

Report No. 526(62/2.2/3)

**Unorganised Manufacturing Sector in India:
Input, Output and Value Added**

**NSS 62nd Round
(July 2005-June 2006)**

सत्यमेव जयते

**National Sample Survey Organisation
Ministry of Statistics and Programme Implementation
Government of India
February 2007**

PREFACE

The National Sample Survey Organisation (NSSO) conducted an integrated survey of households and unorganised manufacturing enterprises in the 62nd round of NSS during July 2005 - June 2006. The subjects covered were household consumer expenditure, employment and unemployment and certain characteristics of unorganised manufacturing enterprises. The present report is the third and the last in a series of three reports being brought out based on the data relating to unorganised manufacturing enterprises. The first report contained information on various operational characteristics of enterprises like location of enterprise, nature of operation, maintenance of accounts etc. in detail while the second report contained detailed estimates of employment, assets & borrowings. The present report provides information on input, output & value added of unorganised manufacturing enterprises at all India level for different industry groups and at the level of States / UTs for all the industry groups taken together.

Chapter One of the report is introductory. Chapter Two deals with concepts and definitions. Chapter Three gives the summary of the findings. Chapter Four presents limitations of the survey and suggestions. Detailed tables based on the survey are given in Appendix A. The sample design and estimation procedure are given in Appendix B. Facsimile of schedule canvassed during the survey is given in Appendix C.

Survey Design and Research Division of NSSO developed the sample design and survey instruments and also prepared the report. The Field Operations Division of NSSO carried out the fieldwork and the Data Processing Division of NSSO handled the data processing and tabulation work. The Coordination and Publication Division of NSSO coordinated various activities pertaining to the survey.

I am grateful to the Chairman and Members of the then Governing Council of NSSO and also the Chairman and Members of the Steering Committee and Working Group for the NSS 62nd round for their technical guidance at various stages of survey work. I convey my special thanks to the Editor of the report for the valuable advice in finalizing the report. I am grateful to all Officers and Staff Members of this Ministry who were associated with the survey for their contribution. Special thanks are also due to the informants who provided the requisite information during data collection in the survey.

I hope this report will be useful to planners, policy makers and researchers. Comments and suggestions for improvement will be most welcome.

New Delhi
February, 2008

(P. K. Ray)
Director General & Chief Executive Officer
National Sample Survey Organisation

Table no.	Table description	Page
1	Per 1000 distribution of enterprises by number of workers for each industry and for each State/UT	A 1-A 24
2	Annual value of key characteristics per enterprise for each industry and for each State/UT	A 25-A 48
3	Annual value of different items of intermediate consumption (in Rs.) per enterprise by type of input for each industry	A 49-A 72
4	Annual gross value (in Rs.) of different items of output per enterprise by type of receipts for each industry	A 73-A 84
5	Annual gross value added (in Rs.) per enterprise by enterprise type for each industry and for each State/UT	A 85-A 86
6	Annual aggregate gross value added (in Rs. '000) by industry for each State/UT	A 87-A 90
7	Annual gross value added (in Rs.) per enterprise by location of enterprise for each industry and for each State/UT	A 91-A 114

Table no.	Table description	Page
8	Annual gross value added (in Rs.) per worker by enterprise type for each industry and for each State/UT	A 115-A 116
9	Annual value of key characteristics (in Rs.) per proprietary and partnership enterprise for each industry and for each State/UT	A 117-A 140
10	Annual value of key characteristics (in Rs.) per worker for each industry (only for proprietary and partnership enterprises) and for each State/UT	A 141-A 164
11	Gross value added per worker (in Rs.) by number of workers and by industry and for each State/UT	A 165-A 188
12	Annual Gross value added per worker (in Rs.) by number of working hours in a normal day of the enterprise during the reference year for each industry and for each State/UT	A 189-A 212
13	Annual gross value added per worker (in Rs.) by maintenance of accounts for each industry and for each State/UT	A 213-A 236
14	Annual gross value added per worker (in Rs.) by other economic activities and major source of annual income of owner of the enterprise for each industry (for proprietary and partnership enterprises only) and for each State/UT	A 237-A 260
15	Number per 1000 of enterprises by source agency of basic input for each industry and for each State/UT	A 261-A 284
16	Number per 1000 of enterprises by destination agency of final products / services for each industry and for each State/UT	A 285-A 308
17	Number of enterprises allotted, surveyed and reasons for casualty in the list-frame and segment 9 of area frame	A 309-A 310
18	Number of enterprises surveyed by types of informant and types of response for each industry and for each State/UT	A 311-A 334
19	Number of enterprises surveyed by time taken to canvass schedule 2.2	A 335-A 336

भारत में असंगठित विनिर्माण क्षेत्रक - आगत, निर्गत और वर्धित मूल्य (जुलाई 2005 - जून 2006)

मुख्य परिणाम

(यह सर्वेक्षण 4798 ग्रामों और 5125 नगरीय खंडों में किया गया । समस्त भारत में कुल मिलाकर 82897 उद्यमों का सर्वेक्षण किया गया)

- भारत में 2005-06 के दौरान असंगठित विनिर्माण उद्यमों की आकलित संख्या 17.07 मिलियन थी ।
- कुल उद्यमों में से 71% ग्रामीण क्षेत्रों में और शेष 29% नगरीय क्षेत्रों में अवस्थित थे ।
- असंगठित विनिर्माण उद्यमों में कुल मिलाकर लगभग 36.44 मिलियन कामगारों के कार्यरत होने का आकलन किया गया है ।
- भारत में असंगठित विनिर्माण उद्यमों के कामगारों की अनुमानित संख्या में पश्चिम बंगाल का हिस्सा उच्चतम (15%) था ।
- 2005-06 के दौरान भारत में असंगठित विनिर्माण उद्यमों द्वारा किया गया सकल वर्धित मूल्य (GVA) रु. 87586 करोड़ होने का अनुमान किया गया है ।
- भारत में 2005-06 के दौरान असंगठित विनिर्माण उद्यमों द्वारा किये गये सकल वर्धित मूल्य (स.व.मू.) में ग्रामीण और नगरीय क्षेत्रों का हिस्सा क्रमशः 43% और 57% था ।
- कुल स.व.मू. में स्व-कार्यरत विनिर्माण उद्यम(स्व.का.वि.उ.), गैर-निर्देशिका विनिर्माण उद्यम (गै.नि.वि.अ.) और निर्देशिका विनिर्माण अधिष्ठान (नि.वि.अ.) की हिस्सेदारी क्रमशः 32%, 24% और 44% थी ।
- स्व.का.वि.उ. द्वारा स.वि.मू. में हिस्सेदारी ग्रामीण क्षेत्रों में 49% थी, जबकि नगरीय क्षेत्रों में यह 18% थी ।
- देश के राज्यों में से असंगठित विनिर्माण उद्यमों के लिए कुल स.व.मू. में महाराष्ट्र का हिस्सा उच्चतम (15.7%) था ।
- अखिल भारतीय स्तर पर, स.व.मू. रु. 51307 प्रति उद्यम होने का अनुमान किया गया ।
- अखिल भारतीय स्तर पर, स.व.मू. रु. 24034 प्रति कामगार होने का अनुमान किया गया ।
- असंगठित विनिर्माण उद्यमों के कुल प्रचालन व्ययों का लगभग 85% 'कच्चे माल' के लिए था ।
- असंगठित विनिर्माण उद्यमों की कुल प्राप्तियों का लगभग 80% 'विनिर्मित उत्पाद और उप-उत्पादों' द्वारा था ।
- नगरीय क्षेत्रों के लिए असंगठित विनिर्माण उद्यमों के कुल स.व.मू. की लगभग 2% हिस्सेदारी सूची ढांचा उद्यमों की थी ।

**Unorganised Manufacturing Sector in India- Input, Output and Value Added
(July 2005-June 2006)
Highlights**

(The survey was conducted in 4798 villages and 5125 urban blocks. A total of 82897 enterprises were surveyed all over India.)

- The estimated number of unorganised manufacturing enterprises in India during 2005-06 was 17.07 million.
- Out of the total enterprises 71% were located in rural areas and the remaining 29% in urban areas.
- A total of about 36.44 million workers were estimated to be working in unorganised manufacturing enterprises.
- West Bengal had the highest share (15%) of estimated number of workers of unorganised manufacturing enterprises in India.
- Gross Value Added (GVA) by unorganised manufacturing enterprises in India during 2005-06 was estimated as Rs. 87586 crores.
- Rural and urban areas contributed 43% and 57% respectively to GVA by unorganised manufacturing enterprises in India during 2005-06.
- The contributions of OAMEs, NDMEs & DMEs to aggregate GVA were 32%, 24% & 44% respectively.
- OAMEs contributed 49% to GVA in rural areas as compared to 18% in urban areas.
- Among the states, Maharashtra had the highest share (15.7%) of aggregate GVA for unorganised manufacturing enterprises of the country.
- At all-India level, GVA per enterprise was estimated as Rs.51307.
- At all-India level, GVA per worker was estimated as Rs.24034.
- 'Raw materials' constituted about 85% of total operating expenses of unorganised manufacturing enterprises.
- 'Products and by-products manufactured' constituted about 80% of gross receipts of unorganised manufacturing enterprises.
- List frame enterprises contributed about 2% of aggregate GVA of unorganised manufacturing enterprises for urban areas.

Chapter One

Introduction

1.1 General

1.1.1 This is the third and last report based on the survey on unorganised manufacturing sector in India carried out by the National Sample Survey Organisation (NSSO) as part of the 62nd round of National Sample Survey (NSS) during July 2005 – June 2006. This report focuses mainly on input, output and value added by the unorganised manufacturing sector. The first report mainly dealt with various operational characteristics of the enterprises (*henceforth the term ‘enterprises’ would mean unorganised manufacturing enterprises unless otherwise specified*). The second report discussed employment, assets and borrowings of the enterprises.

1.1.2 Manufacturing sector is one of the important sectors in the Indian economy. As per the latest available National Accounts Statistics¹, during 2006-07, the manufacturing sector had a share of about 16% in the GDP at factor cost. For the purpose of data collection, manufacturing sector has been broadly sub-divided into two categories i.e. organised (covering units coming under the Factories Act 1948) and unorganised. While data for organised manufacturing sector are collected through Annual Survey of Industries (ASI), the same for the residual non-factory unorganised manufacturing sector are collected periodically through NSS as follow-up surveys of Economic Censuses (EC). The unorganised manufacturing sector has roughly one-third share in the total contribution by the manufacturing sector in the GDP.

1.2 Survey coverage

1.2.1 Unorganised manufacturing sector under the coverage of 62nd round referred to all manufacturing enterprises, which were not covered by ASI. All government and public sector undertakings were also outside the coverage of the survey. In terms of National Industrial Classification (NIC) 2004 codes, the 62nd round survey on unorganised manufacture covered the NIC 2-digit codes 15-37. In addition, enterprises engaged in cotton ginning, cleaning and baling (NIC 2004 code 01405) were also covered under the survey (*see Table 0 at the end of this chapter for the NIC codes under coverage along with their descriptions*). It is to be noted that only those enterprises, which operated for at least 30 days (15 days for seasonal enterprises) during the last 365 days preceding the date of survey, were eligible for survey.

1.2.2 The survey covered the whole of the Indian Union except (i) Leh and Kargil districts of Jammu & Kashmir, (ii) interior village of Nagaland situated beyond five kilometres of bus route and (iii) villages of Andaman and Nicobar Islands which remain inaccessible throughout the year. All the sample villages/urban blocks of the districts

¹ Press Note, 31st May 2007, Central Statistical Organisation

Poonch and Rajouri of the state of Jammu and Kashmir became casualty. Thus, the estimates for Jammu and Kashmir as well as for all-India do not include these areas.

1.3 Survey design in brief

1.3.1 One salient feature of the sample design adopted during the 62nd round was the use of list frame, in addition to the usual area frame, which was done to capture sufficient number of relatively ‘bigger’ enterprises with a view to improving the overall estimate of gross value added per worker, total number of workers, total input, total output, etc. A list of 8,000 big non-ASI manufacturing enterprises² for the urban sector only was prepared as per the data of the census of manufacturing enterprises conducted by Development Commissioner of Small Scale Industries (DCSSI) in 2003. This list served as the list frame. All these units in the list frame were considered for survey without resorting to any sampling. For the coverage of all other enterprises in the universe, the usual area frame approach was followed for sampling of enterprises in stages. It is important to mention that this dual frame approach was experimented for the first time in the 62nd round. The effectiveness of using the list frame has been discussed under Chapter four.

1.3.2 In the area frame approach, the list of all the villages (*panchayat wards* in case of Kerala) / urban blocks of the country served as the sampling frame of first stage units (FSUs). Thus, the FSUs were villages (*panchayat wards* in case of Kerala) in the rural sector and urban blocks in the urban sector. The ultimate stage units were enterprises in both the sectors. However, in case of large FSUs requiring hamlet-group (hg) / sub-block (sb) formation, one intermediate stage in the sampling involved the selection of two hg’s / sb’s from each FSU out of a minimum of three hg’s/sb’s formed in the FSU. Of these two selected hg’s/sb’s, one was selected with probability ‘1’ (termed as segment 1) and another one (termed as segment 2) was selected from among the remaining hg’s/sb’s of the FSU at random. The hg/sb selected with certainty (i.e. segment 1) was the hg/sb having maximum number of directory manufacturing establishments (DMEs) (*or with maximum number of non-directory manufacturing establishments (NDMEs) if there was no DME, or with maximum number of own account manufacturing enterprises (OAMEs) if there was no DME/NDME, or with maximum population if there was no DME/NDME/OAME³ in the entire FSU*). Smaller FSUs without any hg/sb formation were identified/categorized as segment 1 for the purpose of survey (segment 2 does not exist for such FSUs). As regards the first stage stratification, two basic strata were formed within each district of a State/UT: rural stratum comprising all rural areas of the district and urban stratum consisting of all urban areas of the district. However, each city with a population of one million or more as per Census 2001 was invariably treated as a separate stratum by itself. For details of stratification, sub-stratification and selection of sample FSUs, reference may be made to **Appendix-B** of this Report.

1.3.3 For each of segments 1 and 2 for the selected sample FSUs, a frame of eligible enterprises was prepared by the field investigators by visiting each and every house/household within the selected geographical area. While doing so, if any enterprise

² For definition of such ‘big’ enterprises, refer to Appendix-B of this report.

³ See Chapter Two for definitions of DME, NDME and OAME.

of the list frame was encountered, care was taken not to list it again within segment 1 or 2 as a part of the area sample / area frame to guard against duplication of enterprises between the two types of frames. Listing and sampling of enterprises in the area frame was independent for each of segments 1 and 2. In this context, it may be mentioned that for each selected FSU of rural *sub-strata* 1 and 2 only⁴ (see Appendix B for composition of these two sub-strata), segment 9 was also carved out within the FSU, which comprised top 10 big non-ASI registered SSI enterprises (identified by jointly considering the number of workers in the enterprise and gross value of output of the enterprise) located within the boundaries of the entire FSU. The list of such units for selected FSUs was made available to the field investigators in order to facilitate formation of segment 9. Respective frames of segments 1 and 2 in these FSUs excluded the units listed under segment 9. The effectiveness of the formation of segment 9 has been discussed under Chapter four.

1.3.4 All the eligible enterprises listed under each of segments 1, 2 and 9 were stratified into 2 broad second-stage strata by enterprise type i.e. OAME & NDME/DME. Each of these two broad second-stage strata was further divided into 3 broad manufacturing groups (BMG) i.e. BMG 1, BMG 2 and BMG 3. BMG 1 comprised eligible enterprises belonging to NIC codes 15 and 20. BMG 2 consisted of eligible enterprises belonging to NIC Codes 23, 27, 30-35 and 01405 while all other eligible enterprises belonging to the rest of the NIC codes under coverage formed BMG 3. Thus within a segment for any given sample FSU, six ultimate second-stage strata were formed by jointly considering the broad second-stage strata and BMG. A total of 12 manufacturing enterprises – two from each ultimate second-stage stratum – were selected for detailed enquiry. In case of shortfall of enterprises in the frame of any particular second-stage stratum, compensation was made by selecting additional samples from other second-stage strata so that a total of 12 enterprises were selected from each FSU for detailed enquiry. Data from enterprises were collected from books of accounts if those were available. Otherwise, it was through oral enquiry.

1.3.5 Design-based estimates of aggregates for any selected survey characteristic were obtained separately for list frame and area frame. Finally these two sets of estimates were added to get the pooled aggregate estimate for the combined frame. In this report, discussion will be focused on the pooled estimate based on two types of frames used in the survey.

1.4 Sample size and its limitation

1.4.1 Out of 8,000 enterprises selected from the list frame, data could be collected from only 2,260 enterprises (for state/UT wise distribution of allotted and surveyed numbers of enterprises as per the list frame, reference may be made to Table 2 at the end of this chapter). Thus a large percentage (72%) of the list frame enterprises became casualties (see Chapter four for the reasons for casualties). In the area frame, 80,637 enterprises (42,050 from rural India and 38,587 from urban India) spread over 4,798 villages and

⁴ Rural sub-strata 1 and 2 consisted of villages having 'big' non-ASI registered SSI manufacturing units as per the DCSSI's census/survey in 2003.

5,125 urban blocks across the country were surveyed. It is important to mention here that even though a large percentage of list frame enterprises became casualty, theoretically the surveyed enterprises netted through the list frame and area frame represented the whole universe of the unorganised manufacturing sector. The estimation procedure developed for the purpose (see Appendix B) also ensured this. The sample sizes in terms of number of FSUs and enterprises are presented in Tables 1 and 2 respectively at the end of this chapter.

1.4.2 Thus, altogether a total of 82,897 unorganised manufacturing enterprises considering both list frame and area frame were surveyed. In the appendix tables, although estimates are presented at disaggregated level i.e. sector (rural/urban/combined) x enterprise type (OAME/NDME/DME/All) by NIC code (for all-India) or by state/UT, sample size at the ultimate level of disaggregating may sometimes be very small. The users of this report are advised to look at the related sample size while using the survey results particularly at the disaggregated level.

1.5 Major findings of the earlier two reports

1.5.1 Although the major findings on input, output and value added by the enterprises mainly form part of this report (Chapter three), major findings of the two recently released reports are summarized below in this section in order to facilitate appreciation of the material presented here and also make the report self-contained, The findings pertaining to all-India estimates only are discussed. For state level findings, the readers may refer to the respective main reports (Numbers 524 and 525).

1.5.2 During 2005-06, an estimated 17 million unorganised manufacturing enterprises (henceforth referred to as enterprises) were in operation at all-India level of which 71% were located in rural areas. A large majority (86%) of the enterprises were OAMEs and the remaining were establishments.

1.5.3 About 98 % of the enterprises were proprietary in nature. Majority (90%) of the enterprises were not registered with any agency. Nearly 3 % of the enterprises operated without any fixed premises.

1.5.4 A large majority (94%) of the enterprises were perennial enterprises. About 81% of all enterprises operated for more than 9 months during the reference year. As high as 92 % of the enterprises did not receive any assistance from government or non-government agency for operation of the enterprises.

1.5.5 Nearly 36.4 million workers were engaged in the unorganised manufacturing activity. In other words, each enterprise roughly engaged about 2.13 workers on an average.

1.5.6 About 38% of total workers were females. Further, 39% of all working owners were females.

1.5.7 Hired workers constituted 24% of total workers. About 82% of total workers were full-time workers i.e. they worked for more than half of the period of normal working hours of the enterprise on a fairly regular basis.

1.5.8 On an average, each enterprise possessed fixed assets worth Rs.83,780 of which value of owned assets was Rs.58,166. Land and building had the dominant share in total value of fixed assets – its share being 70% for owned assets and 98% for hired assets.

1.5.9 Per enterprise value of outstanding loan was Rs.12,548. Central and state level term lending institutions, banks and other societies had the highest percentage share (49%) in the total amount of loan made available to enterprises.

1.6 Layout of the present report

1.6.1 This report contains four Chapters (including the present introductory one), and three Appendices. Chapter two deals with the concepts and definitions of various terms used in the survey on unorganised manufacturing enterprises. Chapter three discusses the main findings of the survey – primarily on input, output and value added – based on the data collected through central sample i.e. data collected by the field staff of NSSO. Chapter four discusses the limitations of the survey and also gives certain suggestions for future surveys based on the experiences gathered. As part of the limitations, effectiveness of (a) using the list frame and (b) formation segment 9 is discussed. Further, discussions are also done on distribution of surveyed enterprises by type of response (i.e. informant: cooperative and capable, cooperative but not capable, busy, reluctant, etc) and by time taken to canvass the schedule. Detailed tables are presented in Appendix A. The sample design and estimation procedure is given in Appendix B while facsimile of the schedule of enquiry is given in **Appendix C**.

**Table 0: Description of manufacturing activities under the survey coverage of NSS
62nd round**

Division	Description
01405	Cotton ginning, cleaning and baling
15	Manufacture of Food Products and Beverages
16	Manufacture of Tobacco Products
17	Manufacture of Textiles
18	Manufacture of Wearing Apparel; Dressing and Dyeing of Fur
19	Tanning and Dressing of Leather; Manufacture of Luggage, Handbags, Saddlery, Harness and Footwear
20	Manufacture of Wood and of Products of Wood and Cork, Except Furniture; Manufacture of Articles of Straw and Plating Materials
21	Manufacture of Paper and Paper Products
22	Publishing, Printing and Reproduction of Recorded Media
23	Manufacture of Coke, Refined Petroleum Products and Nuclear Fuel
24	Manufacture of Chemicals and Chemical Products
25	Manufacture of Rubber and Plastics Products
26	Manufacture of Other Non-Metallic Mineral Products
27	Manufacture of Basic Metals
28	Manufacture of Fabricated Metal Products, Except Machinery and Equipment
29	Manufacture of Machinery and Equipment Not Elsewhere Classified.
30	Manufacture of Office, Accounting and Computing Machinery
31	Manufacture of Electrical Machinery and Apparatus Not Elsewhere Classified.
32	Manufacture of Radio, Television and Communication Equipment and Apparatus
33	Manufacture of Medical, Precision and Optical Instruments, Watches and Clocks
34	Manufacture of Motor Vehicles, Trailers and Semi-Trailers
35	Manufacture of Other Transport Equipment
36	Manufacture of Furniture; Manufacturing Not Elsewhere Classified.
37	Recycling

Chapter Two

Concepts and Definitions

2.1 Enterprise: An enterprise is an undertaking engaged in the production and / or distribution of some goods and / or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly on a partnership basis, or by an institutional body.

2.2 Manufacturing Enterprise: A manufacturing enterprise is a unit engaged in the physical or chemical transformation of materials, substances or components into new products. It covers units working for other concerns on materials supplied by them. Also included are units primarily engaged in maintenance and repair of industrial, commercial and similar machinery & equipment, which are, in general, classified in the same class of manufacturing as those specialising in manufacturing the goods.

2.3 Unorganised Manufacturing Enterprise: The unorganised manufacturing sector for the present survey consists of following types of enterprises:

- (i) All manufacturing enterprises except those registered under section 2m(i) and 2m(ii) of Factories Act, 1948 and Bidi and Cigar Workers (conditions of employment) Act, 1966.
- (ii) All manufacturing enterprises except those run by Government (Central Government, State Governments, Local Bodies) / Public Sector Enterprises.

2.4 Household Enterprise: A household enterprise is one which is run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the enterprise is located in the premises of the household(s) or not. In other words, all proprietary and partnership enterprises are household enterprises.

2.5 Non-household Enterprise: Non-household enterprises are those which are institutional i.e. owned and run by the public sector (Central or State Government, local self-governments, local bodies, government undertakings, etc.), corporate sector, co-operative societies, other type of societies, institutions, associations, trusts, etc. Non-household enterprises covered under public sector were not included in the current survey.

2.6 Own-account Enterprise: An enterprise, which is run without any hired worker employed on a fairly regular basis⁵, is termed as an own account enterprise. If such an enterprise is engaged in manufacturing and/or repairing activities, it is termed as Own Account Manufacturing Enterprise (OAME).

2.7 Establishment: An enterprise which is **employing at least one hired worker** on a fairly regular basis is termed as establishment. Paid or unpaid apprentices, paid household

⁵ "fairly regular basis" means the major part of the period when operation(s) of an enterprise are carried out during a reference period.

member/servant/resident worker in an enterprise are considered hired workers. Establishments have further been categorised into two types: non-directory and directory.

2.8 Non-directory Establishment: An establishment employing less than six workers (household and hired workers taken together) is termed non-directory establishment. If such an establishment is engaged in manufacturing activities, it is termed Non-Directory Manufacturing Establishment (NDME).

2.9 Directory Establishment: A directory establishment is one which has employed six or more workers (household and hired workers taken together). If such an establishment is engaged in manufacturing activities, it is termed Directory Manufacturing Establishment (DME).

2.10 Perennial Enterprise: Enterprises, which usually operate more or less regularly throughout the year, are called perennial enterprises.

2.11 Seasonal Enterprise: Seasonal enterprises are those which are usually run during a particular season or fixed months of a year.

2.12 Casual Enterprise: Casual enterprises are those which operate occasionally (may be disjoint periods of time throughout the year) but total number of days operated in the last 365 days is 30 days or more.

2.13 Reference Period: The reference period for recording details of various items depended primarily on whether the enterprise under survey could provide information from their books of accounts, or they could provide information orally.

Case 1: Enterprises that provided information by recollection

2.13.1 Here, three kinds of reference periods were used to collect data in different blocks of the schedule viz. *reference month*, *reference year* and *last date of the reference month*.

2.13.2 **Reference Month:** This reference period was used to collect data on various receipts and expenses as well as value added, employment, emoluments, rent and interest payments for the enterprises providing oral information.

For perennial and casual enterprises, 'Reference Month' referred to the last 30 days (preceding the date of survey) *irrespective of the number of days of operation*.

For seasonal enterprises, consider the following two cases-

- **Case 1: Working continuously for 30 days or more (including scheduled holidays) in the current season:** - '*Reference Month*' referred to the last 30 days (preceding the date of survey).
- **Case 2: Worked for less than 30 days in the current season:** - '*Reference Month*' referred to an average month in the last working season.

If an enterprise were unable to provide information for the last 30 days, but could provide it for the latest completed calendar month, this calendar month was considered as '*Reference Month*'.

2.13.3 '*Reference Year*': For items like net additions to fixed assets owned, number of months operated, number of other economic activities pursued etc., data were collected for the entire '*Reference Year*'. It was last 365 days preceding the date of survey, if 'reference month' of that enterprise was 'last 30 days'. For the enterprises where 'reference month' was 'last calendar month', 'reference year' was last 12 calendar months taken together. For seasonal enterprises of case 2 above (i.e., seasonal enterprises which had operated for less than 30 days during the current season), '*Reference Year*' was a continuous period of 365 days starting from the first day of the corresponding working season.

2.13.4 '*Last date of the reference month*': For some of the items like value of fixed assets, amount of loan outstanding, etc., the reference period used was as follows:

It was last date of the '*Reference Month*', which was the same as the last date of the '*Reference Year*'. However, opening stock of semi-finished goods manufactured, opening stock of goods traded were collected for the beginning of the first day of the '*Reference Month*'.

Case 2: Enterprises provided data from their books of accounts

2.13.5 In this case, two kinds of reference periods were used to collect data in different blocks of the schedule, '*Reference Year*' and '*last date of the reference year*'.

2.13.6 *Reference Year*: This was the last completed accounting year of the enterprise under survey. Various receipts, expenses, value added as well as employment, emoluments, rent, interest, net additions to fixed assets owned, for the enterprises were recorded for the last completed accounting year.

2.13.7 '*as on first/ last date of reference year*': For some of the items like value of fixed assets, amount of loan outstanding, etc., this reference period was used. It was last date of the '*Reference Year*'. For items like opening stock of semi-finished goods manufactured, opening stock of goods traded, the beginning of the first date of the reference year was the point of reference

2.14 **Worker**: A worker is defined as one who participates either full time or part time in the activity of the enterprise. The worker may serve the enterprise in any capacity - primary or supervisory. He/she may or may not receive wages / salaries in return to his / her work incidental to or connected with the enterprise activity. A worker need not mean that the same person is working continuously; it only refers to a position. Persons working for less than or equal to half of the normal working hours of the enterprise on a fairly regular basis are considered as part time workers. Full time workers are those who work for more than half of the period of normal working hours of the enterprise on a fairly regular basis. Two part-time workers in an enterprise are counted as 2 and not 1.

2.15 Working Owner: The owner who personally works in the proprietary or partnership enterprises on a fairly regular basis is called working owner. In fact, in most of the own-account enterprises the owner himself/ herself manages all activities of the enterprise without the help of anyone (on a fairly regular basis). In the case of partnership enterprises, if only one partner or some of the partners or all the partners work in the enterprise on a fairly regular basis then they are considered as ‘working owners’.

2.16 Hired Worker: A hired worker is a person employed directly or through any agency on payment of regular wage / salary in cash or kind. Apprentices, paid or unpaid, are to be treated as hired workers. Paid household workers, servants and resident workers of the enterprise are also to be considered as hired workers.

2.17 Other Worker / Helper: This includes all persons belonging to the household of the proprietor or households of the partners who are working in or for the enterprise without regular salary or wages. Persons working as exchange labourer in the enterprise without salary or wages will also be covered in this category. All unpaid household workers / helpers who are associated with the activities of the enterprise during the reference month are considered in this category.

2.18 Mixed Activity: There are enterprises that carry out a number of activities simultaneously. For example, a bakery may also sell cold drinks, a rice mill may sell sugar, a factory may run a hospital in its premises, etc. Each such activity was treated as a separate enterprise if information for them was separately available. If the accounts were not separable then the data pertained to the enterprise as a whole and the enterprise was classified as having mixed activities and the activities of such enterprises are a mixture of NIC’s. The activities may be mixed at any level of NIC, but for the present survey an enterprise was considered to have mixed activities if its activities were different at 2-digit level of NIC-2004. The appropriate NIC in such cases was determined on the basis of **major** activity. Major activity refers to the activity which yielded maximum income/turnover/employment. The above criteria were applied in the given order, i.e., income first, then turnover and then employment, to determine the major activity.

2.19 Multiple Activity: Since many of the entrepreneurs belonging to the unorganised sector operate at small or marginal levels, the phenomenon of carrying out more than one activity simultaneously or at different points of time is quite prevalent. If the activities were carried out at one point of time at the same location and the information was not separately available, then it was taken as “mixed activity”. Carrying out of more than one economic activity by the entrepreneur during the reference year is called multiple activities. *It differs from mixed activities in the sense that former is with respect to the entrepreneur whereas the latter is with respect to the enterprise.* However, an entrepreneur of a manufacturing enterprise manufacturing woollen garments before winter and cotton clothes before summer will not be considered as carrying out multiple activities. Some examples of multiple activities are: i) a person carrying out agricultural activity at sowing / harvesting season and doing carpentry at the same time or at other times, ii) a lady working as regular wage / salary earner and also running a tailoring shop

in the evening, etc iii) A household servant is making paper envelopes in free time, iv) An agricultural worker engaged in handicraft making during non-harvesting season of the year.

2.20 Working on Contract: The enterprises in the unorganised sector are mainly small units. In many cases, the enterprises are seen to be working as per orders from a bigger unit. In such cases, certain conditions are put on the servicing unit by the contractor or master unit. Conditions may pertain to sale of products, supply of raw materials, mode of payment etc. In many cases, the contractor specifies the design of the product to the servicing unit e.g. garment manufacturing, shoe manufacturing etc. If the surveyed enterprise had undertaken any work on contract during the reference year, it was considered as 'enterprises working on contract'.

2.21 Fixed Assets: Assets held for the purpose of producing or providing goods or services and not for resale in the normal course of entrepreneurial activities are classified as fixed assets. These cover all goods, new or used, that have a normal economic life of more than one year from the date of purchase.

2.22 Land and Building: **Land** means the land on which the enterprise is accommodated together with the surrounding area, which is used for the enterprise. This also includes improvement to land. However, if only a portion of the land belonging to the residence of a household is utilised for the enterprise, only that portion of the land is considered as capital assets for the enterprise. Land owned with permanent heritable possession with or without right to transfer the title comes under this category. Land held on long-term lease, say, 30 years or more, is also treated as land owned. **Building** is the structure, where activities of the enterprise are undertaken. This also includes all other structures like shed, house, portions of a house or other structure, building under construction and other conveniences in which the activities of the enterprise are carried out. This also includes other constructions such as passage, wall, water tank, sewerage, tube-well, etc.

2.23 Plant and Machinery: Plant generally means an assembly of machinery / equipment / devices installed for the operation of entrepreneurial activities. Machinery means an implement or mechanical device used in the entrepreneurial activities. These are assets of durable nature and can be easily identified.

2.24 Transport Equipment: All vehicles, power-driven or man / animal-driven, used for transporting persons, goods and materials by the enterprise in connection with its activity are covered in this category. Animals, if used for drawing vehicles or carrying loads, will be treated as part of transport equipment.

2.25 Tools and Other Fixed Assets: Tools refer to small loose implements, generally held in hand for operation and having normal life of more than one year. Other fixed assets refer to other durable equipment which are used for the entrepreneurial activity either directly or indirectly. These include furniture, fixtures, laboratory equipment, office equipment etc. Livestock used in oil-mill is also covered under this category.

2.26 Net additions to fixed assets during the last 365 days: Net addition to fixed assets was obtained by subtracting depletion of assets from the additions made during the last 365 days. Addition to the fixed assets could be made through purchase (new or used) or through own construction. Improvements on land, new construction of building, shed, structure, as well as assets produced on own account during the last 365 days were considered as additions to the fixed assets. Depletion of assets was obtained by considering the assets sold and discarded during the last 365 days. The value of assets disposed of in any manner other than sale, were treated as value of assets discarded. Besides obsolescence (gone out of use) of an asset, this included loss due to theft, damage, accident etc.

2.27 Loan: Any borrowing in cash or kind to be repaid in cash or kind is treated as loan. Loans taken for the purpose of utilising the same in the entrepreneurial activities of an enterprise were considered even if such loans were used for other purposes. On the other hand, loans taken for other purposes but ultimately used in the enterprise were excluded.

2.28 Operating Expenses: The total of values of raw materials, electricity, fuel, lubricants and auxiliary materials consumed; cost of maintenance, services purchased and other expenses incurred during the reference period by an enterprise was considered as 'operating expenses'.

2.29 Receipts: The sale value of products and by-products manufactured by an enterprise together with the value of services rendered to other concerns and other receipts incidental to entrepreneurial activities are considered as 'total receipts'.

2.30 Gross Value Added: Gross value added is taken as additional value created by the process of production of an enterprise to the economy. Gross value added is calculated by deducting 'total operating expenses' from the total value of 'total receipts' during the reference period.

2.31 ASICC code: ASICC stands for "A Standard Industrial Commodity Classification". It had been developed first by the Industrial Statistics wing of the Central Statistical Organisation with the primary objective of having a uniform non industry specific input / output coding structure. The National Sample Survey Organisation had adopted this for use in the 56th round as well as in the current 62nd round survey on unorganised manufacturing enterprises. Unlike the ASICC code used by CSO, the ASICC code used by National Sample Survey Organisation does not have any specific unit of quantity associated with the codes. However, tables giving ASICC code-wise (at two-digit level) break-up of input and output had been generated mainly to cater to the requirements of National Accounts Division (NAD) of Central Statistical Organisation (CSO) and are not included in the report in view of the size of these tables. However, soft copy may be made available to all users as per the policy of the government.

Chapter Three

Summary of findings

3.1 General

3.1.1 As already mentioned in Chapter one, two reports – the first one dealing with operational characteristics of the enterprises and the second one discussing employment, assets and borrowings of the enterprises – have already been brought out. The present report, the third and last in the series, focuses mainly on input, output and gross value added during 2005-06 by the enterprises in the unorganised manufacturing sector in India.

3.1.2 A few important characteristics as estimated based on this round (62nd round: 2005-06) as well as the preceding two rounds i.e. 56th (2000-01) & 51st (1994-95) have also been presented in this report to show the extent of change over the different survey periods. Although the coverage of manufacturing and repairing enterprises differed to some extent in the three rounds (see **Annex-1** at the end of this chapter for the differences), they may not bring any serious distortion in comparing estimates of rates and proportions presented in this report.

3.2 Distribution of enterprises by number of workers in the enterprise

3.2.1 In the second report (Report Number 525), distribution of total number of workers engaged in unorganized manufacturing activity by state/UT, enterprise type (OAME/NDME/DME), NIC code, etc. have been presented. But distribution of enterprises (henceforth the term ‘enterprise’ would mean unorganized manufacturing enterprise unless otherwise mentioned) by number of workers in the enterprise has not been discussed.

3.2.2 Although each enterprise engaged about 2 workers on an average, a study of the distribution of all enterprises by number of workers engaged by them (**Table 1** of Appendix A) reveal that the enterprises varied substantially in size in terms of number of workers employed by them. Nearly 22% of the enterprises operated with the help of 1 worker alone. Around 31% of the enterprises engaged two workers each. As against these, about 1.6% of the enterprises engaged 50 or more number of workers each. Another 2.6% of the enterprises engaged 20 to 49 workers per enterprise. The percentage of enterprises engaging such large number of workers was highest for DMEs as compared to NDMEs and OAMEs. This is quite expected. The relative positions for DMEs, NDMEs and OAMEs are summarized in **Statement 1** below.

3.2.3 Ideally speaking, all the manufacturing enterprises which engage at least 20 workers are supposed to be under the coverage of Factories Act 1948 and hence under the coverage of ASI (i.e. organized manufacturing sector). But, as stated above, NSS 62nd round survey revealed that enterprises having at least 20 workers constitute 4.2% of the total number of the estimated enterprises and number about 7.17 lakh estimated enterprises which is more than three times the number of factories under ASI coverage. This is rather surprising.

Statement 1: Per thousand distribution of enterprises by number of workers in the enterprise for each enterprise type.

enterprise type	total no. of enterprises	per thousand distribution of all enterprises by number of workers in the enterprise				
		1-9	10-19	20-49	> = 50	All
(1)	(2)	(3)	(4)	(5)	(6)	(7)

See Appendix Table 1

3.3 Operating expenses and receipts

3.3.1 **Table 2 of Appendix A** presents in detail annual value of key characteristics, including those of operating expenses and receipts, per enterprise by NIC code x enterprise type and also by state/UT x enterprise type, separately for OAMEs, NDMEs, DMEs and all enterprise types taken together. **Statement 2** below summarizes the estimates of operating expenses and receipts per enterprise by NIC code separately for rural, urban and combined sector. It may be mentioned that operating expenses include value of raw materials/electricity/fuel consumed, cost of maintenance, services purchased and other expenses incurred during the reference period. Receipts include sale value of products/by-products manufactured, value of services rendered to other concerns, and other receipts incidental to entrepreneurial activities.

3.3.2 At all-India level, the estimated annual value of operating expenses and receipts per enterprise was about Rs.1, 85,000 and Rs.2, 37,000 respectively. Operating expenses and receipts per enterprise was much lower for rural areas in comparison to urban areas. For rural areas the estimated annual value of operating expenses and receipts per enterprise was Rs.55, 000 and Rs.87, 000 respectively. The same for urban areas was Rs.5, 03,000 and Rs.6, 07,000 respectively.

3.3.3 There were wide variations in the average value of operating expenses and receipts per enterprise over industry divisions/NIC codes. The average values were

significantly higher for NIC Div.30 (Manufacture of Office, Accounting and Computing Machinery), 28 (Manufacture of Fabricated Metal Products, Except Machinery and Equipment), 27 (Manufacture of Basic Metals), 32 (Manufacture of Radio, Television and Communication Equipment and Apparatus), and 25 (Manufacture of Rubber and Plastics Products).

Statement 2: Estimated annual value of operating expenses and receipts per enterprise (in Rs. '000) in different industry groups

NIC 20004 Code	estimated annual value per enterprise (in Rs. '000)					
	Rural		urban		all-India

For description of industries please see Table 0 at page 6
See Appendix Table 2 for more detail

3.4 Share of various items in total operating expenses and total receipts

3.4.1 It would be useful to know the percentage shares of various individual items in total operating expenses and total receipts. Details are available in Tables 3 and 4. The share of raw materials consumed in total operating expenses along with the share of products and by-products manufactured (including change in stock of semi-finished goods) in the total receipts are presented in **Statement 3** for different industries. Raw

materials consumed and products and by-products manufactured had the most dominant share in total operating expenses and total receipts respectively for almost all industries. The percentage shares for the same at all-India level were about 85% and 80% respectively.

Statement 3: Percent share of raw materials consumed in operating expenses and percent share of products and by-products manufactured* in total receipts for different industry groups

NIC 2004 code	(% share of					
	rural		urban		all-India	
	Raw materials consumed to operating expenses	products and by products manufactured to total receipts	raw materials consumed to operating expenses	products and by products manufactured to total receipts	raw materials consumed to operating expenses	products and by products manufactured to total receipts

All	72.8	73.2	88.1	82.8	84.9	80.3

For description of industries please see Table 0 at page 6
See Appendix Tables 3 & 4 for more detail

3.4.2 For rural enterprises (other than enterprises belonging to NIC Div. 30 where sample size was only 1), the share of raw materials in operating expenses was the highest (96%) in 'publishing, printing and reproduction of recorded Media' (NIC Div. 22) and was the lowest (37%) for 'manufacture of other non-metallic mineral products' (NIC Div. 26). For urban enterprises, the same was the highest (95%) for the industry 'manufacture of fabricated metal products, except machinery and equipment' (NIC Div. 28) and the lowest (61%) for 'manufacture of tobacco products' (NIC Div. 16). For rural enterprises, the share of products and by-products manufactured in total receipts was the highest (98%) for the industry 'manufacture of coke, refined petroleum products and nuclear

fuel' (NIC Div. 23) and the lowest (7%) for 'manufacture of wearing apparel; dressing and dyeing of fur' (NIC Div. 18) . For urban enterprises, the same was the highest (98%) for 'manufacture of coke, refined petroleum products and nuclear fuel' (NIC Div. 23) and the lowest (33%) for 'manufacture of wearing apparel; dressing and dyeing of fur' (NIC Div. 18).

3.4.3 **Statement 4** gives the percentage shares of various items in total operating expenses of enterprises separately for rural, urban and combined sector. As already mentioned, 'raw materials consumed' had the most dominant share in total operating expenses – its percentage share being 73% for rural India, 88% for urban India, and 85% for India. Considering both rural and urban India together, it is seen that apart from raw materials (85% share in operating expenses), the second major expenditure was incurred on service charges for work done by others (4.1%) followed by fuel and lubricant (2.6%), trading and other activities (2.1%), electricity (1.9%), consumable stores, packing materials (1.3%) and so on. In rural enterprises, the second highest expenditure was on fuel and lubricant (9.6%) followed by expenses on trading and other activities (3.3%), electricity (3.2%), travelling, freight and transport charges (2.6%), service charges for work done by others (2.8%) etc. For urban enterprises the second highest expenditure was on service charges for work done by others (4.4%) followed by trading and other activities (1.8%), electricity (1.6%), consumable stores, packing materials (1.1%) and travelling, freight and transport charges (0.8%).

Statement 4: Percent share of different items of expenditure in operating expenses

Item of expenditure (1)	share in operating expenses (%)		
	rural (2)	urban (3)	all-India (4)
Raw materials consumed	72.8	88.1	84.8
trading and other activities	3.3	1.8	2.1
Electricity	3.2	1.5	1.9
Fuel and lubricant	9.6	0.7	2.6
cost of own construction	0.1	0.0	0.0
minor repair and maintenance	1.9	0.5	0.8
Rent payable on fixed assets (other than land and building)	0.1	0.1	0.1
service charge for work done by others	2.8	4.4	4.1
travelling, freight and transport charges	2.6	0.8	1.2
Communication	0.3	0.4	0.4
consumable stores, packing materials, etc.	2.2	1.0	1.3
Paper, printing and stationary	0.2	0.1	0.1
Others	0.9	0.4	0.5
Total	100.0	100.0	100.0

See Appendix Table 3 for more detail

3.4.4 Percentage shares of items of gross receipt of enterprises separately for rural, urban and combined sector is presented in **Statement 5**. As expected, for each sector, ‘products and by-products manufactured’ had the most dominant share in gross receipts. At the all-India level, rural and urban areas taken together, apart from ‘products and by-products manufactured (80% share)’ other major components of receipts were ‘receipts from services provided to others (15% share)’ followed by ‘change in stock of semi-finished goods (2.2% share)’ and ‘receipts from trading and other services (2.1% share)’. For rural areas the second highest receipt was from ‘receipts from services provided to others (about 22% share)’ followed by ‘receipts from trading and other activities (nearly 3% share)’, and ‘change in stock of semi-finished goods (1% share)’. Among urban enterprises, the second highest receipt was from ‘receipts from services provided to others (12% share)’ followed by ‘change in stock of semi-finished goods (2% share)’, and ‘receipts from trading and other activities (2% share)’.

Statement 5: Percent share of different items of receipt in gross receipt

item of receipt	(% share in gross receipt)		
	rural	urban	all-India
(1)	(2)	(3)	(4)
products and by-products manufactured	73.2	82.8	80.4
Change in stock of semi finished goods	0.9	2.6	2.2
receipts from trading and other activities	2.6	1.9	2.1
receipts from services provided to others	22.3	12.2	14.8
Market value of own construction	0.1	0.0	0.0
consumption of goods for own use	0.4	0.0	0.1
rent receivable from fixed assets	0.0	0.0	0.0
funding/donations received	0.0	0.0	0.0
other receipts	0.4	0.4	0.4
Total	100.0	100.0	100.0

See Appendix Table 4 for more detail

3.5 Aggregate gross value added (GVA)

3.5.1 **Table 5** gives estimates of annual gross value added (GVA) per enterprise by NIC code x enterprise type and also by state/UT x enterprise type. **Statement 1** gives the estimated number of enterprises categorised by enterprises types. Utilising the above information, estimates of aggregate annual GVA have been derived and aggregate gross value added (Rs. in lakhs) by enterprise type and sector is shown in **Statement 6**. Aggregates shown against the last row may differ from the total of value figures shown against each enterprise type for each sector due to rounding. Aggregate annual gross value added by enterprises was estimated as Rs. 87,58,569 lakhs out of which rural India and urban India had shares of 43% and 57% respectively (vide **Chart 4**).

Statement 6: Aggregate gross value added (Rs. in lakhs) by enterprise type and sector during 2005-06.

enterprise type	aggregate gross value added(Rs. in lakhs)		
	rural	urban	all-India
(1)	(2)	(3)	(4)
OAME	1882484	923563	2806117
NDME	641498	1470484	2111982
DME	1278808	2561701	3840514
All	3802818	4955751	8758569

See Appendix Table 5 for more detail

3.5.2 **Chart 1** and **Chart 2** show the percentage distribution of annual GVA by enterprise type separately for rural and urban areas respectively. Share of OAMEs in aggregate GVA was much higher in rural areas (49%) than for urban areas (18%). Major contribution (nearly half) to GVA had come from OAMEs (49%) in rural areas and from DMEs (52%) in urban areas. At all-India level, DMEs contributed 44% to aggregate GVA as revealed in **Chart 3**.

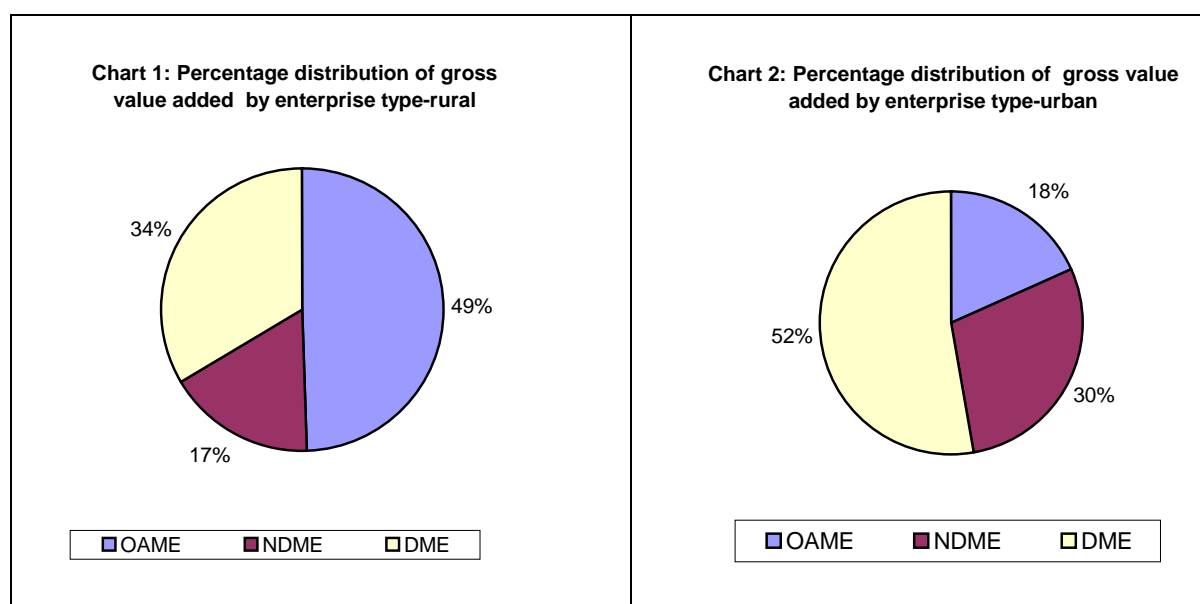

Chart 3: Percentage distribution of gross value added by enterprise type:all-India

Chart 4: Percentage distribution of gross value added by sector

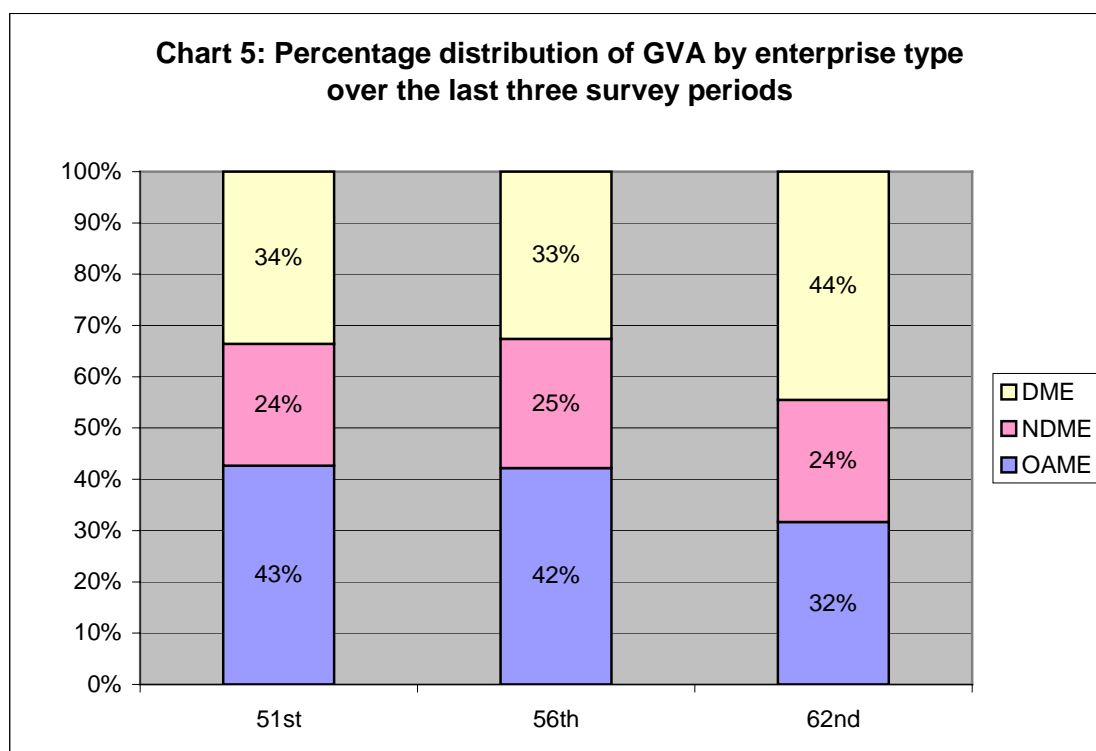

3.5.3 **Statement 7** gives aggregate GVA (in rupees crores) categorised by enterprise type for the last three survey periods. It is seen that aggregate GVAs were roughly Rs. 32,275 crores, Rs. 60,192 crores & Rs. 87586 crores at current prices during 1994-95, 2000-01 & 2005-06 respectively.

Statement 7: Aggregate gross value added (Rs. in crores) by enterprise type during the last three survey periods.

enterprise type	aggregate gross value added(Rs. in crores)		
	51 st round (1994-95)	56 th round (2000-01)	62 nd round (2005-06)
(1)	(2)	(3)	(4)
OAME	13782	25448	28061
NDME	7658	15060	21120
DME	10834	19684	38405
All	32275	60192	87586

Source: NSS Report No. 433, NSS Report No. 480, and Statement 6

3.5.4 **Chart 5** gives the percentage distribution of GVA by enterprise type for the last three survey periods. It may be seen that though share of OAMEs in total GVA had remained nearly the same during 1994-95 (43%) and 2000-01 (42%), it declined to 32% in 2005-06. Contribution of NDMEs had remained around 24% in the three survey periods. However, contribution of DMEs had increased from 33% in 2000-01 to 44% in 2005-06.

Source: NSS Report No. 433, NSS Report No. 480, and Statement 6

3.5.5 **Statement 8** gives state-wise aggregate annual GVA in descending order for the last three survey periods. It is seen that Maharashtra had the highest GVA during both 2005-06 and 2000-01 but had the second highest GVA in 1994-95. In general, Maharashtra, Uttar Pradesh, West Bengal, Tamil Nadu, and Gujarat were the top five states in terms of aggregate GVA in all the three survey periods though not in the same sequence.

Statement 8: State-wise aggregate gross value added (GVA) in descending order for the last three survey periods					
51st round (1994-95)		56th round (2000-01)		62nd round (2005-06)

Source: NSS Report No. 433, NSS Report No. 480, and Appendix Table 6

3.6 GVA per enterprise and per worker

3.6.1 Estimates of annual GVA per enterprise and per worker, by NIC code x enterprise type as well as by state/UT x enterprise type, are presented in appendix tables 5 and 8 respectively.

3.6.2 **Variation by enterprise type (all-India): Statement 10** gives the estimated annual gross value added (GVA) per enterprise and GVA per worker categorised by type of enterprise separately for rural, urban and combined sector. As expected, both GVA per enterprise and GVA per worker were seen to be the highest for DME followed by NDME and OAME for all sectors. At all-India level, annual GVA per enterprise in unorganised manufacturing sector was estimated to be Rs.51, 307. For rural India, annual GVA per enterprise for OAMEs, NDMEs and DMEs was estimated as Rs.16,946, Rs.86,076 and Rs. 466,247 respectively. The corresponding estimates for urban areas were Rs.26,356, Rs.143,460 and Rs. 644,734 respectively. Similarly the annual GVA per worker in unorganised manufacturing sector for rural and urban areas combined was estimated to be Rs.24, 034. Annual GVA per worker for OAMEs, NDMEs and DMEs was estimated as Rs.10,446, Rs.26,909 and Rs.41,887 respectively for rural areas. The corresponding estimates for urban areas were Rs.16,300, Rs. 43,308 and Rs.65,298 for OAMEs, NDMEs and DMEs respectively.

Statement 10: GVA per enterprise and per worker categorised by enterprise type and sector during 2005-06.

enterprise type	rural		urban		all-India	
	GVA per enterprise (Rs.)	GVA per worker (Rs.)	GVA per enterprise (Rs.)	GVA per worker (Rs.)	GVA per enterprise (Rs.)	GVA per worker (Rs.)
(1)	(2)	(3)	(4)	(5)	(6)	(7)
OAME	16,946	10,446	26,356	16,300	19,203	11,846
NDME	86,076	26,909	143,460	43,308	119,302	36,543
DME	466,247	41,887	619,734	65,298	558,513	55,052
All	31,355	16,211	100,267	38,167	51,307	24,034

See Appendix Tables 5 & 8 for more detail.

3.6.3 **GVA per enterprise type by NIC code (all-India):** Statement 11 gives industry-wise estimated annual GVA per enterprise (in Rs.'000). It is seen that 'manufacture of office, accounting and computing machinery (NIC code 30)' had the highest GVA per enterprise. This was followed by manufacture of radio, television and communication equipment and apparatus (NIC code 32), manufacture of motor vehicles, trailers and semi-trailers (NIC code 34), and manufacture of basic metals (NIC code 27). 'Manufacture of tobacco products (NIC code 16)' had the lowest GVA per enterprise. Barring a few industries GVA per enterprise was higher in urban areas than rural areas. However, for industries 'manufacture of coke, refined petroleum products and nuclear fuel (NIC code 23)', 'manufacture of radio, television and communication equipment and apparatus (NIC code 32)' and 'recycling (NIC code 37)', GVA per enterprise in rural areas was found to be higher than corresponding estimates for urban areas.

Statement 11: Estimated annual gross value added per enterprise (in Rs. '000) in different industries

For description of industries please see Table 0 at page 6

See Appendix Table 5 for more detail

3.6.4 **State level estimates of GVA per enterprise: Statement 12** gives state/UT-wise estimates of annual GVA per enterprise (Rs.) by type of enterprise ('OAMEs', 'NDMEs', 'DMEs') for rural, urban and combined sector. As expected, estimated annual GVA per enterprise for each state was maximum for DME followed by NDME and OAME for all sectors. At all-India level, GVA per enterprise for OAME, NDME and DME were Rs.19,000, Rs. 119,000 & Rs.559,000 respectively. For rural India, GVA per enterprise for OAME, NDME and DME were Rs. 17,000, Rs. 86,000 & Rs. 466,000 respectively and the corresponding figures for urban India were Rs. 26,000, Rs. 143,000 and Rs. 620,000 respectively.

Statement 12: Estimated annual gross value added per enterprise (in Rs. '000) in different State / UTs

See Appendix Table 5 for more detail

3.6.5 GVA per enterprise by location of enterprise: Table 7 presents annual GVA per enterprise by location of enterprise for each NIC 2-digit code (all-India only) and for each state/UT. The different types of locations listed were: within household premises; outside household premises – with fixed premises and: with permanent structure, with temporary structure, without any structure; mobile market; and without fixed premises. If we look at estimates for all enterprises taken together of rural and urban India (see last page of the table), it is seen that the average annual GVA per enterprise was highest (Rs. 155,383) for enterprises located outside household premises but having permanent structure. It was lowest (Rs. 20, 525) for those enterprises, which had been operating from within the household premises.

3.6.6 GVA per worker – All enterprises vs. unincorporated ones: Table 8 gives in detail estimated annual GVA per worker by (a) NIC code x enterprise type for all-India and (b) state/UT x enterprise type. Average annual GVA per worker (GVAPW) was Rs. 24,034 considering all enterprises taken together. But there are wide variations in this average value over NIC codes and across different states/UTs of the country. Average GVA per worker (annual) was minimum (Rs. 6,818) for NIC code 16 (manufacture of tobacco products) and maximum (Rs. 103,511) for NIC code 27 (manufacture of basic metals). As regards the corresponding state/UT level estimates, average annual GVAPW was minimum for Orissa (Rs. 9,638) and maximum for Arunachal Pradesh (Rs. 121,799).

3.6.6 It may be of interest to know the average GVA per worker for ‘unincorporated’ (proprietary and partnership) enterprises for which database in the existing statistical system is weak. Separate estimates for such enterprises may be required for national accounting purposes (calculation of GDP, etc) since the aggregate GVA for the corporate sector is likely to be available through separate sources. Tables 9 and 10 give annual estimates of key characteristics, including GVA, per enterprise and per worker for the unincorporated enterprises.

3.6.7 **Statement 13** presents the same vis-à-vis the GVA per worker for all enterprises taken together (i.e. both incorporated and unincorporated/other enterprises under coverage). For all industries combined, there is not much of a difference in the average GVA per worker by unincorporated enterprises and all enterprises apparently because of the fact that a vast majority of all the enterprises are in fact unincorporated ones.

Statement 13: Annual GVA per worker by unincorporated and all enterprises at all-India level separately for each NIC code

Industry (NIC 2004)	annual GVA per worker (in Rs.)					
	rural		urban		all-India	
	All enterprises	proprietary and partnership enterprises	all enterprises	proprietary and partnership enterprises	All enterprises	proprietary and partnership enterprises

For description of industries please see Table 0 at page 6
See Appendix Tables 8 and 10 for more detail.

3.6.8 GVA per worker by number of workers in the enterprise: Table 11 presents estimates of annual GVA per worker (GVAPW) by number of workers in the enterprise. Considering the entire universe of enterprises for the whole country (last page of the table), it is seen that average GVAPW broadly increased with the increase in number of workers in the enterprise.

3.6.9 GVA per worker by number of working hours of the enterprise: As expected, estimated average annual GVAPW increased with the increase in total number of working hours of the enterprise in a normal day (Table 12). For all enterprises taken together (see last page of the table), the average annual GVAPW for the enterprises working for 8 hours or more in a day was roughly 3 times the estimate

for the enterprises which had worked 4 to 7 hours in a day. The estimate of average GVAPW for the latter category of enterprises was about double the corresponding estimate for the enterprises which worked for less than 4 hours in a normal day.

3.6.10 GVA per worker – relative position for enterprises maintaining accounts vs. those not maintaining accounts: An analysis of the estimated average annual GVAPW for the two broad categories of enterprises namely, those maintaining accounts and not maintaining accounts (see **Table 13** for details) reveals that GVAPW for the enterprises maintaining accounts was considerably higher than those not maintaining accounts. This is true for each of OAME, NDME and DME. **Statement 14** below gives the summary of the results for rural and urban India combined by enterprise type.

Statement 14: Annual GVA per worker by maintenance of accounts by the enterprises: all-India

enterprise type	annual GVA per worker (Rs.) for enterprises			
	that maintained accounts		that did not maintain accounts	All
	and data collected from the same	but data collected orally		
(1)	(2)	(3)	(4)	(5)
OAME	19,474	18,614	11,626	11,846
NDME	158,384	56,092	31,559	36,543
DME	141,438	66,363	34,216	55,052
ALL	138,794	51,403	17,888	24,034

See Appendix Table 13 for more detail.

3.6.11 GVA per worker for enterprises that pursued single activity vis-à-vis those pursuing multiple activities for proprietary and partnership enterprises: **Table 14** gives the detailed results for various NIC codes and different states/UTs. Considering all enterprises of the country (see last page of the table), it is seen that GVAPW for the enterprises which pursued single activity (i.e. income coming from the surveyed enterprise only) was higher than the same for those enterprises pursuing multiple activities.

3.7 Distribution of enterprises by source agency of basic input and by destination agency of final products

3.7.1 Table 15 presents number per 1000 of enterprises by source agency for purchase of basic input while **Table 16** gives the similar proportions by destination agency of final products. Private enterprise was found to be the most dominant source agency of basic input and private individual household was the major source of destination agency of final products. The respective proportions were 408 and 550 per thousand enterprises.

Differences in coverage across NSS 62nd, 56th and 51st rounds

1. Coverage of manufacturing and repairing enterprises in 62nd round & 56th round was identical except that “While-you-wait” services under printing of textiles (NIC-98 code 1712) and engraving of metals (NIC-98 code 2892) now classified in NIC-2004 under repair of personal and household goods (NIC-2004 code 52609) were covered in 56th round but not in 62nd round.

Some examples of “While-you-wait” services are:

- i) Households giving new/ old clothes to a shop for block printing, embroidery, etc.
- ii) Shop-owners writing name-plates, etc. on metal,
- iii) Boutique shops purchasing *sarees* and doing art-work either themselves or through outsourcing before sale, etc.

2. Coverage of manufacturing and repairing enterprises in 56th round & 51st round differed in respect of the following activities:

a) Activities covered in 51st round but not in 56th round:

- i) Repair and maintenance of computers and computer based systems (NIC 1987 or NIC 87 code 3941), ii) Repair of office, computing and accounting machinery other than computers and computer based systems (NIC 87 code 3942), iii) Repair of heavy motor vehicles (NIC 87 code 398), iv) Repair of household electrical appliances (NIC 87 code 971), v) Repair of TV, VCR, radio, transistor, tape-recorder and other electronic appliances (NIC 87 code 972), vi) Repair of watches, clocks and jewellery (NIC 87 code 973), vii) Repair of motor vehicles and motor cycles except trucks, lorry and other heavy vehicles (NIC 87 code 974), viii) Repair of bicycles and cycle rickshaws (NIC 87 code 975) and ix) Repair enterprises not elsewhere classified (NIC 87 code 979).

b) Cotton ginning, cleaning and baling (NIC 98 code 01405) was covered in 56th round but not in 51st round.

3. Some of the repairing activities mentioned above were part of manufacturing sector in NIC 87 (15-39) and some were part of services sector (50-97) in NIC 87. However, all these repairing activities were included in the survey on unorganised manufacturing enterprises in 51st round. But all these repairing activities got classified under ‘services sector (50-93)’ both in NIC 98 and NIC 2004 which were respectively followed in 56th round and 62nd round.

4. As the coverage of the survey on unorganised manufacturing enterprises both in 56th round and 62nd round included only industries belonging to NIC Divisions 15-37 as well as NIC code 01405, the above repairing industries got excluded from the coverage of 56th round as well as 62nd round.

5. So if we now compare the coverage of 51st round and 62nd round, it is apparent that the above repairing activities were covered in 51st round but not in 62nd round. Also Cotton ginning, cleaning and baling (NIC 2004 code 01405) was covered in 62nd round but not in 51st round.

6. It may be mentioned that repairing activities other than those mentioned above, which were included in NIC 2004 Div. 15 to 37, were covered in 62nd round and also those repairing activities barring the above mentioned ones, which were included in NIC 1998 Div. 15 to 37, were covered in 56th round.

Chapter Four

Limitations of the survey and suggestions

4.1 Effectiveness of using the list frame

4.1.1 As discussed under Chapter one, the list frame was used in urban areas. At the all-India level, a sample of 8,000 list frame units was allotted for survey. The effectiveness of using list frame will be judged from two counts namely (1) by studying the rate of response by the enterprises which featured in the list frame and (2) by examining the relative position of list frame enterprises, as compared to their area frame counterparts, in terms of average value of key characteristics like number of workers, value of fixed assets, and GVA per enterprise.

4.1.2 **Table 17** (first page) of Appendix A gives number of allotted and surveyed list frame enterprises as well as the distribution of casualty enterprises by reason for casualty. It is seen that only 2,260 units (28%) were eligible for survey. The low proportion of eligible list frame enterprises was attributable to shortcomings in the preparation of list frame as can be seen from the fact that among the casualty enterprises (5,740 in number), the majority (71%) became casualty because they were either government or public sector undertakings or were under the coverage of ASI. Another 18% of the casualty enterprises were found to be non-operative or closed or not traceable.

4.1.3 **Statement 15** below presents estimates of certain key characteristics namely, number of workers, owned fixed assets and GVA per enterprise by NIC code at all-India level separately for enterprises belonging to list frame and area frame. It is important to note that average value per enterprise for each of these characteristics was much higher for list frame enterprises as compared to their counterparts in the area frame. It may also be mentioned that although no sampling was done for list frame enterprises, sample enterprises (col.2) and estimated enterprises (col.4) in Statement 15 differ because of estimation procedure indicated in paragraph 3.2B, page B-12 for list frame enterprises.

4.1.4 Thus it can be said in conclusion that though there were defects in preparing the list frame, the use of list frame helped in netting the relatively 'bigger enterprises' in adequate number in the sample. Accordingly, use of the list frame is likely to reduce the sampling error associated with the overall survey estimates because the so-called bigger enterprises are likely to have higher variability as compared to smaller ones.

Statement 15: Annual value of key characteristics separately for list frame and area frame for different industries (For urban only).

Urban							all-India			
Industry (NIC 2004)	No. of enterprises				Value per enterprise					
	sample		estimated		No. of workers		Owned fixed assets (Rs.)		GVA (Rs.)

For description of industries please see Table 0 at page 6.

4.2 Effectiveness of formation of segment 9

4.2.1 As discussed under paragraph 1.3.3 of Chapter one, segment 9 was formed in the FSUs belonging to sub-strata 1 and 2 of rural sector. At the all-India level, 462 villages were allotted to sub-stratum 1 and 856 villages to sub-stratum 2. For sub-stratum 2, eight villages became casualty. It may be seen that only in 241 villages (52% of surveyed villages) of sub-stratum 1 and 549 villages (65% of surveyed villages) of sub-stratum 2, an eligible enterprise was available for survey in segment 9, although for each of such allotted FSUs, a list of at least a few enterprises was made available to field offices for survey through segment 9. Thus, in a large percentage of FSUs attempts to net bigger enterprises through segment 9 did not materialize. In this process, a significant amount of total time devoted for fieldwork went waste. This was mainly due to the limitation of the

frame used for the purpose. On an average about 2 to 3 eligible enterprises were found in segment 9 per FSU considering the FSUs/villages where at least one such eligible enterprise was found in segment 9.

4.2.2 For the FSUs where at least one eligible enterprise was available in segment 9, **Table 17** (see second page of Table 17) gives number of allotted and surveyed enterprises for segment 9 as well as the distribution of casualty enterprises by reason for casualty. At all-India level, out of an allotted 1,659 segment 9 enterprises for the FSUs stated above, it was possible to collect data from 1,377 enterprises. Thus, the rate of response was quite satisfactory (83%). Among 282 casualty enterprises of segment 9, 78 enterprises became casualty as they were either government or public sector enterprises or were under ASI coverage. Another 93 enterprises became casualty since they were non-operative/closed during the reference year or not traceable. However, data could not be collected (due to refusal or otherwise) from a total of 51 segment 9 enterprises although they were in operation.

4.3 Type of response

4.3.1 In all, 82,897 enterprises were surveyed during NSS 62nd round. Majority of the informants (76,679 in number accounting for 92 % of the total) were either owners or partners of the enterprises (**Table 18 of Appendix-A**). In the remaining cases, respondents were either the managers or others working in the enterprises. As regards the type of response, in 66,500 cases (80 % of all surveyed enterprises), the informants were found to be cooperative and capable. About 15 % of the informants were cooperative but not capable while 4 % of the informants were found to be either busy or reluctant. Thus cooperation was received from the informants in about 95 % of the surveyed enterprises.

4.4 Average time taken to canvass the schedule

4.4.1 **Table 19** gives distribution of surveyed enterprises by time taken to canvass the schedule. Average canvassing time per schedule was between 2 to 3 hours for 16% of the total surveyed enterprises. For another 4% of the surveyed enterprises, this average time even exceeded 3 hours. Such long hours of interview are likely to invite respondents' fatigue particularly when data are collected through oral enquiry.

4.5 Suggestions for future

4.5.1 As mentioned in paragraph 3.2.2, about 1.6% of the estimated total number of enterprises engaged 50 or more number of workers each and another 2.6% of the enterprises engaged 20 to 49 workers per enterprise. This is quite a large number. Ideally, such enterprises should be under the coverage of Factories Act 1948 / ASI (i.e. organized manufacturing sector). Possibilities need to be explored to see how best such enterprises could be covered in the Indian Statistical System for ensuring overall estimates required for national accounting purposes with increased efficiency i.e. reduced sampling error. If it is not possible to bring those enterprises under the coverage of ASI, sample design of NSS enquiries probably needs to be modified suitably. One of the alternatives could be

the building up of a list frame of such units based on the Economic Census data and drawing a suitable sample from this frame.

4.5.2 A large percentage (72%) of the allotted list frame enterprises became casualty as noted in paragraph 4.1.2. Further, as mentioned in the same paragraph, out of all the casualty enterprises of list frame, the majority (71%) became casualty since they were either government or public sector enterprises or were under the coverage of ASI. In future, whenever a similar sampling strategy is adopted, due care should be taken to ensure that the list frame does not include such enterprises which are not within the ambit of unorganised manufacturing sector.

4.5.3 The 'segment 9 experimentation' suffered a partial setback in terms of high casualty rate of FSUs (see paragraph 4.2.1) where no eligible segment 9 enterprise was really found during the detailed enquiry although a list of such anticipated enterprises was developed and made available to the field personnel. In the process certain amount of labour went waste. Adequate remedial measures must be taken to overcome this problem while adopting such a procedure in future.

4.5.4 Nearly 15% of the respondents were cooperative but 'not capable' (paragraph 4.3.1). It may be worth contacting the right respondents in appropriate hours whenever they are available. This is likely to improve the quality of data. About 4% of the respondents were busy or reluctant. For eliciting better statistical information from them, they should be contacted at the time convenient to them. Further, public awareness campaign about the use of statistical data must also be in place.

4.5.5 In each of the 16% of the surveyed enterprises, average canvassing time of the schedule was 2 to 3 hours (paragraph 4.4.1). In 4% of the cases, the canvassing time even went beyond 3 hours. A lengthy schedule is likely to invite respondents' fatigue having adverse impact on data quality. It may be necessary to cut down the size of the schedule so that the data can be collected within a reasonable time, preferably not exceeding an hour and a half.

Appendix A

Appendix B
Coverage, Sample Design,
Estimation Procedure

Coverage, Sample Design and Estimation Procedure

1.0 Introduction:

1.0.1 The National Sample Survey (NSS), set up by the Government of India in 1950 to collect socio-economic data employing scientific sampling methods started its sixty-second round from 1st July, 2005. The survey continued upto 30th June 2006.

1.0.2 Following the first Economic Census 1977, small establishments and enterprises not employing any hired worker [and henceforth called 'own account enterprises' (OAEs)] engaged in manufacturing and repairing activities were surveyed on sample basis in the thirty-third round of NSS during 1978-79.

1.0.3 As a follow-up to the second Economic Census 1980, own account enterprises and Non-directory Establishments engaged in manufacturing and repairing activities (i.e., OAMEs and NDMEs respectively) were surveyed in the fortieth and forty-fifth rounds of NSS during July 1984-June 1985 and July 1989-June 1990 respectively. The Directory Manufacturing Establishments (DMEs) were surveyed during October 1984-September 1985 and October 1989 to September 1990 respectively by a group of special staff (Assistant Superintendents only) of the Field Operations Division (FOD) of the NSSO under the technical direction of the CSO.

1.0.4 As a follow-up to the third Economic Census 1990, the first *integrated* survey on unorganised manufacturing and repairing enterprises covering OAMEs, NDMEs and DMEs was undertaken during the fifty-first round of NSS (July 1994-June 1995).

1.0.5 Following this, two other surveys were undertaken – (i) Special Enterprise Survey on enterprises in the unorganised sector during the period August 1998 to June 1999 and (ii) Informal sector enterprises as part of NSS 55th round during July 1999 to June 2000. Manufacturing sector was part of coverage in both these surveys.

As a follow up of fourth Economic Census 1998, survey of manufacturing enterprises in the unorganised sector was conducted in the 56th round of NSS during July 2000 to June 2001.

1.1 **Subject Coverage:** The 62nd round (July 2005 - June 2006) of NSS was earmarked for survey on (i) **unorganised** manufacturing enterprises under the two-digit codes 15 to 37 (Section 'D') of NIC-2004 and enterprises under cotton ginning, cleaning and baling (NIC-2004, code 01405), (ii) annual survey of consumer expenditure and (iii) survey on employment – unemployment.

Following activities have been classified under Manufacturing (NIC –2004 Section D):

<u>Division</u>	<u>Description</u>
15	Manufacture of Food Products and Beverages
16	Manufacture of Tobacco Products
17	Manufacture of Textiles
18	Manufacture of Wearing Apparel; Dressing and Dyeing of Fur
19	Tanning and Dressing of Leather; Manufacture of Luggage, Handbags, Saddlery, Harness and Footwear
20	Manufacture of Wood and of Products of Wood and Cork, Except Furniture; Manufacture of Articles of Straw and Plaiting Materials
21	Manufacture of Paper and Paper Products
22	Publishing, Printing and Reproduction of Recorded Media

<u>Division</u>	<u>Description</u>
23	Manufacture of Coke, Refined Petroleum Products and Nuclear Fuel
24	Manufacture of Chemicals and Chemical Products
25	Manufacture of Rubber and Plastics Products
26	Manufacture of Other Non-Metallic Mineral Products
27	Manufacture of Basic Metals
28	Manufacture of Fabricated Metal Products, Except Machinery and Equipment
29	Manufacture of Machinery and Equipment N.E.C.
30	Manufacture of Office, Accounting and Computing Machinery
31	Manufacture of Electrical Machinery and Apparatus N.E.C.
32	Manufacture of Radio, Television and Communication Equipment and Apparatus
33	Manufacture of Medical, Precision and Optical Instruments, Watches and Clocks
34	Manufacture of Motor Vehicles, Trailers and Semi-Trailers
35	Manufacture of Other Transport Equipment
36	Manufacture of Furniture; Manufacturing N.E.C.
37	Recycling

Thus survey on **unorganised** manufacturing enterprises covered:

- (a) Manufacturing enterprises not registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948
- (b) Manufacturing enterprises registered under Section 85 of Factories Act, 1948
- (c) Non-ASI enterprises engaged in cotton ginning, cleaning and baling (NIC- 2004, code 01405)
- (d) Non-ASI enterprises manufacturing bidi and cigar (those registered under bidi and cigar workers (condition of employment) Act, 1966 as well as those un-registered)

and excluded:

- (a) Repairing enterprises not falling under Section 'D' of NIC- 2004
- (b) Departmental units such as Railway Workshops, RTC Workshops, Government Mint, Sanitary, Water supply, Gas, Storage, etc. in line with ASI coverage
- (c) Units covered under ASI
- (d) Public Sector Units

1.2 Geographical coverage: The survey covered the whole of the Indian Union *except* (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of the bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

1.3 Period of survey and work programme: The period of survey was of one year duration starting on 1st July 2005 and ending on 30th June 2006. The survey period of this round was divided into four sub-rounds of three months' duration each to spread the survey workload uniformly. The sub-rounds were as follows:

- sub-round 1 : July - September 2005
- sub-round 2 : October - December 2005
- sub-round 3 : January - March 2006
- sub-round 4 : April - June 2006

Because of the arduous field conditions, sub-round restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep, rural areas of Arunachal Pradesh and Nagaland.

1.4 Schedules of enquiry: During this round, the following schedules of enquiry were canvassed:

Schedule 0.0	: list of households and non-agricultural enterprises
Schedule 2.2	: manufacturing enterprises
Schedule 1.0	: consumer expenditure
Schedule 10	: employment and unemployment

1.5 Participation of States: In this round all the States and Union Territories except Andaman & Nicobar Islands, Dadra & Nagar Haveli and Lakshadweep participated at least on an equal matching basis. The following was the matching pattern of the participating States/ UTs.

Nagaland (U)	: triple
J & K, Manipur & Delhi	: double
Goa, Maharashtra (U), Kerala	: one and half
Remaining States/ UTs	: equal

2 Sample Design

2.1 Outline of sample design: Two frames were used for the 62nd round survey viz. List frame and Area frame.

2.1.2 List frame: This was used only for urban sector and that too for selection of manufacturing enterprises only. For unorganised manufacturing enterprises, a list of about 8000 big non-ASI manufacturing units in the urban sector prepared on the basis of the data of the census of manufacturing enterprises conducted by Development Commissioners of Small Scale Industries (DCSSI) in 2003 was used as list frame.

The 'big' DCSSI units in the urban sector had been identified by the criteria given below:

- (1) From the list of registered SSI units, units not registered under sections 2m(i) or 2m(ii) of Factories Act, 1948 and belonging to NIC '98 codes 01405, 15 – 37 were considered.
- (2) Out of the above units, the units whose gross value of output in 2001 were more than 6 times the average output (Rs. 14,32,314) of all urban SSI units were separated out.
- (3) From the above units, those with 6 or more workers were identified as the big units for list frame. About 8000 such units constituted the list frame.

All these units in the list frame were to be surveyed and there was not any sampling for list frame. To avoid duplication, these units were excluded from the list of enterprises prepared in the selected urban blocks/villages drawn from the area frame. There was no sub-round restriction for the list frame units.

All the enterprises in the list frame are common to both central and state samples.

2.1.3 Area frame: This was adopted for both rural and urban sectors. The list of villages as per census 2001 (for Manipur, 1991 census was used since 2001 census list was not available) was used as frame for the rural sector and the latest available list of UFS blocks was used as frame in the urban sector. However, EC-98 was used as frame for the 27 towns with population 10 lakhs or more (as per Census 2001).

A stratified multi-stage design had been adopted for the 62nd round survey. The first stage units (FSU) were the 2001 census (for Manipur, 1991 census) villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households/ unorganised-manufacturing enterprises (OAME/ NDME/ DMEs), in both the sectors. In the case of large villages/ blocks requiring hamlet-group (hg)/ sub-block (sb) formation, one intermediate stage was the selection of two hgs/ sbs from each FSU.

2.1.4 Stratification: Within each district of a State/ UT, two basic strata were formed:

i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them also formed a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum. There are 27 towns with population 10 lakhs or more at all-India level as per census 2001.

2.1.5 Sub-stratification for area frame:

2.1.5.1 Rural sector:

Development Commissioner of Small Scale Industries (DCSSI) conducted a survey of all Small Scale Industries (SSI) units in 2003 covering all registered SSI units on a census basis and other SSI units on a sample basis. 9306 villages having a 'big' non-ASI registered SSI manufacturing unit as per DCSSI census had been identified by matching the identification particulars of census 2001 with those of DCSSI census.

'Big' DCSSI unit, on the basis of which villages had been identified, satisfied the conditions:

- (a) It was a registered SSI unit in rural area as per DCSSI census belonging to NIC '98 codes 01405, 15 – 37 and it was not registered under sections 2m(i) or 2m(ii) of Factories Act, 1948 and
- (b) It had 6 or more workers.

A subset of these 9306 villages having 'bigger' non-ASI registered SSI manufacturing unit had been considered for formation of a separate sub-stratum (termed as sub-stratum 1). The 'bigger' registered SSI units were those which, in addition to fulfilling the criteria (a) and (b) above, satisfied the criteria:

- (c) The SSI unit had gross value of output in 2001 more than the average output (Rs. 7,52,159) of rural SSI units identified in (a) and (b) above and
- (d) The SSI unit had 11 or more workers and
- (e) The output of the SSI unit had been continuously increasing over the last three years between 1999 and 2001.

Sub-stratum 1 villages had been identified at the State/ UT level after arranging the above villages in descending order of total of gross output of the bigger registered SSI units in the village during these three years and selecting the required number of them from the top.

Obviously, the district containing any such villages had sub-stratum 1. The total number of such sub-stratum 1 villages at all-India level was 462.

2.1.5.2 Sub-stratification of rural areas of each district comprised the following:

sub-stratum 1: The villages in the district which belonged to the list of 462 villages.

sub-stratum 2: The villages in the district which were not in sub-stratum 1 but belonged to the set of 9306 villages.

sub-stratum 3, 4, 5, ... : Remaining FSUs of the district were first arranged in ascending order of census 2001 population. Then $n/2$ sub-strata, n being the stratum allocation excluding the allocations for sub-strata 1 & 2, were formed in such a way that each sub-stratum had more or less equal population.

Sub-strata 1 & 2 were not formed in Kerala. Also sub-strata 1/ sub-strata 2 were not formed for some smaller States/ UTs.

2.1.5.3 **Urban sector:**

(a) For the 27 cities where EC-98 frame was used: Two sub-strata were formed within each stratum based on EC-98 information as under:

sub-stratum 1: all FSUs (i.e. UFS blocks as per the EC-98) with at least one DME or NDME in the unorganised sector.

sub-stratum 2: remaining FSUs.

(b) For towns where latest phase of UFS were used: Two sub-strata were formed as follows:

sub-stratum 1: all FSUs (i.e. UFS blocks as per the latest UFS) identified as Industrial Area (IA) or Bazar Area (BA) or Slum Area (SA).

sub-stratum 2: remaining FSUs

2.1.6. **Total sample size:** 9997 FSUs (rural & urban combined) for area frame and 8000 manufacturing units for list frame (urban only) were allocated at all-India level for central sample on the basis of investigator strength. For state sample 10518 FSUs were allocated for area frame. List frame units for the state sample were the same as those in the central sample.

2.1.7 **Allocation of samples to rural & urban sector:** The allocation between rural and urban sectors had been made in proportion to the number of unorganised non-agricultural workers as per EC-98.

2.1.8 **Allocation of total samples to States and UTs:** The total (all-India) rural/ urban sample size had been allocated to different States and UTs in proportion to number of unorganised non-agriculture workers as per EC-98 subject to the availability of investigators ensuring more or less uniform work-load.

2.1.9 Allocation to strata: Within each sector of a State/ UT, the respective sample size were allocated to the different strata in proportion to the stratum population as per census 2001.

2.1.10 Allocation to sub-strata:

2.1.10.1 Rural sector: 462 FSUs of sub-stratum 1 were allocated to the districts where these FSUs were located. For each sub-stratum 2, maximum allocation was 4. A set of 856 FSUs in the central sample and 796 samples in the state sample were selected at all-India level for sub-stratum 2. Minimum allocation for sub-stratum 3 and above was 2.

2.1.10.2 Urban sector: For 27 million plus cities in the urban sector, stratum allocations were distributed over the sub-strata in proportion to the number of non-agricultural workers in the unorganised sector as per EC '98. For other towns, stratum allocation was divided among the sub-strata in proportion to number of FSUs in the sub-strata with double weightage to sub-stratum 1. Minimum sub-stratum allocation was 2.

2.1.11 Selection of FSUs: Samples were drawn in the form of two sub-samples in each stratum × sub-stratum. However, all the FSUs of sub-stratum 1 in rural sector were in sub-sample 1. Similarly, all list frame units in urban sector were considered in sub-sample 1 only.

All the FSUs of sub-stratum 1 in rural sector were common to both central and State samples.

2.1.11.1 Rural sector:

- (a) sub-stratum 1: All 462 FSUs were surveyed.
- (b) sub-stratum 2: FSUs were selected with PPSWR where size was number of non-ASI registered SSI DME units in the village.
- (c) sub-stratum 3, 4, 5,: FSUs were selected by PPSWR with size as population as per census 2001.

2.1.11.2 Urban sector:

(a) **For 27 million plus cities:** FSUs were selected by PPSWR with the *number of manufacturing workers* in the *unorganised sector as per EC '98* as size. The number of manufacturing workers was taken as 1 for those blocks where there were no unorganised manufacturing enterprises. However, some manufacturing enterprises had been found to have large number of workers as per EC- 98 frame even though they were in the unorganised sector. Some adjustment to the size of workers for such enterprises were, therefore, made before calculating the size of FSUs. For this purpose, any unorganised manufacturing enterprise having more than 200 workers was deemed to have a size equal to 200. Enterprise sizes were thereafter added up to get the FSU size and sub-stratum/ stratum size.

(b) **For other cities/ towns:** FSUs were selected by SRSWOR.

2.1.12 Formation of segment 9: Segment 9 was formed in the selected sample FSUs of rural sub-strata 1 & 2 of each stratum. It comprised only the big non-ASI registered SSI manufacturing unit(s) in the village as per DCSSI census on the basis of which the villages had been identified. The names of such units in the selected sample FSUs were supplied to field offices. If any such unit was found to be eligible for ASI, it was not be covered under segment 9. If there was a change in the status of the enterprise from DME to NDME or OAME, it was still considered eligible enterprise belonging to segment 9. Only top 10 eligible enterprises in terms of number of workers constituted segment 9.

2.1.13 Selection of hamlet-groups/ sub-blocks/ households/ enterprises - important steps

2.1.13.1 **Criterion for hamlet-group/ sub-block formation:** Large villages/blocks were divided into a suitable number (say, D) of ‘hamlet-groups’ in the rural sector and ‘sub-blocks’ in the urban sector. For this, approximate present population (P) and approximate total number of non-agricultural enterprises (E) for the whole FSU were ascertained first from knowledgeable persons. Depending upon the values of ‘P’ and ‘E’, it was divided into a suitable number (say, D) of ‘hamlet-groups’ in the rural sector and ‘sub-blocks’ in the urban sector as stated below.

population (P)	no. of hgs/ sbs to be formed	no. of non-agricultural enterprises (E)	no. of hgs/ sbs formed
less than 1200	1	less than 120	1
1200 - 1799	3	120 - 179	3
1800 - 2399	4	180 - 239	4
2400 - 2999	5	240 - 299	5
and so on	...	and so on	...

However, while considering enterprise criteria, segment 9 enterprises, if any, were excluded i.e. the value of ‘E’ was adjusted in respect of the number of enterprises in segment 9. For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur, Doda districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows.

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

For enterprise criterion, procedure was not changed for the above areas.

The higher of the two values as per population and enterprise criteria was accepted as the number of hgs/ sbs to be actually formed. Hamlet-groups/ sub-blocks were formed by more or less equalizing population. Out of all hg’s/ sb’s formed in the FSU, two hg’s/ sb’s were selected for listing in the following manner - one with the maximum number of DMEs (or with maximum number of NDME if there was no DME or with maximum number of OAMEs if there was no DME/ NDME in the FSU or with maximum percentage share of population if there was no manufacturing enterprise in the entire FSU) was always selected and termed as **Segment 1**; one more hg/ sb was selected *randomly* and termed as **Segment 2**.

2.1.14 **Listing of households/ enterprises and formation of their frame:** Having determined the area(s) to be considered for listing, the next step was to list all the households and non-agricultural enterprises (NAEs). Although all non - agricultural enterprises were to be listed, only the

unorganised manufacturing enterprises under Industry Division 15 to 37 and NIC code 01405 (cotton ginning, cleaning and baling) as per NIC-2004 were covered. Thus, manufacturing enterprise registered under Sec. 2m(i) & 2m(ii) of the Factories Act, 1948 or Bidi and Cigar workers (conditions of employment) Act 1966 under the coverage of ASI or Govt. manufacturing enterprise/ PSU were not considered for survey. Further, only those manufacturing enterprises which operated for at least 30 days (15 days for seasonal enterprises) during the reference year (i.e. last 365 days preceding the date of survey) qualified for survey. Such enterprises will hereafter be referred to as '**eligible enterprises**'. Listing of households as well as eligible enterprises for the purpose of sample selection were independent for segments 1 & 2.

2.1.15 Formation of Second Stage Strata and allocation of enterprises for schedule 2.2:

All the eligible enterprises listed in the selected village/ block/ segment were stratified into two broad second stage strata by enterprise type OAME and NDME/ DME. Each of these two broad second-stage strata was divided into 3 second-stage strata by *Broad Manufacturing Group (BMG)* i.e. *BMG 1, BMG 2 & BMG 3*. Thus there were a maximum of 6 second-stage strata [**SSS 1: (OAME x BMG 1), SSS 2: (OAME x BMG 2), SSS 3: (OAME x BMG 3), SSS 4: (NDME/ DME x BMG 1), SSS 5: (NDME/ DME x BMG 2) and SSS 6: (NDME/ DME x BMG 3)**] in each segment.

The three BMGs were to be formed after classifying the unorganized manufacturing enterprises as per NIC-2004 as follows:

BMG	NIC-2004 codes
1	15 to 20
2	23, 27, 30 to 35, 01405
3	rest of NIC codes under Section 'D'

The composition of SSS and number of enterprises allocated for schedule 2.2 in each FSU was as follows (excluding DMEs in segment 9).

enterprise type	BMG	SSS no.	number of enterprises to be surveyed for schedule 2.2	
			without hg/ sb formation	with hg/ sb formation (for each segment)
OAME	1	1	2	1
	2	2	2	1
	3	3	2	1
NDME/ DME	1	4	2	1
	2	5	2	1
	3	6	2	1

From each SSS the sample enterprises for schedule 2.2 were selected by SRSWOR.

3. Estimation Procedure

3.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward) / block]

d = subscript for a segment (d = 1, 2, 9)

j = subscript for j-th second stage stratum in an FSU/ segment (j = 1, 2, 3, 4, 5 or 6)

k = subscript for k-th sample household/enterprise under a particular second stage stratum within an FSU/ segment

D = total number of hamlet-groups/sub-blocks formed in the sample village (panchayat ward) / block

$D^* = 1$ if $D = 1$

= (D - 1) for FSUs with $D > 1$

N = total number of FSUs in any urban sub-stratum belonging to the towns other than million plus cities

Z = total size of a rural sub-stratum or urban sub-stratum of million plus cities (= sum of sizes for all the FSUs of a sub-stratum)

z = size of sample village/block used for selection.

n = number of sample village / block surveyed including zero cases but excluding casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of a village/block/ segment of sample FSU

h = number of households surveyed in a second-stage stratum of a village/block/ segment of sample FSU

E = total number of enterprises listed in a second-stage stratum of a village/block/ segment of sample FSU

e = number of enterprises surveyed in a second-stage stratum of a village/block/ segment of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th segment (d = 1, 2, 9) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum;

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2A Formulae for estimation of aggregates for a particular sub-sample and stratum in case of Area Frame:

3.2A.1 Rural:

(a) Estimation formula for a sub-stratum 1 of a stratum:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \sum_{i=1}^{n_j} \left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

(b) Estimation formula for sub-stratum 2 of a stratum:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

Note: For segment 9, an adjustment may be necessary if $E \neq e$ for a second-stage stratum due to casualty at the detailed enquiry stage. In that case, contribution of segment 9 (i.e. $\sum_{k=1}^{e_{i9j}} y_{i9jk}$) may be

replaced by $\frac{L_{i9j}}{e_{i9j}} \sum_{k=1}^{e_{i9j}} y_{i9jk}$, where $L_{i9j} =$ (number of list frame enterprises of segment 9 with survey code 1) + (number of list frame enterprises of segment 9 with survey code 3 and reason for casualty codes 3 & 9).

$L_{i9j} = e_{i9j}$ if there is no casualty or there is casualty but with reason for casualty code as 1 or 2.

(c) Estimation formula for a sub-stratum other than sub-strata 1 & 2 of a stratum:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2A.2 Urban:

(a) Estimation formula for a sub-stratum of million plus cities:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

(b) Estimation formula for a sub-stratum of other strata:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2A.3 Estimate for a stratum:

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

3.2A.4 Overall Estimate for Aggregates for Area Frame:

Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

3.2A.5 Overall Area Frame Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the area frame estimates (\hat{Y}_s) of stratum over all strata belonging to the State/ UT/ all-India.

3.2B Estimates from List Frame enterprises in urban sector:

$$Y = \frac{L}{L'} \sum_{l=1}^{L'} y_l,$$

where

L = (number of list frame enterprises with survey code 1) + (number of list frame enterprises with survey code 3 and reason for casualty codes 3 & 9 in item 20, block 1, schedule 2.2)

L' = (number of list frame enterprises with survey code 1 in item 19, block 1, schedule 2.2)

Estimate may be generated for any domain e.g. district, State, All-India as well as for any NIC category, Division, Group etc., by restricting L, L' to that particular domain.

If there is no casualty or there is casualty but with reason for casualty code as 1 or 2 in item 20, block 1, schedule 2.2, then L = L'.

3.3 Overall Estimate of Aggregates at State/UT/all-India level in the urban sector:

The overall estimate \hat{Y} at the State/ UT/ all-India level for urban sector for the schedule 2.2 is obtained by summing the area frame estimates and list frame estimates of aggregates for the State/ UT/ all-India.

3.4 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimate of the aggregates Y and X (sum of area frame and list frame estimates) for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

3.5 Estimates of Error: There is no sampling for the list frame enterprises since it was the census of all units. The variance will comprise only that due to area frame units. The estimated variances of the estimates will be as follows:

3.5.1 For aggregate \hat{Y} :

$$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$$

where $V\hat{a}r(\hat{Y}_s)$ are as given below.

3.5.1.1 For strata with PPSWR selection at first stage:

$$V\hat{a}r_{ppswr}(\hat{Y}_s) = \left[\sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left(\frac{Z_{sti} \hat{Y}_{sti}}{Z_{sti}} - \hat{Y}_{st} \right)^2 \right],$$

where $\hat{Y}_{sti} = \sum_j Y_{stij}$ and

$$\hat{Y}_{stij} = \left[\sum_{k=1}^{e_{sti9j}} y_{sti9jk} + \frac{E_{sti1j}}{e_{sti1j}} \sum_{k=1}^{e_{sti1j}} y_{sti1jk} + D_{sti}^* \times \frac{E_{sti2j}}{e_{sti2j}} \sum_{k=1}^{e_{sti2j}} y_{sti2jk} \right]$$

3.5.1.2 For strata with SRSWOR selection at first stage:

$$Var_{srswor}(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2,$$

where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.5.2 For ratio \hat{R} :

$$M\hat{S}E(\hat{R}) = \frac{1}{(\hat{X})^2} \left[\sum_s M\hat{S}E_s(\hat{R}) + \sum_{s'} M\hat{S}E_{s'}(\hat{R}) \right]$$

where s, s' indicate respectively the strata with PPSWR and SRSWOR selection at first stage.

3.5.2.1 For strata with PPSWR selection at first stage:

$$M\hat{S}E_s(\hat{R}) = \sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left[\frac{Z_{sti}}{z_{sti}} (\hat{Y}_{sti} - \hat{R}\hat{X}_{sti}) - (\hat{Y}_{st} - \hat{R}\hat{X}_{st}) \right]^2$$

where

$$\hat{Y}_{sti} = \sum_j \hat{Y}_{stij}, \quad \hat{X}_{sti} = \sum_j \hat{X}_{stij},$$

$$\hat{Y}_{stij} = \left[\sum_{k=1}^{e_{sti9j}} y_{sti9jk} + \frac{E_{sti1j}}{e_{sti1j}} \sum_{k=1}^{e_{sti1j}} y_{sti1jk} + D_{sti}^* \times \frac{E_{sti2j}}{e_{sti2j}} \sum_{k=1}^{e_{sti2j}} y_{sti2jk} \right]$$

and

$$\hat{X}_{stij} = \left[\sum_{k=1}^{e_{sti9j}} x_{sti9jk} + \frac{E_{sti1j}}{e_{sti1j}} \sum_{k=1}^{e_{sti1j}} x_{sti1jk} + D_{sti}^* \times \frac{E_{sti2j}}{e_{sti2j}} \sum_{k=1}^{e_{sti2j}} x_{sti2jk} \right]$$

3.5.2.2 For strata with SRSWOR selection at first stage:

$$M\hat{S}E_{s'}(\hat{R}) = \sum_t \frac{1}{4} \left[(\hat{Y}_{s't1} - \hat{Y}_{s't2})^2 + \hat{R}^2 (\hat{X}_{s't1} - \hat{X}_{s't2})^2 - 2\hat{R} (\hat{Y}_{s't1} - \hat{Y}_{s't2}) (\hat{X}_{s't1} - \hat{X}_{s't2}) \right]$$

where $\hat{Y}_{s't1}$ and $\hat{Y}_{s't2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.6 Estimates of RSE:

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

3.7 Multipliers for Area frame enterprises:

The formulae for multipliers for a sub-sample and schedule type are given below:

sch type	sector	sub-stratum	formula for multipliers		
			segment 9	segment 1	segment 2
2.2	rural	1	$\frac{L_{stmi9j}}{e_{stmi9j}}$	$\frac{E_{stmi1j}}{e_{stmi1j}}$	$D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
		2, 3	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}} \times \frac{L_{stmi9j}}{e_{stmi9j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
	urban	1, 2 (of EC-98 frame)		$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
		1, 2 (of UFS frame)		$\frac{N_{st}}{n_{stmj}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$

- Note: (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.
- (ii) Multipliers have to be computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.
- (iii) For estimating number of villages possessing a characteristics, $D_{stmi}^* = 1$ in the relevant multipliers and there will be only one multiplier for the village.
- (iv) $L_{ij} =$ (number of list frame enterprises of segment 9 with survey code 1) + (number of list frame enterprises of segment 9 with survey code 3 and reason for casualty codes 3 & 9) in i-th FSU and j-th second-stage stratum of m-th sub-sample of t-th sub-stratum belonging to s-th stratum.'

4. Treatment for zero cases, casualty cases etc.:

4.1 While counting the number of FSUs surveyed (n_{stm}) in a sub-stratum, all the FSUs with survey codes 1 to 6 in schedule 0.0 will be considered. In addition, if no SSU is available in the frame for a particular schedule then also that FSU will be treated as surveyed in respect of that schedule. However, if the SSUs of a particular schedule type are available in the frame of the FSU but none of these could be surveyed then that FSU has to be treated as casualty and it will not be treated as surveyed in respect of that schedule.

4.2 *Casualty cases*: FSUs with survey code 7 as per schedule 0.0 are treated as casualties. In addition to this, an FSU, although surveyed, may have to be treated as casualty for a particular schedule type and a particular *second stage stratum* as given in the following para:

4.2.1 FSUs with survey codes 1 and 4 as per schedule 0.0 having number of households in the frame of j-th second stage stratum greater than 0 but number of households surveyed according to data file, considering both segments together, as nil (i.e. $H_{i1j} + H_{i2j} > 0$ but $h_{i1j} + h_{i2j} = 0$) will be taken as casualties for j-th second stage stratum.

4.2.2 Similarly, FSUs with survey codes 1 and 4 as per schedule 0.0 having number of enterprises in the frame of j-th second stage stratum greater than 0 but number of enterprises surveyed according to data file, considering all three segments together, as nil (i.e. $E_{i9j} + E_{i1j} + E_{i2j} > 0$ but $e_{i9j} + e_{i1j} + e_{i2j} = 0$) will be taken as casualties for j-th second stage stratum.

All the FSUs with survey codes 1 to 6 as per schedule 0.0 minus the number of casualties as identified above will be taken as the number of surveyed FSUs (n_{stmj}) for that sub-stratum \times second stage stratum.

4.2.3 When casualty for j-th second stage stratum occurs for a particular segment but not for the other segment, the FSU will not be treated as casualty but some adjustments in the value of H and E for the other segment will be done as follows:

- (i) Suppose for segment 1, $H_{i1j} > 0$ but $h_{i1j} = 0$ while for segment 2, $H_{i2j} > 0$ and $h_{i2j} > 0$. In that case $D_i^* \times H_{i2j}$ will be replaced by $(H_{i1j} + D_i^* \times H_{i2j})$ in the formula for multiplier of segment 2.
- (ii) Suppose for segment 1, $H_{i1j} > 0$ and $h_{i1j} > 0$ while for segment 2, $H_{i2j} > 0$ but $h_{i2j} = 0$. In that case H_{i1j} will be replaced by $(H_{i1j} + D_i^* \times H_{i2j})$ in the formula for multiplier of segment 1.

Adjustments may be made in the multipliers for schedule 2.2 if similar situation arises for enterprises. However, segment 9 need not be clubbed with segment 1 or segment 2 if segment 9 enterprises are surveyed but no enterprises could be surveyed from segments 1 / 2.

It may be noted that n_{stmj} would be same for segments 1 & 2 of an FSU.

5. Treatment in cases of void second-stage strata/sub-strata /strata/NSS region at FSU or household level

5.1 A sub-stratum may be void because of the casualty of all the FSUs belonging to the sub-stratum. This may occur in one sub-sample or in both the sub-samples. If it relates to only one sub-sample, then estimate for the void sub-stratum may be replaced with the estimate as obtained from the other sub-sample for the same sub-stratum.

5.2 When a sub-stratum is void in both the sub-samples, the following procedure is recommended:

Case(I): Sub-stratum void cases at FSU levels (i.e. all FSUs having survey code 7):

- i) If one of the rural sub-strata 3, 4, 5, ..., etc. is void then it may be merged with a sub-stratum having the next higher population size class of villages within the same district. Sub-stratum 3 may be merged with sub-stratum 4, sub-stratum 4 with sub-stratum 5 and so on. If last sub-stratum is void, it will be merged with the previous sub-stratum.
- ii) If sub-stratum 1 and/or sub-stratum 2 are void, SDRD may be consulted for necessary guidelines
- (iii) If an urban sub-stratum is void then it may be merged with the sub-stratum with the other sub-stratum of the same stratum.
- iv) If all the sub-strata in a district are void, it may be excluded from the coverage of the survey. The state level estimates will be based on the estimates of districts for which estimates are available and remarks to that effect may be added in appropriate places.

Case (II): Stratum void case at second stage stratum level (i.e. all the FSUs are casualties for a particular second stage stratum):

An FSU may be a casualty for a particular *second stage stratum* although survey code is not 7. If all the FSUs of a sub-stratum become casualties in this manner for a particular *second stage stratum*, the sub-stratum will become void. In such cases, sub-strata will be merged with other sub-strata for all the second stage strata as in *Case (I) above*.

However, if whole district/stratum becomes void in this manner for a particular second stage stratum, adjustment for this type of stratum void case may be done according to the following guidelines.

The adjustment will be made involving other strata (within NSS region) of the State/U.T. Suppose A, B, C and D are the four strata in the State/UT/Region and stratum C is void for j-th *second stage stratum*. If \hat{Y}_{aj} , \hat{Y}_{bj} and \hat{Y}_{dj} are the aggregate estimates for the strata A, B and D respectively, then the estimate \hat{Y}_{cj} for stratum C may be obtained as

$\left(\frac{\hat{Y}_{aj} + \hat{Y}_{bj} + \hat{Y}_{dj}}{Z_a + Z_b + Z_d} \times Z_c \right)$ where Z_a , Z_b , Z_c and Z_d are the sizes of strata A, B, C and D respectively.

5.3 It may be noted that sub-round wise allocations of sample FSUs in 62nd round were not equal for all the sub-rounds. Sub-round wise estimates may not be comparable and hence they may not be attempted.

SCHEDULE 2.2: MANUFACTURING ENTERPRISES

[0] descriptive identification of sample enterprise	
1. state / u.t.:	6. ward /inv. unit / UFS block:
2. district:	7. name of owner:
3. tehsil / town*:	8. name of informant:
4. village name:	9. name and address of the enterprise:
5. serial no. of hamlet:	

[1] identification of sample enterprise												
item no.	item	code				item no.	item	code				
1.	serial number of sample village/block (area frame) / enterprise (list frame)						12.	stratum				
								13.	for 'area frame' units only	sub-stratum		
										segment number (1 / 2 / 9)		
2.	frame used (list-1, area-2)					15.	second stage stratum (code)					
3.	round number	6	2		16.	sample enterprise number (segment 1/2) / enterprise number (segment 9)						
4.	schedule number	0	2	2								
5.	sample (central-1, state-2)					17.	informant code					
6.	sector (rural - 1, urban - 2)					18.	response code					
7.	state – region				19.	survey code						
8.	district				20.	reason for casualty (list frame / segment 9 of area frame)/ substitution of original enterprise (segment 1/2 of area frame)						
9.	sub – round											
10.	sub – sample (put '1' for list frame)											
11.	FOD sub-region											

CODES FOR BLOCK 1

item 17 : **informant code** : owner/partner – 1, manager – 2, others working in the enterprise – 9

item 18 : **response code** (to be filled up after filling up the entire schedule):

informant : co-operative and capable – 1, co-operative but not capable – 2, busy – 3, reluctant – 4, others – 9

item 19 : **survey code**: original enterprise surveyed – 1, substitute surveyed – 2, casualty – 3

item 20 : **reason for**

casualty (list frame and segment 9 of area frame): enterprise: Government/ PSU/ registered under Section 2m(i) or 2m(ii) of Factories Act, 1948/ Bidi and Cigar Workers (Condition of Employment) Act, 1966 and under the coverage of ASI – 1, non-operative/closed during the reference year/ non-traceable – 2, in operation during the reference year but data could not be collected – 3, others(specify) – 9

substitution of original enterprise (segment 1/2 of area frame): informant : busy – 1, not available – 2, non-cooperative – 3, others – 9

* Tick mark (√) may be put in appropriate place.

CODES FOR BLOCK 2

item 207: type of ownership			
proprietary (male).....	1	partnership between members not all from the same household...	4
proprietary (female).....	2	co-operative society.....	5
partnership with members of the same household..	3	limited company (outside public sector).....	6
		others.....	9
item 212: general educational level of the working owner			
not literate.....	01	primary.....	04
literate without formal schooling	02	middle.....	05
literate but below primary.....	03	secondary.....	06
		higher secondary....	07
