#### ID NUMBER

DDI-IND-MOSPI-NSSO-45Rnd-Sch1.0-1989

### Version

---

#### VERSION DESCRIPTION

V1.0; Re-organised anonymised dataset for public distribution.

#### PRODUCTION DATE

2012-04-17

## Overview

---

#### ABSTRACT

The National Sample Survey Organisation (NSSO) has been carrying out All-India surveys on consumer expenditure. While some of these smaller-scale surveys are spread over a full year and others over six months only, the quinquennial (full-scale) surveys have all been of a full year's duration. Household consumer expenditure is measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It includes the imputed values of goods and services, which are not purchased but procured otherwise for consumption. In other words, it is the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. Any expenditure incurred towards the productive enterprises of the households is also excluded from household consumer expenditure. To minimise recall errors, a very detailed item classification is adopted to collect information, including items of food, items of fuel, items of clothing, bedding and footwear, items of educational and medical expenses, items of durable goods and other items. The schedule has also collected some other household particulars including age, sex and educational level etc. of each household member. The schedule design for the survey is more or less similar to that adopted in the previous rounds.

#### KIND OF DATA

Sample survey data [ssd]

#### UNITS OF ANALYSIS

Randomly selected households based on sampling procedure and members of the household

## Scope

---

#### NOTES

The NSSO surveys on consumer expenditure aim to measure the household consumer expenditure in quantitative terms disaggregated by various household characteristics.

The data for this survey is collected in the NSS Schedule 1.0 used for household consumer expenditure. For this round, the schedule had 9 blocks.

Blocks 1 and 2 - are similar to the ones used in usual NSS rounds. These are used to record identification of sample households and particulars of field operations.

Block-3: Household characteristics like, household size, principal industry-occupation, social group, land possessed and cultivated etc. are recorded in this block.

Block-4: In this block detailed demographic particulars including age, sex, educational level, marital status, number of meals

usually taken in a day etc. are recorded.

Block-5: In this block cash purchase and consumption of food, pan, tobacco, intoxicants and fuel & light during the last 30 days are recorded.

Block-6.1: Consumption of clothing during the last 30 is recorded in this block.

Block-7.1: Consumption of footwear during the last 30 is recorded in this block.

Block-8 : Expenditure on miscellaneous goods and services and rents and taxes during the last 30 days has been recorded in this block.

Block-9 : Expenditure for purchase and construction (including repairs) of durable goods for domestic use during the last 30 days has been recorded here.

## Coverage

### GEOGRAPHIC COVERAGE

The survey covered practically the whole of Indian Union.

### UNIVERSE

The survey used the interview method of data collection from a sample of randomly selected households and members of the household.

#### Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Response Code

#### Interviewer instructions

The type of informant, considering his cooperation and capability in providing the required information, will be recorded against this item in terms of specified response codes.

## Survey Code (Survey\_Code)

### File: Blocks 1,3\_Household Characteristics

#### Overview

Type: Discrete  
Format: character  
Width: 1

Valid cases: 28764  
Invalid: 0

#### Literal question

Survey Code

#### Interviewer instructions

Survey code : Whether the originally selected sample household has been surveyed or a substituted household has been surveyed will be indicated against this item by recording '1' if it is the originally selected sample household, and '2' if it is the substituted one. If neither the originally selected household nor the substituted household could be surveyed i.e., if the sample household was a casualty, code '3' would be recorded. In such cases only blocks 0,1, 2, 13 and 14 will be filled up and on the top of the front page of the schedule the word 'CASUALTY' will be written and underlined.

## Reason for substitution (Substn\_Code)

Valid cases: 546  
Invalid: 0

#### Literal question

Reason for substitution

#### Interviewer instructions

Reason for substitution : For the originally selected sample household which could not be surveyed, the reason for its becoming a casualty will be recorded against this item in terms of the specified codes.

## Household size (B3\_1\_q1)

### File: Blocks 1,3\_Household Characteristics

#### Overview

Type: Continuous  
Format: numeric  
Width: 2  
Decimals: 0

Valid cases: 28780  
Invalid: 0

#### Description

## Household size (B3\_1\_q1)

### File: Blocks 1,3\_Household Characteristics

Household :

A group of persons normally living together and taking food from a common kitchen constitutes a household. The word "normally" means that temporary visitors are excluded but temporary stay-aways are included. Thus a son or daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host's household. "Living together" is usually given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria are in conflict; however, in the special case of a person taking food with his family but sleeping elsewhere (say in a shop or a different house) due to space shortage, the household formed by such a person's family members is taken to include the person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc. is considered as a single-member household except that a family living in a hotel (say) is considered as one household only; the same applies to residential staff of such establishments.

#### Literal question

Total members in the household?

#### Interviewer instructions

The size of the sample household i.e., the total number of persons normally residing together (i.e., under the same roof) and taking food from the same kitchen (including temporary stayaways and excluding temporary visitors) will be recorded against this item. This number will be same as the last serial number recorded in column 1 of block 4.

## NIC Code (B3\_1\_q2a)

### File: Blocks 1,3\_Household Characteristics

#### Overview

Type: Discrete  
Format: character  
Width: 3

Valid cases: 27024  
Invalid: 0

#### Literal question

Which industry are you working in?

#### Interviewer instructions

The description of the principal household industry-occupation will be recorded in the space provided. The right hand side of item 2 has been divided into two lines. The appropriate three digit industry code of the NIC 1970 will be recorded in the first line and the relevant occupation family of the NCO 1968 will be entered in the second line.

To determine the principal household industry-occupation, the general procedure to be followed is to list all the gainful occupations pursued by the members of the household excluding those employed by the household and paying guests (who in view of their staying and taking food in the household are considered as its normal members) during the one year period preceding the date of survey, no matter whether such occupations are pursued by the members in their principal or subsidiary (on the basis of earnings) capacity. Out of the occupations listed, that one which fetched the maximum earnings to the household during the last 365 days preceding the date of survey would be considered as the principal household occupation. It is quite possible that the household occupation, thus determined as the principal one, may be pursued in different industries by one or more members of the household. In such cases, the particular industry out of all the different industries corresponding to the principal occupation, which fetched the maximum earnings, should be considered as the principal industry of the household. In extreme cases, the earnings may be equal in two different occupations or industry-occupation combinations. By convention, in such cases, priority will be given to the occupation or industry-occupation combination of the senior most among the participating members. For households deriving income from non-gainful activities only, a dash (-) may be put against this item.

## NCO Code (B3\_1\_q2b)

### File: Blocks 1,3\_Household Characteristics

#### Overview

Type: Discrete  
Format: character  
Width: 3

Valid cases: 26886

#### Description

Household consumer expenditure :

The expenditure incurred by a household on domestic consumption during the reference period is the household's consumer expenditure. The household consumer expenditure is the total of the monetary values of consumption of various groups of items namely (i) food, pan (betel leaves), tobacco, intoxicants and fuel & light, (ii) clothing and footwear and (iii) miscellaneous goods and services and durable articles.

Monthly per capita expenditure (MPCE) :

For a household, this is household consumer expenditure over a period of 30 days divided by household size. A person's MPCE is understood as that of the household to which he/she belongs.

## Source of energy for cooking (B3\_1\_q20)

### File: Blocks 1,3\_Household Characteristics

#### Overview

Standard deviation: 4.5

#### Literal question

Days stayed away

#### Interviewer instructions

## Days Stayed away (B4\_q8)

### File: Block 4\_Person records

The number of days for which the member 'stayed away from home ' during the 30 days preceding the date of enquiry should be recorded here. A continuous absence from home for 24 hours will be reckoned as a 'day stayed away'. That is, the entry will be made in completed number of days and any fraction of a day will be ignored. The location of the place where the person stayed, having been away from his/her own household, may also be within the same village/town and staying away will not only mean physical absence but also non- participation in food consumption from his/her own household.

## No. of Meals per day (B4\_q9)

### File: Block 4\_Person records

#### Overview

Type: Continuous  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-3

Valid cases: 138606  
Invalid: 16

#### Description

Meal

A 'Meal' is composed of one or more readily cat able (generally cooked) items of food, the usual major constituent of which is cereal food. The meals consumed by a person twice or thrice a day provide him/her the required energy of (calorie) and other nutrients for living and for pursuing his/her normal avocations. A 'meal' as opposed to 'snacks ' as opposed to 'snacks', 'nasta' or 'high tea' , contains larger quantum and variety of food. In rare cases, a full meal may contain larger quantity of non-cereal food. Even that, if the total quantum of food in plate is heavy as a meal, the contents of the food plate will also be considered as a meal. Sometimes the contents of a 'nasta' may not be very different from the contents of a 'meal'. The difference in quantity will there be the guiding factor for deciding whether the plate is to be led as a 'meal ' or a nasta.

#### Literal question

No. of Meals per day

#### Interviewer instructions

The number of meals consumed by a person is usually reported as 2 or 3. In rare cases, one may come across a person who may be taking food only once in a day or more than three times a day. While in the former case the number of meals for the person will be 1 per day, in the latter case, however, only 3 should be entered. That is, in this column, the recorded number of meals taken in a day, even if it is reported to be higher, should not exceed 3. A breast-fed baby does not directly share the food consumed by members of the household. Hence for such babies the entry in this column will be '0'.

## Meals (Free of cost) (B4\_q10)

Standard deviation: 1480.3

**Literal question**

How much was spent by the household in cash and kind on first hand purchase of the item in the last 30 days?

## Cost of Raw material,service & repair - in cash (B9\_1\_q8)

### File: Block 9pt1\_Monthly household expenditure on durables

#### Overview

Type: Continuous	Valid cases: 1133
Format: numeric	Invalid: 3345
Width: 7	Minimum: 0
Decimals: 2	Maximum: 2800
Range: 0-2800	Mean: 64.9
	Standard deviation: 151

#### Literal question

How much was spent by the household in cash towards the cost of raw material, service & repair in the last 30 days?

#### Interviewer instructions

This column is for recording expenditure on materials and services for construction, assemblage, repair and maintenance of all durable goods - first-hand as well as second-hand. Value of durable goods constructed will comprise value of raw materials, services and/or labour charges and any other charges. The total value of raw materials, services and labour charges will be recorded in this block. Here, expenditure incurred towards repair and maintenance of items purchased on second-hand will also be accounted.

## Cost of Raw material,service & repair - in cash & kind (B9\_1\_q9)
