Overview

ABSTRACT

The National Sample Survey Organisation (NSSO) has been carrying out All-India surveys on consumer expenditure. While some of these smaller-scale surveys are spread over a full year and others over six months only, the quinquennial (full-scale) surveys have all been of a full year's duration. Household consumer expenditure is measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It includes the imputed values of goods and services, which are not purchased but procured otherwise for consumption. In other words, it is the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. Any expenditure incurred towards the productive enterprises of the households is also excluded from household consumer expenditure. To minimise recall errors, a very detailed item classification is adopted to collect information, including items of food, items of fuel, items of clothing, bedding and footwear, items of educational and medical expenses, items of durable goods and other items. The schedule has also collected some other household particulars including age, sex and educational level etc. of each household member.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected households based on sampling procedure and members of the household

Scope

NOTES

Schedule 1.0 of the 61st NSS round consists of the following blocks:

Block 0: Descriptive identification of sample household: This block is meant for recording descriptive identification particulars of a sample household.

Block 1: Identification of sample household

Block 2: Particulars of field operation: The identity of the Investigator, Assistant Superintendent and Superintendent associated, date of survey/inspection/scrutiny of schedules, despatch, etc., has been recorded in this block against the appropriate items in the relevant columns.

Block 3: Household characteristics:

Characteristics which are mainly intended to be used to classify the households for tabulation has been recorded in this

block.

Block 4: Demographic and other particulars of household members: All members of the sample household have been listed in this block. Demographic particulars (viz., relation to head, sex, age, marital status and general education) and number of meals taken have been recorded for each member using one line for one member.

Block 5: Consumption of food, pan, tobacco and intoxicants during the last 30 days. Information on an item has been recorded only if it is consumed.

Block 6: Consumption of fuel & light during the last 30 days.

Block 7: Consumption of clothing, bedding, etc. during the last 30 days and the last 365 days.

Block 8: Consumption of footwear during the last 30 days and the last 365 days.

Block 9: Expenditure on education and medical (institutional) goods and services during the last 30 days and the last 365 days.

Block 10: Expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes during the last 30 days.

Block 11: expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use during last 30 days and last 365 days.

Block 12: Perception of household regarding sufficiency of food

Coverage

GEOGRAPHIC COVERAGE

The survey covered the whole of the Indian Union except (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of the bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

UNIVERSE

The survey used the interview method of data collection from a sample of randomly selected households and members of the household.

Sampling

Sampling Procedure

Sample Design

Outline of sample design: A stratified multi-stage design has been adopted for the 61st round survey. The first stage units (FSU) were the 2001 census villages in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. In case of large villages/blocks requiring hamlet-group (hg)/sub-block (sb) formation, one intermediate stage was the selection of two hgs/sbs from each FSU.

Sampling Frame for First Stage Units: For the rural sector, the list of 2001 census villages (panchayat wards for Kerala) constituted the sampling frame. For the urban sector, the list of latest available Urban Frame Survey (UFS) blocks were considered as the sampling frame.

Stratification: Within each district of a State/UT, two basic strata were formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, if there are one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them also formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum. There were 27 towns with population 10 lakhs or more at all-India level as per census 2001.

Sub-stratification:

Rural sector: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed were ' $r/2$ '. The villages within a district as per frame were first arranged in ascending order of population. Then sub-strata 1 to ' $r/2$ ' were demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population.

Urban sector: If 'u' be the sample size for a urban stratum, ' $u/2$ ' number of sub-strata were formed. The towns within a district, except those with population 10 lakhs or more, were first arranged in ascending order of population. Next, UFS blocks of each town were arranged by IV unit no. × block no. in ascending order. From this arranged frame of UFS blocks of all the towns, ' $u/2$ ' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of UFS blocks.

For towns with population 10 lakhs or more, the urban blocks were first arranged by IV unit no. × block no. in ascending order. Then ' $u/2$ ' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of blocks.

Total sample size (FSUs): 12984 FSUs have been allocated at all-India level on the basis of investigator strength in different States/UTs for central sample and 14104 for state sample.

Deviations from Sample Design

There was no deviation from the original sampling design.

Questionnaires

Overview

Schedule 1.0 of the 61st NSS round consists of the following blocks:

Block 0: Descriptive identification of sample household: This block is meant for recording descriptive identification particulars of a sample household.

Block 1: Identification of sample household

Block 2: Particulars of field operation: The identity of the Investigator, Assistant Superintendent and Superintendent associated, date of survey/inspection/scrutiny of schedules, despatch, etc., has been recorded in this block against the appropriate items in the relevant columns.

Block 3: Household characteristics:

Characteristics which are mainly intended to be used to classify the households for tabulation has been recorded in this block.

Block 4: Demographic and other particulars of household members: All members of the sample household have been listed in this block. Demographic particulars (viz., relation to head, sex, age, marital status and general education) and number of meals taken have been recorded for each member using one line for one member.

Block 5: Consumption of food, pan, tobacco and intoxicants during the last 30 days. Information on an item has been recorded only if it is consumed.

Block 6: Consumption of fuel & light during the last 30 days.

Block 7: Consumption of clothing, bedding, etc. during the last 30 days and the last 365 days.

Block 8: Consumption of footwear during the last 30 days and the last 365 days.

Block 9: Expenditure on education and medical (institutional) goods and services during the last 30 days and the last 365 days.

Block 10: Expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes during the last 30 days.

Block 11: expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use during last 30 days and last 365 days.

Block 12: Perception of household regarding sufficiency of food

LOT/FSU number (Vill_Blk_Slno)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 5

Valid cases: 124644
Invalid: 0

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. This variable indicates the serial number assigned to such units.

Round (Round)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 124644
Invalid: 0

Description

Indicates the NSS round number of this survey.

Schedule Number (ScheduleNumber)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Schedule Number (ScheduleNumber)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Type: Discrete
Format: character
Width: 3

Valid cases: 124644
Invalid: 0

Description

Indicates the schedule number of this survey.

Sample (Sample)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 124644

Sector (Sector)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 124644
Invalid: 0

Description

Sector : A word used for the rural-urban demarcation.

State-Region (St_Region)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 3

Valid cases: 124644
Invalid: 0

Description

Regions are hierarchical domains of study below the level of State/ Union Territory in the NSS.

State (State)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 124644
Invalid: 0

District (District)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 124644
Invalid: 0

Stratum Number (Stratum)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 124644
Invalid: 0

Description

Within each district of a State/ UT, two basic strata were formed:
(i) rural stratum comprising of all rural areas of the district and
(ii) urban stratum comprising of all the urban areas of the district.

Sub-Stratum (SubStratum)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 124644
Invalid: 0

Sub-Round (SubRound)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 124644
Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

Sub-Sample (SubSample)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Sub-Sample (SubSample)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Type: Discrete
Format: character
Width: 1

Valid cases: 124644
Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 124630
Invalid: 0

Description

The entry against this item has been made after collecting all the required information for all the items in the schedule. The entry has been in code on the basis of the impression formed by the investigator regarding overall quality of response of the informant and the informant's perception about the schedule.

Interviewer instructions

This item is to be filled in at the end of the interview. It is meant to classify the informant according to the degree of his co-operation as well as his capability to provide the required information.

Survey Code (Survey_Code)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Survey Code (Survey_Code)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Type: Discrete

Valid cases: 124644

Format: character

Invalid: 0

Width: 1

Description

The item records whether the originally selected household or a substitute household has been surveyed or no household could be surveyed. The entries have been made in terms of codes.

Interviewer instructions

3.1.0 Whether the originally selected sample household has been surveyed or a substituted household has been surveyed will be indicated against this item by recording '1', if it is the originally selected sample household, and '2', if it is the substituted one. If neither the originally selected household nor the substituted household can be surveyed i.e., if the sample household is a casualty, code '3' will be recorded. In such cases only blocks 0, 1, 2, 14 and 15 will be filled in and on the top of the front page of the schedule the word 'CASUALTY' will be written and underlined.

Substitution Code (Substn_Code)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete

Valid cases: 3373

Format: character

Invalid: 0

Width: 1

Description

If the originally selected household could not be surveyed, irrespective of whether a substituted household could be surveyed or not, the reason for the one originally selected becoming a casualty has been recorded against this item in terms of codes.

Interviewer instructions

For an originally selected sample household which could not be surveyed, the reason for not surveying the original household will be recorded against this item in code, irrespective of whether a substitute household could be surveyed or not.

Date of Survey (DateOfSurvey)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Get enough food everyday (B12_q1)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 124446
Invalid: 0

Interviewer instructions

This question is asked in order to know the perception of the household regarding sufficiency of food. While putting this question to the informant, it is thus presumed that the informant has a clear understanding of its meaning. There are equivalent phrases conveying the same meaning in regional languages. It is, therefore, important to put the proper question in the local language and record the answer given by the informant in the appropriate code.

Care should be taken to see that the informant is not offended by this question. The question should, in fact, not be asked to those whose reported consumption would obviously indicate that they get sufficient food to eat. In item 1, if the members of the household are reported as getting enough food every day throughout the year, the code to be entered in the box space of this block is 1. If adequate food is available in only a few months of the year, code 2 will be noted. Code 3 will indicate that the household does not usually get enough food every day for all its members. Here the reference period is last 12 calendar months preceding the date of enquiry.

Month not getting enough food (B12_q2_1)

File: Blocks 1,2 & 12_ Identification of sample household and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 1191
Invalid: 0

Interviewer instructions

If adequate food was available in only some months of the year i.e. if code 2 is recorded in item 1, those calendar months in which all members of the household did not have enough food every day will be recorded in the cells provided against item 2 in codes. For example, suppose all members of a sample household did not have enough food every day in the months of January and March during the reference period. The entries to be made are 01 & 03 in the first two cells of the first row out of the 11 cells provided in the block against item 2.

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

Sub-Sample (SubSample)

File: Block 3 Part 1_ Household Characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 124644
Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Range: 1-43	Mean: 4.9
	Standard deviation: 2.5

Household Size (B3_q1)

File: Block 3 Part 1_Household Characteristics

Description

A group of persons normally living together and taking food from a common kitchen constitutes a household. The word "normally" means that temporary visitors are excluded but temporary stay-aways are included. Thus a son or daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host's household. "Living together" is usually given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria are in conflict; however, in the special case of a person taking food with his family but sleeping elsewhere (say in a shop or a different house) due to space shortage, the household formed by such a person's family members is taken to include the person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc. is considered as a single-member household except that a family living in a hotel (say) is considered as one household only; the same applies to residential staff of such establishments.

Literal question

How many members are there in the household?

Interviewer instructions

The size of the sample household i.e., the total number of persons normally residing together (i.e., under the same roof) and taking food from the same kitchen (including temporary stay-aways and excluding temporary visitors) will be recorded against this item. This number will be same as the last serial number recorded in column 1 of block 4.

NIC Code(5-digit) (B3_q2)

File: Block 3 Part 1_Household Characteristics

Overview

Type: Discrete

Format: character

Width: 5

Valid cases: 116852

Invalid: 0

Literal question

Which industry are the members working in?

Interviewer instructions

The description of the principal household industry will be recorded in the space provided. The description of the principal industry should be recorded in as specific terms as possible based on the description given by the informant. In other words, the industry description should not be copied from the NIC booklet if the informant's description gives a clearer idea of the industrial activity which determines the principal industry of the household. The entry cell for item 2 has been split into five parts for recording each digit separately. The appropriate five-digit industry code of the NIC-1998 will be recorded here. For households deriving income from non-economic activities only, a dash (-) may be put against this item.

NCO Code(3-digit) (B3_q3)

File: Block 3 Part 1_Household Characteristics

Overview

Type: Discrete

Format: character

Width: 3

Valid cases: 116867

Invalid: 0

Literal question

Which occupation are the members in?

Interviewer instructions

The description of the principal household occupation will be recorded in the space provided. As in case of principal household industry, the description of the principal occupation, too, should be recorded in as specific terms as possible based on the description given by the informant. In other words, the occupation description should not be copied from the NCO booklet if the informant's description gives a clearer idea of the principal occupation pursued by the household. The appropriate three-digit occupation code of the NCO-1968 is to be recorded in the entry cell, which has been trisected for recording each digit separately. For households deriving income from non-economic activities only, a dash (-) may be put against this item.

Household type (B3_q4)

File: Block 3 Part 1_Household Characteristics

Overview

Type: Discrete	Valid cases: 124516
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

The household type code based on the means of livelihood of a household will be decided on the basis of the sources of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income from economic activities will be considered; the incomes of servants and paying guests will not be taken into account.

Household type with sector (HH_Type)

File: Block 3 Part 1_Household Characteristics

Overview

Type: Discrete	Valid cases: 124644
Format: character	Invalid: 0
Width: 2	

Religion (B3_q5)

File: Block 3 Part 1_Household Characteristics

Overview

Type: Discrete	Valid cases: 124633
Format: character	Invalid: 0
Width: 1	

Literal question

Which religion does the household belong to?

Interviewer instructions

The religion of the household will be recorded against this item in code. If different members of the household claim to belong to different religions, the religion of the head of the household will be considered as the religion of the household.

Social Group (B3_q6)

File: Block 3 Part 1_Household Characteristics

Overview

Type: Discrete	Valid cases: 124603
Format: character	Invalid: 0
Width: 1	

Literal question

Which social group does the household belong to?

Interviewer instructions

Whether or not the household belongs to scheduled tribe, scheduled caste or other backward class will be indicated against this item in terms of the specified codes which are:

scheduled tribe..... 1 other backward class..... 3
 scheduled caste..... 2 others..... 9

Those who do not come under any one of the first three social groups will be assigned code 9, meant to cover all other categories. In case different members belong to different social groups, the group to which the head of the household belongs will be considered as the 'social group' of the household.

Whether owns any land? (B3_q7)

File: Block 3 Part 1_Household Characteristics

Overview

Type: Discrete	Valid cases: 124581
Format: character	Invalid: 0
Width: 1	

Literal question

Whether household owns any land?

Interviewer instructions

It is to be ascertained whether the household owns any land or not as on the date of survey.

Type of land owned (B3_q8)

File: Block 3 Part 1_Household Characteristics

Overview

Type: Discrete	Valid cases: 106223
Format: character	Invalid: 0
Width: 1	

Literal question

What type of land is owned by the household?

Interviewer instructions

Homestead of household is defined as the dwelling house of the household together with any courtyard, compound, garden, out-house, place of working, family courtyard, guest-house, shop, workshop/offices for running household enterprises, tanks, wells, latrines, drains and boundary walls which are annexed to the dwelling house. All land coming under homestead is defined as homestead land.

Codes will be recorded against the item depending on the type of land owned. If the household owns only homestead and no other land, the appropriate code will be 1. But if the household owns some other piece of land along with homestead land, code 2 will be entered against this item. Code 3 will be applicable when a household owns a piece of land but not the homestead land. It is also to be noted here that gardens, orchards or plantation annexed to the dwelling house should also be covered under homestead land.

Sub-Round (SubRound)

File: Block 3 Part 2_ Household Characteristics

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 124644
 Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

Sub-Sample (SubSample)

File: Block 3 Part 2_ Household Characteristics

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 124644
 Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Dwelling unit code (B3_q16)

File: Block 3 Part 2_Household Characteristics

Overview

Type: Discrete	Valid cases: 124605
Format: character	Invalid: 0
Width: 1	

Description

This item refers only to the dwelling unit or the actual residence of the sample household. The dwelling unit may be an entire structure or may be only a part of a structure.

Dwelling unit code (B3_q16)

File: Block 3 Part 2_Household Characteristics

Literal question

Do you own the dwelling unit? Or is it hired or otherwise occupied?

Interviewer instructions

This item refers only to the dwelling unit or the actual residence of the sample household. The dwelling unit may be the entire structure for one household or may be only a part of it. Accordingly, the investigator will ask the informant if it is owned, hired or otherwise occupied. If the occupant owns the dwelling unit, code 1 will be recorded against item 8. If it is taken on rent, code 2 will be entered and if it is occupied otherwise, code 9 will apply. However, if any household is found living under a tree or bridge, in a pipe, etc., this will not be treated as living in a dwelling unit. For such households, code 3 will be recorded. It may be noted that a dwelling unit constructed on a plot of land which is taken under long-term lease, usually 30 years or more, will be considered as being held under owner-like possession. Similarly, a dwelling unit itself possessed by a household under a long-term lease may be treated as under owner-like possession and code 1 will be applicable in such cases also.

Cooking code (B3_q17)

File: Block 3 Part 2_Household Characteristics

Overview

Type: Discrete

Format: character

Width: 2

Valid cases: 124337

Invalid: 0

Literal question

What is the primary source of energy that is being used by the household for cooking?

Interviewer instructions

Against these two items, the code corresponding to the primary source of energy that is used by the household for cooking and the primary source of energy used for lighting during the last 30 days preceding the date of survey will be recorded. If more than one type of energy is used, the primary or principal one will have to be identified on the basis of extent of use and the corresponding code will be noted in the appropriate box.

Lighting code (B3_q18)

File: Block 3 Part 2_Household Characteristics

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 124583

Invalid: 0

Literal question

What is the primary source of energy that is being used by the household for lighting?

Interviewer instructions

Against these two items, the code corresponding to the primary source of energy that is used by the household for cooking and the primary source of energy used for lighting during the last 30 days preceding the date of survey will be recorded. If more than one type of energy is used, the primary or principal one will have to be identified on the basis of extent of use and the corresponding code will be noted in the appropriate box.

Regular salary income? (B3_q19)

File: Block 3 Part 2_Household Characteristics

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 124594

Invalid: 0

Literal question

Regular salary income? (B3_q19)

File: Block 3 Part 2_Household Characteristics

Is any member of the household a regular salary earner?

Interviewer instructions

The distinction between a casual wage labourer and a regular salary earner lies in whether a daily or periodic renewal of work contract takes place in the normal course of employment or not. A daily or periodic renewal of the work contract is a normal feature of a casual wage labourer's employment, but not of a regular salary earner. Sometimes financial constraints of the employer may prevent a salary earner from receiving his/her salary regularly; but this will not change his/her status as a regular salary earner. Again, a regular salary earner may receive wages monthly or weekly; what is important is that his/her work contract does not require a daily, weekly, monthly or annual renewal. Whether a person is receiving time wage or piece wage is also not relevant in deciding whether the person is a regular salary earner. Paid apprentices may also be regular salary earners.

Possess ration card? (B3_q20)

File: Block 3 Part 2_Household Characteristics

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 124618

Invalid: 0

Literal question

Does the household possess ration card?

Interviewer instructions

It is to be ascertained whether the household is having any ration card (see paragraph 3.3.22 for details). If so, code '1' is to be given, else code '2' may be recorded against this item.

Type of ration card (B3_q21)

File: Block 3 Part 2_Household Characteristics

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 95182

Invalid: 0

Literal question

What type of ration card does the household has?

Interviewer instructions

For households who report possession of ration card, it is to be ascertained whether any of the two special types of ration card - BPL and Antodaya - have been issued to the household by the Government. The BPL (Below Poverty Line) ration card is issued to families adjudged to be living below the poverty line. The Antodaya ration card is meant for the ultra-poor and may be issued to a family if it is considered to be sufficiently below the poverty line. A household will be given code 1 if it possesses an Antodaya ration card and code 2 if it possesses a BPL ration card. If the household possesses a ration card other than the above two kinds, it will be given code 3. For households reporting no in item 20, a dash(-) will be entered in item 21.

Performm Ceremony? (B3_q26)

File: Block 3 Part 2_Household Characteristics

Overview

Type: Discrete	Valid cases: 124414
Format: character	Invalid: 0
Width: 1	

Description

Ceremonies are frequently performed to solemnize some events of life such as birth, marriage, etc. There are also rites consequent upon the death of a person. Such ceremonies may be performed by household members as required under the social/religious customs without incurring expenditure for entertaining guests. On the other hand, some households may spend a considerable amount of money for entertaining guests with meals during these occasions. Only the latter type of ceremony, in other words, only those ceremonies on which guests are entertained with meals (not just snacks) will be considered for the purposes of item 15 as ceremonies performed. Even an occasion which is not a traditional occasion for celebration or social gathering will be considered a ceremony if meals are served to a large number of guests by the household.

Literal question

Did the household perform any ceremony during the last 30 days?

Interviewer instructions

If the household is found to have performed any ceremony during the last 30 days, then code '1' will be recorded against this item. Otherwise, '2' will be recorded.

Education (B4_q7)

File: Block 4_Person records

Overview

Type: Discrete
 Format: character
 Width: 2

Valid cases: 608546
 Invalid: 0

Literal question

Education of the member

Interviewer instructions

Information regarding the level of general education attained by the members of the household listed will be recorded in this column in terms of the specified codes. For the purpose of making entries in this column, only the course successfully completed will be considered. For instance, for a person who has studied up to say, first year B.A., his/her educational attainment will be considered as higher secondary (code 07). For a person who has studied up to 12th standard but has not appeared for the final examination or has failed, educational attainment will be considered as 'secondary' (code 06).

Days Stayed away (B4_q8)

File: Block 4_Person records

Overview

Type: Continuous
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 0-30

Valid cases: 164938
 Invalid: 444798
 Minimum: 0
 Maximum: 30
 Mean: 1.5
 Standard deviation: 4.5

Days Stayed away (B4_q8)

File: Block 4_Person records

Literal question

How many number of days the member has stayed away from home during last 30 days?

Interviewer instructions

The number of days for which the member 'stayed away from home' during the 30 days preceding the date of enquiry should be recorded here. A continuous absence from home for 24 hours will be reckoned as a 'day stayed away'. That is, the entry will be made in completed number of days and any fraction of a day will be ignored. The location of the place where the person stayed, having been away from his/her own household, may also be within the same village/town and staying away will not only mean physical absence but also non-participation in food consumption from his/her own household. For example, if a member stayed away for two days, but consumed food prepared at home during these two days, then that member will not be considered as staying away. For members who did not stay away for even one day during the last 30 days, zero (0) will be recorded.

No. of Meals per day (B4_q9)

File: Block 4_Person records

Overview

Type: Continuous	Valid cases: 609513
Format: numeric	Invalid: 223
Width: 1	Minimum: 0
Decimals: 0	Maximum: 3
Range: 0-3	Mean: 2.4
	Standard deviation: 0.6

Literal question

How many number of meals are usually taken in a day?

Interviewer instructions

The number of meals consumed by a person is usually reported as 2 or 3. In rare cases, one may come across a person who may be taking food only once in a day or more than three times a day. While in the former case the number of meals for the person will be 1 per day, in the latter case, however, only 3 should be entered. That is, in this column, the recorded number of meals taken in a day, even if it is reported to be higher, should not exceed 3. To have a clear idea of what constitutes a meal, paragraph 1.7.12 may be referred to. In addition, for infants of age '0' as well as for children who subsist on milk only, '0' may be recorded against this item.

Meals (School) (B4_q10)

File: Block 4_Person records

Overview

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 5741182
Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

Sub-Sample (SubSample)

File: Block 5_Monthly consumption of food, pan, tobacco and intoxicants

Overview

Sub-Sample (SubSample)

File: Block 5_Monthly consumption of food, pan, tobacco and intoxicants

Type: Discrete
 Format: character
 Width: 1

Valid cases: 5741182
 Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Stratum Number (Stratum)

File: Block 7_Consumption of clothing

Type: Discrete
 Format: character
 Width: 2

Valid cases: 1076660
 Invalid: 0

Description

Within each district of a State/ UT, two basic strata were formed:
 (i) rural stratum comprising of all rural areas of the district and
 (ii) urban stratum comprising of all the urban areas of the district.

Sub-Stratum (SubStratum)

File: Block 7_Consumption of clothing

Overview

Type: Discrete
 Format: character
 Width: 2

Valid cases: 1076660
 Invalid: 0

Sub-Round (SubRound)

File: Block 7_Consumption of clothing

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 1076660
 Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

Sub-Sample (SubSample)

File: Block 7_Consumption of clothing

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 1076660
 Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

File: Block 10_Monthly expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes

Type: Discrete
Format: character
Width: 1

Valid cases: 2378390
Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Whether possesses? (B11_q3)

File: Block 11_Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 1121810
Invalid: 0

Literal question

Whether the household possesses the item?

Interviewer instructions

It is to be ascertained whether the household possesses the durable goods as on the date of survey. If so, '1' will be entered, otherwise '2' will be recorded here. It will also include those items which may not be in use temporarily but are likely to be put into use after repair/necessary servicing. For certain items the entry cell has been shaded in this column; this means that column (3) need not be filled in.

First-hand purchase:Value(30) (B11_q4)

File: Block 11_Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Width: 6	Minimum: 0
Decimals: 0	Maximum: 415800
Range: 0-415800	Mean: 955.7
	Standard deviation: 6965.3

Literal question

How much is the value of the first hand item purchased in the last 30 days?

Interviewer instructions

Value of first-hand purchase during the reference period will be entered in this column. The total amount paid during the reference period will be recorded here.

Cost-raw material,service & repair (B11_q5)

File: Block 11_Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Continuous	Valid cases: 81690
Format: numeric	Invalid: 1543701
Width: 6	Minimum: 0
Decimals: 0	Maximum: 300000
Range: 0-300000	Mean: 205
	Standard deviation: 2649.9

Literal question

How much is the total cost of raw material, service & repair done in the last 30 days?

Interviewer instructions

This column is for recording expenditure on materials and services for construction, assemblage, repair and maintenance of all durable goods - first-hand as well as second-hand. Value of durable goods constructed will comprise value of raw materials, services and/or labour charges and any other charges. The total value of raw materials, services and labour charges will be recorded in this block. Here, expenditure incurred towards repair and maintenance of items purchased on second-hand will also be accounted.

Note: 1. The purchase value of a consumer durable constructed or repaired by an artisan for his/her domestic use will be the aggregate of the purchase value of the raw material components used and imputed value of his/her services for its construction/repairs.

2. If an article is repaired during the reference period by one of the sample household members then the repair charges will be imputed and recorded against appropriate item only if the household member is a professional for that repairing job.

Second-hand purchase:Value(30) (B11_q6)

File: Block 11_Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use
