the various characteristics of the enterprises covered in the survey it is essential to know the extent of coverage of the enterprises in the 56th round. Statement 3 gives information on the number of enterprises surveyed, activity-wise and by type of enterprises (OAMEs, NDMEs, DMEs) for rural, urban and combined sectors of the country. A total of 152494 enterprises were surveyed all over India. About 40% of these enterprises were in rural India and the remaining 60% in urban India. In the rural areas, while 78.28% of the surveyed enterprises were OAMEs, 13.33% were NDMEs and the remaining (8.39%) were DMEs. The corresponding proportions in the urban sector were 59.16%, 27.14% and 13.70%, respectively. However, these percentage shares of different types of enterprises are based on unweighted sample counts and should not be taken very seriously.

Statement 3: Number of enterprises surveyed in different industries, by sector and type of enterprise

2.2.1 Similarly, Statement 4 gives information on the number of enterprises surveyed in each State / UT and by type of enterprise (OAMEs, NDMEs, DMEs) for rural, urban and combined sectors of the country. The largest number of sample enterprises were surveyed from Uttar Pradesh followed by Tamil Nadu, Maharashtra, Andhra Pradesh and West Bengal.

2.2.2 It is to be noted that though estimates are provided for different NIC 98 divisions (of manufacturing and repairing), separately by enterprise types and States/UTs the estimates at disaggregated level need to be used with caution keeping in view the number of sample enterprises surveyed at that particular level of disaggregation.

2.3 Estimated number of enterprises: The number of manufacturing enterprises in the country as estimated from this survey, for each activity and enterprise type is given in Statement 5. Similarly, Statement 6 gives the estimated number of manufacturing enterprises in each State/UT. These estimates have been presented and discussed in the first report on the subject, viz., NSS Report No. 477, and hence, are not discussed here again.

Statement 5: Estimated number of enterprises in different industries, separately by sector and type of enterprise

2.3.1 Shares of States/UTs in estimated total number of enterprises: Statement 7 gives the share of enterprises in States/UTs in estimated total number of enterprises for each enterprise type separately for rural, urban and combined sectors in the country. Among the major states, those with higher shares (8% or more) of OAME units are West Bengal followed by Uttar Pradesh, Andhra Pradesh and Tamil Nadu. Shares of these four states account for almost half of the total OAMEs at all-India level. In the case of NDME broadly similar share is observed in Uttar Pradesh, West Bengal, Tamil Nadu and Maharashtra. These states also have relatively

higher share (11 % or more) of DME units as compared to other states. In the major states with higher shares of enterprises, while the share of enterprises is more in rural areas in Andhra Pradesh, Uttar Pradesh and West Bengal as compared to their urban areas, the reverse holds good for Maharashtra and Tamil Nadu. Out of the 35 States/UTs, 16 smaller States/UTs together contribute less than 6% of the total number of unorganised manufacturing enterprises.

Statement 7: Percentage shares of enterprises in States/UTs in total number of enterprises, separately by sector and enterprise type

2.3.2 Distribution of manufacturing enterprises by enterprise type in each state/u.t.: The percentage distribution of manufacturing enterprises, based on survey estimates, by enterprise type separately for rural, urban and combined sectors of each State/UT is given in Statement 8. Among the major states, the proportion of OAME is much higher as compared to NDME and DME. Again, among the three types of enterprises, there are more than 90% OAMEs in Orissa,

Jharkhand, Bihar, Chatisgarh, Madhya Pradesh and Rajasthan (in that order). A good proportion (more than 15%) of NDME units is observed in Kerala, Punjab and Gujarat. This proportion is higher in most of the smaller States/UTs. In general, the proportion of NDME units is more in urban areas as compared to the rural areas. For the major states, the proportion of DMEs among all types of units is generally less than 10%.

2.4 Estimated number of workers: The estimated number of workers, activity-wise and by type of enterprises have been presented and discussed in an earlier report (Report No. 477). The percentage distribution of workers by type of enterprise in each of the activity separately for rural, urban and combined sectors is given in Statement 9. It is seen that the proportion of

workers in the OAMEs is the highest in 'Manufacture of tobacco products' (NIC code 16) (91%) followed by 'Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials' (NIC code 20) (89%) and 'Manufacture of food products and beverages' (NIC code 15) (71%). There were higher proportions of workers among the establishments engaged in manufacture of radio, television and communication equipment and apparatus (NIC code 32), manufacture of motor vehicles, trailers and semi-trailers (NIC code 34), manufacture of other transport equipment (NIC code 35) and manufacture of electrical machinery and apparatus not elsewhere classified (NIC code 31).

Statement 9: Percentage distribution of workers by enterprise type separately for each activity and by sector

*In the 55th round separate figures for NDMEs and DMEs are not available and the figures shown here relate to establishments.

**Estimated number of enterprises for the 51st round shown here is for the activities covered in both 51st and 56th rounds. Activities covered in the 51st round but excluded in the 56th round have not been considered here.

2.4.1 Statement 10 gives the percentage distribution of workers by enterprise type in each State/UT separately for rural, urban and combined sectors. It shows that among the major states Orissa, Jharkhand, Bihar and Chhattisgarh had a higher proportion of workers in OAMEs as

compared to other States. The proportion DME worker were higher for Gujarat, Maharashtra and Punjab.

2.5 Type of ownership of enterprises: Statement 11 gives the percentage distribution of enterprises by type of ownership separately for rural, urban and combined sectors of the

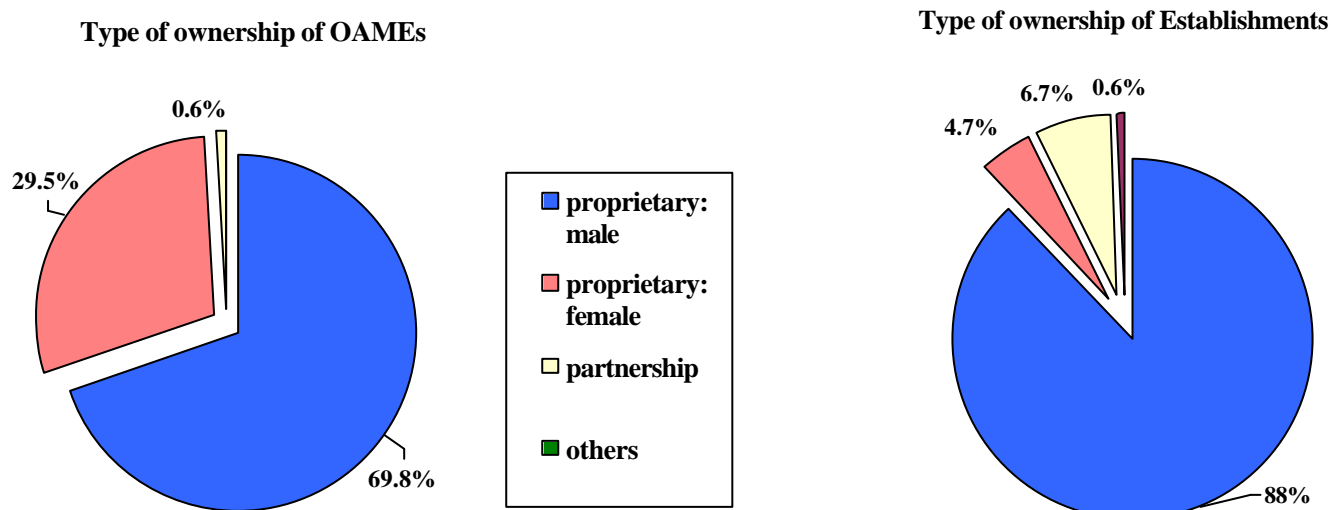

country. Male and female proprietors respectively ran more than 72% and 26% of the estimated total manufacturing enterprises. Females run only 4 to 5% of the establishments (NDMEs and DMEs taken together). Only 3% of the enterprises in urban areas were operated on partnership basis. The ownership of manufacturing enterprises under the purview was mainly with sole proprietors. The distribution of OAMEs and establishments by type of ownership at the all-India level is also shown in Chart 1 below. Statement 12 gives the distribution of enterprises (all types combined) by type of ownership in rural and urban sectors for each State/UT.

2.6 Nature of operation: Statement 13 gives the percentage distribution of enterprises by nature of operation of the enterprise. About 93% of the total enterprises were run on perennial basis. The seasonal and casual enterprises constituted only about 9% of the total enterprises in rural and 3% in urban areas. The seasonal enterprises were more prevalent in the rural areas as compared to the urban areas.

Statement 13: Percentage distribution of enterprises by nature of operation separately by sector and type of enterprise

nature of operation	percentage of enterprises											
	rural India				urban India				all-India			
	OAME	NDME	DME	all	OAME	NDME	DME	all	OAME	NDME	DME	all

2.7 Location of the enterprises: Statement 14 gives the distribution of manufacturing and repairing enterprises by location. Out of the total enterprises, 95% were run at fixed premises either within the household premises or outside. The proportion of enterprises run in the household premises was higher (77%) in the case of OAMEs as compared to the NDMEs (27%) or DMEs (22%). Further, a higher proportion of enterprises was run from the household premises in the rural areas as compared to urban areas. Proportion of enterprises operating from permanent structures located outside the household premises was much higher in the case of establishments (69%) than for the OAMEs (15%). The picture is similar for both rural and urban areas. About 5% of OAMEs were without fixed premises. Statewise distribution by location of enterprise is given in Statement 15.

2.8. Maintenance of accounts: Statement 16 gives the percentage of enterprises maintaining accounts. An enterprise was considered to have maintained accounts if it had maintained usable books of accounts and made them available to the investigator. Only 2% of the manufacturing

enterprises have reported themselves as maintaining accounts. Less than 1% of the OAMEs, who form a majority of the enterprises, have reported themselves as maintaining accounts. As expected, the percentage of enterprises reporting maintenance of accounts was higher in the case of DMEs (16 %) as compared to the NDMEs (5%). The proportion of enterprises maintaining accounts was higher in urban areas as compared to rural areas.

Statement 16: Percentage of manufacturing enterprises maintaining accounts, separately by State/UT, sector and type of enterprise

2.8.1 It is seen that about a quarter of the Directory manufacturing enterprises maintained accounts in Assam, Punjab, Gujarat and Maharashtra, among the major States. The proportion of OAMEs maintaining accounts is the maximum for Maharashtra among the major States and this highest proportion is only 1.4%.

2.9 Status of registration: Statement 17 gives the distribution of enterprises by status of registration. About 10% of the total enterprises were reported to be registered with any registration agency. The percentage of OAME registered was 5% whereas the same 45% in the case of establishments (NDME + DME). The overall proportion of registered enterprises was much higher in urban areas as compared to the rural areas. Among the registered enterprises, it can be seen from the detailed Table 12 (in Appendix A) that a majority had registered with local bodies (75% of all enterprises), followed by development commissioner / handicraft / handloom / power loom act (21% of all enterprises) and jute commissioner sales tax act (19% of all enterprises). The State-wise estimates for registration with any agency (all enterprise types together) are given in Statement 28.

Statement 17: Distribution of manufacturing enterprises by status of registration under/with any Act / Authority

status of registration	percentage of enterprises											
	rural India				urban India				all-India

* percentage of establishments

2.10 Number of months operated: Statement 18 gives the distribution of enterprises by number of months of operation during the last 365 days. About 82% of the enterprises had worked for 9 months or more during the last 365 days, while about 5% of the enterprises had operated for less than a quarter of the last year. Enterprises in the urban areas had operated for a relatively longer duration than those in the rural areas. In urban areas, the duration of operation was almost the same for all the three types of enterprises. In rural areas, however, DME units had operated for shorter period as compared to the other types of enterprises.

Statement 18: Percentage distribution of manufacturing enterprises by number of months of operation during the last 365 days, separately by sector and type of enterprise

no. of months of operation	percentage of enterprises											
	rural India				urban India				all-india

2.11 Other economic activities undertaken: Statement 19 presents the distribution of enterprises by number of other economic activities undertaken during the last 365 days. Since many of the enterprises in the unorganised manufacturing sector operate at a low level of activity, information on the number of other economic activities carried out by the entrepreneurs simultaneously or at different points of time was collected. These other economic activities include any economic activity such as self employment in agriculture, wage employment, etc. It has been estimated that 56% of the entrepreneurs had not undertaken any such additional activity during the last 365 days. So, about 44% of enterprises had undertaken 1 or more additional activities. The enterprises in the rural areas had undertaken more additional activities than their counterparts in the urban areas. Also, as expected, taking up additional activities is seen to be more common in the case of OAMEs than for manufacturing establishments.

Statement 19: Percentage distribution of manufacturing enterprises by number of other economic activities undertaken during the last 365 days, separately by sector and type of enterprise

no. of other economic activities	percentage of enterprises

2.12 Specific problems faced in operation: Information on different types of problems faced by the manufacturing sector enterprises in their day-to-day operation was collected. Information on problems faced was collected in two ways. Information on whether they faced problems in a few specific areas was collected through a set of direct questions. Information was also collected on another open-ended item on various types of “other problems faced”. Statement 20 gives the estimates obtained from the responses regarding problems faced in specific areas. About 27% of the total enterprises had not faced any specific problem in their day-to-day operation. The shortage of capital seems to be the problem faced by the highest proportion of enterprises (47%) followed by other non-specified problems (35%) and problem of marketing of products (19%). The ‘problem of power cut’ was reported more often by the larger enterprises (NDMEs and DMEs) while for the smaller ones, i.e., the OAMEs, the problem of ‘non-availability of electricity connection’ was reported more often, especially in the rural areas.

Statement 20: Percentage of manufacturing enterprises reporting some specific problems, separately by sector and type of enterprise

* details given in Statement 21

2.13 Other problems faced: As already mentioned apart from some specific problems, information was collected on the details of some ‘other problems’ (as given in Statement 19) faced by the enterprises in their day-to-day operation. Statement 21 gives the percentage distribution of enterprises by type of these ‘other problems’. Competition from larger units was reported by the highest proportion of the enterprises (29%). Local problems (18%) and problem of non-recovery of service charges (16%) were the other important problems reported by the enterprises.

Statement 21: Percentage distribution of manufacturing enterprises by type of 'other problems' faced for each enterprise type

2.14 Type of assistance received: Statement 22 gives the proportion of enterprises receiving assistance separately by type of assistance received. Only about 5 % of the enterprises had reported as receiving assistance of any kind. About 4 % of enterprises received assistance in the form of loans. Assistance in the form of loans was reported more often by the establishments, especially by the DMEs, as compared to the OAMEs.

percentage of enterprises not receiving any assistance	96.0	87.9	77.8	95.2	95.9	90.1	82.1	93.6	96.0	89.3	80.5	94.7

2.15 Working on contract: Statements 23 and 24 give the distribution of enterprises by status of working on contract and type of contract undertaken by them. About 31% of the total manufacturing enterprises have been estimated to be undertaking at least some work on contract basis. The proportion of enterprises working on contract was appreciably higher in urban areas as compared to the rural areas, but the difference between the OAMEs and establishments was rather small. Chart 3 depicts the proportion of enterprises working on contract in different major States and all-India.

Statement 23: Percentage distribution of manufacturing enterprises by status of working on contract, separately by sector and type of enterprise

status	percentage of enterprises								
	rural India			urban India			all-India		
	OAME	establishment	all	OAME	establishment	all	OAME	establishment	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
working on contract	28.0	21.7	17.6	38.8	35.9	37.9	30.7	30.5	30.7
not working on contract	72.0	78.3	72.4	61.2	64.1	62.1	69.3	69.5	69.3
all	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

2.15.1 For most of the enterprises working on contract the contract had been “solely for master enterprise/contractor” (80%). This was more prevalent among the OAME than among the establishments. The State/UT-wise estimates for enterprises working on contract (all enterprise types together) are given in Statement 29.

Statement 23: Percentage distribution of manufacturing enterprises working on contract by type of contract separately by sector and type of enterprise

type of contract	percentage of enterprises								
	rural India			urban India			all-india		
	OAME	establishment	all	OAME	establishment	all	OAME	establishment	all

all (including not recorded cases)	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

2.16 Supply of equipments and raw materials to enterprises working on contract: Statement 25 gives the distribution of enterprises working on contract by the source that supplies equipments and separately by source that supplies raw materials for each type of enterprise and for rural, urban and combined sectors. While the equipments were self-procured by 90% of the enterprises, the raw materials were supplied by the master enterprise / contractor to 88% of the enterprises. The supply of raw materials by the master enterprise / contractor was more prevalent for the OAME than for the establishments.

Statement 25: Percentage distribution of manufacturing enterprises working on contract by source of supply of equipment and of raw materials, separately by sector and by type of enterprise

source of supply of equipment/ raw materials		percentage of enterprises working on contract								
		rural			urban			combined		
		OAME	establishments	all	OAME	establishments	all	OAME	establishments	all

2.17 Source (agency) of purchase of basic inputs and destination (agency) of supply of output: Statement 26 presents information on the primary source agency from which the enterprises purchased their basic inputs and Statement 27 relates, in the same way, to the purchaser agency of the goods/services produced by the enterprises. These two together give an idea about the nature of links the enterprises had with their immediate supplier of basic inputs and immediate purchaser of goods/services. Information on these items was collected for the two most important sources/destinations in terms of value in case there was more than one such agency. Overall, about 33 % of enterprises did not have any particular agency as source for purchase of basic input(s). More than 40% of the enterprises purchased their inputs from private enterprises. Enterprises in rural areas depended more on private individuals / households (23%) for such purchases as compared to the enterprises in urban areas (10%). In contrast, private enterprises were reported more often (56%) in urban areas than I rural areas (38%).

Statement 26: Percentage of manufacturing enterprises by source agency of purchase of basic input, separately by sector and type of enterprise

2.17.1 Statement 27 on destination (or purchaser) agencies shows that private individuals / households (63%) were the primary purchasers of final products / services of the enterprises. This was followed by private enterprises (31%) and contractors / middlemen (17%). Private enterprises were more frequently reported by DMEs than for NDMEs and OAMEs.

Statement 27: Percentage of manufacturing enterprises by destination agency for sale of final output, separately by sector and type of enterprise

2.18 Growth status of the enterprise over the last three years : Statement 28 summarises the information on the status of the enterprise over last three years. The information was collected to get the owner's impression about the growth of the enterprise over the last three years. Over 15% of the entrepreneurs had felt that their business activities have expanded over the three years preceding the date of survey. On the other hand, about 12% of the entrepreneurs felt that their business has contracted over the last three years. About 63% of the entrepreneurs had felt that their enterprises had been stagnant during the last three years. The impression of 'stagnation' appears to be more common in case of OAMEs and 'expansion' for the DMEs.

Statement 28: Percentage distribution of manufacturing enterprises by growth status over the last three years, separately by sector and type of enterprise

growth status of the enterprise	percentage of enterprises

2.19 State/UT-wise estimates for some selected items : Statement 29 presents State/UT-wise information on three items, viz., percentage of enterprises working on contract, percentage of enterprises registered with any agency and percentage of enterprises with expanding growth status. Among the major States, West Bengal, Tamil Nadu and Madhya Pradesh had a high percentage (over 40%) of manufacturing enterprises working on contract. Gujarat had the highest percentage of manufacturing enterprises registered with any agency. About 20% of the manufacturing enterprises reported expanding growth status in West Bengal, Bihar and Jharkhand among the major States.

Statement 29: State/UT-wise percentage of manufacturing enterprises (i) working on contract, (ii) registered with any agency and (iii) reporting expanding growth status over the last three years, separately by sector

Appendix B

COVERAGE, SAMPLE DESIGN AND ESTIMATION PROCEDURE

1. Introduction:

The NSS fifty-sixth round has been focused on **unorganized manufacturing** enterprises. In addition, the annual consumer expenditure enquiry covering some key characteristics of employment-unemployment is being conducted, as usual, on a thin sample of four households in each sample village/block.

2. **Subject Coverage:** The fifty-sixth round of NSS has covered broadly all *unorganized* manufacturing enterprises under the two-digit codes, 15 to 37 (Tabulation category 'D') of NIC '98 and non-ASI enterprises under cotton ginning, cleaning and baling (NIC '98 code 01405). Thus the survey has covered:

- (a) Manufacturing enterprises **not registered** under Sections 2m (i) and 2m(ii) of the Factories Act, 1948
- (b) Manufacturing enterprises registered under Section 85 of Factories Act, 1948
- (c) Non-ASI enterprises engaged in cotton ginning, cleaning and baling (NIC '98 code 01405)
- (d) Non-ASI enterprises manufacturing bidi and cigar *whether* registered under bidi and cigar workers (condition of employment) Act, 1966 or not.

The survey has excluded:

- (a) Repairing enterprises not falling under Tabulation Category 'D' of NIC '98
- (b) Departmental units such as Railway Workshops, RTC Workshops, Government Mint, Sanitary, Water supply, Gas, Storage, etc. in line with ASI coverage
- (c) Units covered under ASI

3. **Period of survey and work programme:** The fieldwork of fifty-sixth round has commenced on 1st July 2000 and will end on 30th June 2001. The survey period of this round has been divided into four sub-rounds of three months duration each as follows:

Table 1: Sub-rounds and period of survey:

sub-round no.	period of survey
(1)	(2)
1	July-September 2000
2	October-December 2000
3	January-March 2001
4	April-June 2001

Equal number of sample FSUs has been allotted for survey in each of these four sub-rounds. Each such FSU is to be surveyed during the sub-round to which it has been allotted. *Because of the*

arduous field conditions, this restriction has been relaxed in Andaman and Nicobar Islands, Lakshadweep, rural areas of Arunachal Pradesh and Nagaland.

4. Geographical coverage: The survey has covered the whole of the Indian Union *except* (i) Leh and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometers of the bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year and (iv) some FSUs (numbering less than 0.1% of total) where EC '98 work could not be conducted.

5. Schedules of enquiry: The following Table lists the schedules of enquiry for the current round:

Table 2: Schedules being canvassed in NSS 56th round

srl. no.	schedule no.	title of the schedule
(1)	(2)	(3)
1.	0.0	list of households and non- agricultural enterprises
2.	2.2	unorganized manufacturing
3.	1.0	household consumer expenditure

6. Participation of States: In this round all the States and Union Territories except Andaman & Nicobar Islands, Dadra & Nagar Haveli and Lakshadweep have participated at least on an equal matching basis. The following table shows the prevalent matching pattern of the participating States/UTs:

Table 3: Prevalent matching pattern of the participating States/UTs

States / UTs	matching pattern
(1)	(2)
Nagaland (U), Delhi	Triple
J & K, Manipur	Double
Goa, Maharashtra (U)	One and half
All other States / UTs	Equal

Note: i) Union Territory of Chandigarh has not participated in the rural sector for state sample.

ii) The matching pattern could not be followed for Goa, Nagaland(U)

7. An outline of sample design:

7.1 A stratified multi-stage sample design has been adopted with villages (Panchayat wards in case of Kerala) / UFS blocks as the first stage units (FSUs) and manufacturing enterprises (OAME/ NDME / DMEs) in the unorganized sector (vide para 2 above) as the ultimate stage units (USUs). For consumer expenditure and employment-unemployment survey, households are the USUs as usual.

7.2 **Sampling Frame:** EC '98 with enterprise/ establishment level data has been taken as the frame for the survey for the whole of India except Orissa, Bihar (EC '98 work not completed) & 66 towns of Karnataka (EC '98 work done not using UFS blocks). Population census 1991 has been taken as

sampling frame for rural sector of both Orissa and Bihar. Latest available list of UFS blocks has been taken as sampling frame for 66 towns of Karnataka and all towns of Orissa and Bihar.

7.3 Stratification

Rural: Each district has been treated as a stratum for all States/UTs. In all States/UTs except Orissa and Bihar, each district has been divided into three sub-strata as under:

- sub-stratum 1: FSUs with no unorganized manufacturing enterprises
- sub-stratum 2: FSUs with at least one DME in the unorganized sector
- sub-stratum 3: remaining FSUs

Formation of a sub-stratum has been considered only when there were at least 20 FSUs in that sub-stratum; otherwise that particular sub-stratum was not formed and merged with other sub-stratum as per the following working rule :

Sub-stratum 1 (sub-stratum 3) with less than 20 FSUs has been merged with sub-stratum 3 (sub-stratum 1). Sub-stratum 2 with less than 8 FSUs has been merged with sub-stratum 3. In case of merger of two or more sub-strata, the FSUs have been identified with the sub-stratum having larger number of FSUs.

As EC '98 data were not available for Orissa and Bihar at the time of sample selection, stratification in these two states has been done on the basis of Population Census 1991. In this case, each district has been taken as a stratum and each stratum has been divided into two sub-strata only:

- sub-stratum 1: All FSUs with population from 0 to 50 as per Census 1991.
- sub-stratum 2: The remaining FSUs.

Formation of a sub-stratum has been considered only when there were at least 20 FSUs in that sub-stratum; otherwise no sub-stratification has been effected and all FSUs in this case have been taken to belong to sub-stratum 2 for facilitating processing work only.

Urban: Strata have been formed within each NSS region of a State/UT (except Karnataka). The towns within an NSS region have been grouped to form strata according to the population of the towns as per 1991 population Census as given below (P stands for population of '91 census):

- i) Stratum 1: all towns with $P \leq 50000$
- ii) Stratum 2: all towns with $50000 < P \leq 100000$
- iii) Stratum 3: all towns with $100000 < P \leq 500000$
- iv) Stratum 4: all towns with $500000 < P \leq 1000000$
- v) Stratum 5/ 6/ 7: Each town with $P > 1000000$

Within each stratum (except for Orissa and Bihar and specified 66 towns of Karnataka) three sub-strata have been formed based on EC-98 information, as under:

- sub-stratum 1: FSUs with no unorganized manufacturing enterprises
- sub-stratum 2: FSUs with at least one DME in the unorganized sector
- sub-stratum 3: remaining FSUs.

Sub-stratum 1 (sub-stratum 3) with less than 20 FSUs has been merged with sub-stratum 3 (sub-stratum 1) and has been identified with the sub-stratum 3 (sub-stratum 1). Sub-stratum 2 with less than 8 FSUs has been merged with sub-stratum 3. In case of merger of two or more sub-strata, the FSUs have been identified with the sub-stratum having larger number of FSUs.

For Karnataka, there were 66 towns where UFS blocks were not used for EC '98 work. The stratification procedure has therefore been modified for the urban sector of Karnataka in the following manner:

All the towns of Karnataka have first been grouped into NSS region \times town classes as per the criteria given above for other States/UTs. Then within each region \times town class, two strata have been formed. The towns included in the list of 66 special category towns have formed a **special stratum** within a region \times town class. The rest of the towns within the region \times town class have formed a **general stratum**.

Sub-stratification for **general strata** of Karnataka has been the same as in the case of other States/UTs. For **special strata** of Karnataka and all the strata of Orissa and Bihar, three sub-strata have been formed, as follows:

- sub-stratum 1: all FSUs (i.e. UFS blocks as per the latest UFS) identified as Industrial Area (IA).
- sub-stratum 2: all FSUs identified as Bazar Area (BA).
- sub-stratum 3: the remaining FSUs

Priority order that has been followed in including a 'mixed area' type FSU e.g. IA and BA, BA and RA (i.e. Residential Area), etc. in sub-strata is IA and then BA e.g. an FSU identified as both IA and BA is included in sub-stratum 1.

Sub-stratum with less than 20 FSUs has been merged with other sub-stratum under a working rule as given below:

Sub-stratum 1 is to be merged with sub-stratum 2 if the latter has already been formed; otherwise sub-stratum 1 is to be merged with sub-stratum 3.

7.4 Sample Size: All-India sample size for the round has been fixed at 14788 FSUs for Central sample and 16220 FSUs for the State sample taking care of prevalent matching pattern for the States as far as possible. Due to non-availability of adequate number of FSUs the State samples of Goa and Nagaland (Urban) were adjusted. The allotted numbers of sample FSUs by state \times sector, separately for central and state samples, have been shown in Table (1) of Appendix.

7.5 Allocation between rural and urban sectors: The allocation of FSUs between rural and urban sectors has been made in proportion to the number of workers engaged in unorganized non-agricultural enterprises as per EC '98 (Census '91 for Orissa and Bihar) with 1.5 weightage to Urban sector.

7.6 Allocation among strata/sub-strata: Allocations to strata/sub-strata in both rural and urban sectors (except for Orissa, Bihar and special urban strata in Karnataka) have been made in proportion to the number of non-agricultural workers in the unorganized sector as per EC '98.

For Orissa and Bihar rural, allocation has been made to strata/sub-strata in proportion to non-agricultural workers as per population Census'91. For urban strata of Orissa and Bihar, allocation has been made in proportion to the number of FSUs in the strata. Allocations to sub-strata within the urban stratum have been done in proportion to number of FSUs in the sub-strata with weights 2, 2 and 1 for sub-stratum 1, 2 & 3 respectively.

For the special urban strata of Karnataka, stratum allocations have been made in proportion to number of non-agricultural workers in the unorganized sector as per EC '98. But sub-stratum allocations have been made in the same manner as for urban sub-strata of Orissa and Bihar.

Allocation to any stratum/sub-stratum has been adjusted to a multiple of 2 FSUs. (When the proportional allocation turned out to be less than three, it has been adjusted to 2. When the allocation was greater than or equal to 3 but less than 5, it has been adjusted to 4 and so on.)

While allocating FSUs to stratum/sub-stratum it has been, however, ensured that each (stratum \times sub-stratum \times sub-sample) is represented.

7.7 Selection of FSUs : For sub-stratum 1 of each stratum in rural/urban sector of each State/UT except urban sub-strata of Orissa and Bihar and all *special* strata/sub-strata relating to 66 towns of Karnataka, FSUs have been selected by simple random sampling without replacement (SRSWOR). For all urban sub-strata of Orissa and Bihar and all *special* strata/sub-strata relating to 66 towns of Karnataka, FSUs have been selected circular systematically (CSS) with equal probability. For all other sub-strata in both rural and urban sectors, FSUs have been selected circular systematically (CSS) with Probability proportional to size (PPS), size being the *number of manufacturing workers in the unorganized sector as per EC '98. (For Orissa and Bihar rural, size being number of manufacturing workers as per census '91)*. For an FSU with no manufacturing worker, size 1 has been assigned to that FSU before drawing samples). However, some manufacturing enterprises have been found to have large number of workers as per EC '98 frame even though they are in the unorganized sector. Some adjustment to the size of workers for such enterprises has, therefore, been made before calculating the size of FSUs. For this purpose, any unorganized manufacturing enterprise having more than 200 workers has been deemed to have a size equal to 200. Enterprise sizes have been thereafter added up to get the FSU size and sub-stratum / stratum size.

Sample FSUs have been drawn in the form of two independent sub-samples in both the sectors. However, for sub-strata 2 & 3 of both the sectors, except those belonging to urban sectors of Bihar & Orissa and 66 towns of Karnataka, a little modification in the usual procedure for CSS PPS scheme was made at the selection stage so that repetition of FSU within a sub-sample or between sub-samples could be avoided. The modification was as follows:

In any cycle of CSS, if the selected FSU was found to be already present in the sample (either in the first or in the second sub-sample), it was skipped and next cycle was executed by adding the sampling interval in order to select a fresh FSU. As a result, all the selected FSUs in the two sub-samples taken together were distinct for the sub-stratum. In some sub-strata where there were some big-sized FSUs, the procedure did not result in selection of required number of distinct FSUs because a situation was encountered where the sample FSUs were repeated again and again even after adding the sampling interval. In a few such cases, where fresh FSU was not found even after 20 cycles, the first unselected FSU obtained by scanning the sub-stratum from the top of the frame was selected. In central sample, the selection of samples for 1st sub-sample was completed first and then the FSUs of 2nd sub-sample were drawn. In case of state sample, sampling was done independently of central sample. But within the state sample, the procedure of selection was same as in the case of central sample. *It may be noted that in view of the above modification, the two sub-samples are no more independent.*

For uniform spread of field work over the survey period all the sample FSUs pertaining to a State/UT have been arranged, separately for central sample and state sample, first by stratum and then each stratum by sub-stratum and each sub-stratum by sub-sample and then sub-round number has been assigned against sample FSUs in the sequence 1, 2, 3, 4.

7.8 Formation of hamlet-group/ sub-block: Hamlet-group/ sub-block (h.g. / s.b) has been formed in large FSUs by considering the population and enterprise criteria as indicated below:

Table 4: number of hamlet groups/ sub-blocks to be formed

Population (P)	No. of h.gs/s.bs to be formed	No. of non-agricultural enterprises (E)	No. of h.gs /s.bs to be formed
(1)	(2)	(3)	(4)
0 - 1200	1	0 - 120	1
1201 - 1600	4	121 - 160	4
1601 - 2000	5	161 - 200	5
2001 - 2400	6	201 - 240	6
and so on		and so on	

For rural areas of HP, Sikkim and Poonch, Rajouri, Udhampur and Doda districts of J & K, number of h.gs to be formed in the village as per population criterion were 1 for $P \leq 600$, 4 for $601 \leq P \leq 800$, 5 for $801 \leq P \leq 1000$ and so on. For enterprise criterion, procedure was not changed for the above areas.

The higher of the two values as per population and enterprise criteria (vide col.2 and col.4 of table7) has been accepted as the number (D) of h.gs/ s.bs to be actually formed. Hamlet-group/ sub-block has been formed by more or less equalizing population. Three h.gs/ s.bs have been selected - one with the maximum number of DMEs (or with maximum number of NDMEs if there was no DME or with maximum number of OAMEs if there was no DME/ NDME in the FSU) or with maximum percentage share of population if there was no manufacturing enterprise in the entire FSU, has always been selected and termed as **Segment 1**; other two have been selected *circular systematically with equal probability* and combined to form **Segment 2**.

7.9 Number of enterprises to be surveyed and procedure of selection: Three second-stage strata have been formed for DME, NDME and OAME for each sample FSU/ segment. In an FSU at most 16 enterprises were to be surveyed. When the frame was found to contain at most 16 such enterprises all the available ones have been surveyed. However, when the frame was found to contain more than 16 such enterprises a total of 16 enterprises as per Table 5 given below have been selected *circular systematically with equal probability* after arranging the frame enterprises according to Broad Manufacturing Group (BMG) codes as provided in Table 6.

Table 5: Number of sample enterprises within an FSU

Second-stage stratum	FSUs not requiring hamlet-group/sub-block formation	FSUs requiring hamlet-group/sub-block formation	
	Segment 1	Segment 1	Segment 2
(1)	(2)	(3)	(4)
DME	8	6	2
NDME	4	2	2
OAME	4	2	2
Total	16	10	6

Broad manufacturing group (BMG) code: One of the codes 1 to 6 as appropriate to the enterprise depending upon its activity has been assigned for each enterprise.

The codes are as follows:

Table6: BMG codes

Activities under NIC '98 codes	Broad manufacturing group (BMG) code
15-16	1
17-18	2
19-22	3
23-28	4
29-36	5
37	6

8. Estimation Procedure

8.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum (t = 1, 2 or 3)

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th village/block (FSUs)

1 = subscript for segment 1

2 = subscript for segment 2

j = subscript for j-th enterprise type (j =1 for OAME; j =2 for NDME; j =3 for DME)

k = subscript for kth sample enterprise under a particular enterprise type for Sch.2.2 and k-th sample household for Sch.1.0.

D = total no. of h.gs /s.bs formed in the sample village/block

Z = total size of a stratum/sub-stratum

z = size of village/block used for selection

n' = number of sample village/blocks allotted for a particular sub-sample.

n = number of sample village/blocks surveyed *including zero cases* for a particular sub-sample.

p = inclusion probability for the sample FSUs of sub-sample 1

p' = inclusion probability for the sample FSUs of sub-sample 2 given sub-sample 1

E = total no. of enterprises listed for a particular enterprise type in a segment of sample FSU.

e = total no. of enterprises surveyed for a particular enterprise type in a segment of sample FSU.

H = total no. of households listed in a segment of FSU.

h = total no. of households surveyed in a segment of sample FSU.

x, y = observed value of characters X, Y under estimation.

\hat{X} , \hat{Y} = estimate of population total of the characters X, Y.

Then $y_{stm\dot{a}jk}$ = observed value of the character Y for the k-th sample enterprise of the j-th enterprise type belonging to segment 1 of i-th village/block (FSUs) of m-th sub-sample of the t-th sub-stratum of s-th stratum.

8.2 Formulae for estimation for a particular stratum ' sub-stratum ' sub-sample:

i) Estimation formula for sub-stratum 1:

$$\hat{Y}_{stmj} = \frac{Z_{st}}{n_{stmj}} \sum_{i=1}^{n_{stmj}} \left[\frac{E_{stmj1j}}{e_{stmj1j}} \sum_{k=1}^{e_{stmj1j}} y_{stmj1jk} + \left(\frac{D_{stmj} - 1}{2} \right) \frac{E_{stmj2j}}{e_{stmj2j}} \sum_{k=1}^{e_{stmj2j}} y_{stmj2jk} \right],$$

(t = 1 ; j = 1, 2, 3 ; m = 1, 2)

... .. (1)

ii) Estimation formula for sub-strata 2 & 3:

1) for all States except Orissa(Urban), Bihar (Urban) and 66 towns of Karnataka:

a) for sub-sample 1:

$$\hat{Y}_{stmj} = \sum_{i=1}^{n_{stmj}} \frac{1}{p_{stmj}} \left[\frac{E_{stmj2j}}{e_{stmj2j}} \sum_{k=1}^{e_{stmj2j}} y_{stmj2jk} + \left(\frac{D_{stmj} - 1}{2} \right) \frac{E_{stmj3j}}{e_{stmj3j}} \sum_{k=1}^{e_{stmj3j}} y_{stmj3jk} \right],$$

(t = 2, 3 ; j = 1, 2, 3 ; m = 1)

... .. (2)

b) for sub-sample 2:

$$\hat{Y}_{stm} = A + B, \quad (t = 2, 3 ; m = 2)$$

where

$$A = \sum_{i=1}^{n_{stmj}} \left[\frac{E_{stmj2j}}{e_{stmj2j}} \sum_{k=1}^{e_{stmj2j}} y_{stmj2jk} + \left(\frac{D_{stmj} - 1}{2} \right) \frac{E_{stmj3j}}{e_{stmj3j}} \sum_{k=1}^{e_{stmj3j}} y_{stmj3jk} \right],$$

(t = 2, 3 ; j = 1, 2, 3 ; m = 1)

and

$$B = \sum_{i=1}^{n_{stmj}} \frac{1}{p'_{stmj}} \left[\frac{E_{stmj2j}}{e_{stmj2j}} \sum_{k=1}^{e_{stmj2j}} y_{stmj2jk} + \left(\frac{D_{stmj} - 1}{2} \right) \frac{E_{stmj3j}}{e_{stmj3j}} \sum_{k=1}^{e_{stmj3j}} y_{stmj3jk} \right],$$

(t = 2, 3 ; j = 1, 2, 3 ; m = 2)

... .. (3)

2) for Orissa (U), Bihar (U) and 66 towns of Karnataka:

$$\hat{Y}_{stmj} = \frac{Z_{st}}{n_{stmj}} \sum_{i=1}^{n_{stmj}} \left[\frac{E_{stmj2j}}{e_{stmj2j}} \sum_{k=1}^{e_{stmj2j}} y_{stmj2jk} + \left(\frac{D_{stmj} - 1}{2} \right) \frac{E_{stmj3j}}{e_{stmj3j}} \sum_{k=1}^{e_{stmj3j}} y_{stmj3jk} \right],$$

(t = 2, 3 ; j = 1, 2, 3 ; m = 1, 2)

... .. (4)

iii) Estimate for stratum:

$$\hat{Y}_{smj} = \sum_{t=1}^3 \hat{Y}_{stmj} \text{ for } j\text{-th enterprise type, } (j = 1, 2, 3 ; m = 1, 2) \dots \dots \quad (5)$$

$$\hat{Y}_{sm} = \sum_{j=1}^3 \hat{Y}_{smj} \text{ for all enterprises, } (m = 1, 2) \dots \dots \dots \dots \quad (6)$$

Note: i) For rural sector of Orissa and Bihar, there are only two sub-strata i.e. $t = 1$ or 2 .
 ii) For all sub-strata in the urban sector of Bihar, Orissa and special strata of Karnataka and for sub-stratum 1 in both rural and urban sector of all other States/UTs, stratum/sub-stratum size (Z_{st}) is the number of FSUs in the stratum/sub-stratum.

8.3 Combined Estimates for aggregate:

Combined estimate (denoted by \hat{Y}_{cs}) of two sub-samples is obtained as:

$$\hat{Y}_{cs} = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm} \dots \dots \dots \dots \quad (7)$$

for stratum s .

8.4. Combined Estimate of aggregates for Region/State/UT/all-India :

The combined estimate \hat{Y}_c at the Region/State/UT/all-India level is obtained by summing the stratum estimates \hat{Y}_{cs} over all the strata belonging to the region/State/UT/all-India i.e.

$$\hat{Y}_c = \sum_s \hat{Y}_{cs} \dots \dots \dots \dots \quad (8)$$

8.5. Estimates of ratios :

Let \hat{Y}_c and \hat{X}_c be the Region/State/UT/all-India level combined estimates for two aggregate characters X & Y respectively.

Then combined ratio estimate \hat{R}_c of the ratio $R = \frac{Y}{X}$ will be given by

$$\hat{R}_c = \frac{\hat{Y}_c}{\hat{X}_c} \dots \dots \dots \dots \quad (9)$$
