Overview

ABSTRACT

The National Sample Survey Organisation (NSSO) has been carrying out All-India surveys quinquennially on consumer expenditure and employment - unemployment. The 50th round (July 1993 - June 1994) was the Fifth quinquennial survey on Consumer Expenditure and Employment - Unemployment. The previous four quinquennial surveys were the 27th (Oct. 1972 - Sept. 1973), the 32nd (Jul.1977 - Jun. 1978), the 38th (Jan. - Dec. 1983) and 43rd (Jul. 1987 - Jun. 1988) rounds. In other rounds of NSS, also, a consumer expenditure inquiry on a limited scale was being carried out from the 42nd round (1986-87) onwards. From the 45th round onwards the subject coverage of this schedule has been expanded to include some important questions on employment so that an annual series of consumer expenditure and employment data is now available. While some of these smaller-scale surveys are spread over a full year and others over six months only, the quinquennial (full-scale) surveys have all been of a full year's duration. Household consumer expenditure is measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It includes the imputed values of goods and services, which are not purchased but procured otherwise for consumption. In other words, it is the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. The imputed rent of owner-occupied houses is excluded from consumption expenditure. Any expenditure incurred towards the productive enterprises of the households is also excluded from household consumer expenditure. The household consumer expenditure schedule used for the survey collected information on quantity and value of household consumption with a reference period of "last 30 days" for some items of consumption and "last 365 days" for some less frequently purchased items. To minimise recall errors, a very detailed item classification was, as usual, adopted to collect information, including 148 items of food, 13 items of fuel, 28 items of clothing, bedding and footwear, 18 items of educational and medical expenses, 52 items of durable goods, and about 85 other items. The schedule also collected some other household particulars including age, sex and educational level etc. of each household member.

The schedule design for the survey was more or less similar to that adopted in the previous quinquennial round. The field work for the survey was conducted, as usual, by the Field Operations Division of the Organisation. The collected data were processed by the Data Processing Division of NSSO and tabulated by the Computer Centre of Department of Statistics. The reports have been prepared by Survey Design & Research Division (SDRD) of NSSO under the guidance of the Governing Council, NSSO.

Data layout of this round is not in accordance with the questionnaire. Some additional variables have been generated for tabulation which the users can ignore.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected households based on sampling procedure and members of the household

Scope

NOTES

The NSSO surveys on consumer expenditure aim to measure the household consumer expenditure in quantitative terms disaggregated by various household characteristics .

The data for this survey was collected in the NSS Schedule 1.0 used for household consumer expenditure. For this round, the schedule had 14 blocks.

Blocks 0, 1 and 2 - were similar to the ones used in usual NSS rounds. These were used to record identification of sample households and particulars of field operations.

Block-3: Household characteristics like, household size, principal industry-occupation, social group, land possessed and cultivated, use of hired labour, monthly per capita expenditure etc. were recorded in this block.

Block-4: In this Block the detailed demographic particulars including age, sex, educational level, marital status, number of meals usually taken in a day etc. were recorded. Besides this, information on consumption of tobacco was also recorded in this block.

Block-5: In this block cash purchase and consumption of food, pan, tobacco, intoxicants and fuel and light during the last 30 days were recorded.

Block-6: Block 6 was used to record the information of cash purchase and consumption of clothing during the last 30 and 365 days.

Block-7 : Further probing questions on the cash purchase and consumption of footwear during the last 30 and 365 days were made in this block.

Block-8: - Expenditure (cash and kind) on the miscellaneous goods and services and rents & taxes during the last 30 days and expenditure (cash & kind) on educational and medical goods and services during the last 30 days and 365 days were recorded in blocks 8 and 8.1 respectively.

Block-9: In Block 9, questions were asked about expenditure (cash and kind) for the purchase and construction (including repair) of durable goods for domestic use during the last 30 and 365 days.

Block-10: Block 10 was canvassed to record the perception of household regarding sufficiency of food.

Block 11 - In this block insurance particulars of the household during the last 365 days were recorded.

Block 12 - In this block particulars of dwelling unit were recorded.

Block 13 - In this block particulars of ceremonies performed and meals served by the household during the last 30 and 365 days were recorded.

Block 14 - Contains the summary of consumer expenditure during the last 30 days.

Coverage

GEOGRAPHIC COVERAGE

The survey period of the 50th round was from July 1993 to June 1994. The geographical coverage of the survey was to be the whole of the Indian Union except Ladakh and Kargil districts of Jammu & Kashmir, 768 interior villages of Nagaland and 172 villages in Andaman & Nicobar Islands which remain inaccessible throughout the year. However, certain districts of Jammu & Kashmir viz., Doda, Anantnag, Pulwama, Srinagar, Badgam, Baramula and Kupwara, and Punjab's Amritsar district, had to be excluded from the survey due to unfavourable field conditions.

UNIVERSE

The survey used the interview method of data collection from a sample of randomly selected households and members of the household.

Sampling

Sampling Procedure

The sample design adopted for this round of survey was similar to that followed in the past surveys in its general aspects. The general scheme was a two stage stratified design with the first stage units being villages in the rural areas and urban frame survey blocks (UFS) in the urban areas. The second stage units were the households.

Sampling frame for first stage units:

The latest available lists of census villages (which are mostly the 1981 census lists) constitute the sampling frame for the rural sector. For Nagaland, the villages located within 5kms of a bus route constitute the sampling frame whereas, for Andaman & Nicobar Islands, the list of accessible villages constituted the sampling frame. For the urban sector, the lists of NSSO Urban Frame Survey (UFS) blocks have been considered as the sampling frame. However, for some of the newly declared towns of 1991 census for which UFS frame has not been received, the lists of 1991 census EBs have been considered as the sampling frame.

Region formation and stratification:

States were divided into regions by grouping contiguous districts similar in respect of population density and cropping pattern. In rural sector each district was treated a separate stratum if the population was below 2 million and where it exceeded 2 million, it was split into two or more strata. This cut off point of population was taken as 1.8 million (in place of 2 million) for the purpose of stratification for districts for which the 1981 census frame was used. In the urban sector, strata were formed, within each NSS region on the basis of population size class of towns. However, for towns with population of 4 lakhs or more the urban blocks were divided into two classes viz. one consisting of blocks inhabited by affluent section of the population and the other consisting of the remaining blocks.

Selection of first stage units :

Selection of sample villages was done circular systematically with probability proportional to population and sample blocks circular systematically with equal probability. Both the sample villages and the sample blocks were selected in the form of two or more independent sub-samples. In Arunachal Pradesh the procedure of cluster sampling has been followed. Further large villages/blocks having present population of 1200 or more were divided into a suitable number of hamlet- groups/ sub-blocks having equal population content. Two hamlet- groups were selected from the larger villages while one sub-block was selected in urban sector for larger blocks.

Selection of households :

While listing the households in the selected villages, certain relatively affluent households were identified and considered as second stage stratum 1 and the rest as second stage stratum 2.

A total of 10 households were surveyed from the selected village/hamlet-groups, 2 from the first category and remaining from the second.

Further in the second stage stratum-2, the households were arranged according to the means of livelihood. The means of livelihood were identified on the basis of the major source of income as i) self-employed in non-agriculture, ii) rural labour and iii) others. The land possessed by the households was also ascertained and the frame for selection was arranged on the basis of this information.

The households were selected circular systematically from both the second stage strata.

In the urban blocks a different method was used for arranging the households for selection. This involved the identification means of livelihood of households as any one of a) self-employed, b) regular salaried/wage earnings, c) casual labour, d) others. Further the average household monthly per capita consumer expenditure (mpce) was also ascertained. All households with MPCE of (i) Rs. 1200/- or more (in towns with population less than 10 lakhs or (ii) Rs. 1500/- or more (in towns with population 10 lakh or more) formed second-stage stratum 1 and the rest, second-stage stratum 2. The households of second-stage stratum 2 were arranged according to means of livelihood class and MPCE ranges before selection of sample households. A total of 10 households were selected from each sample block as follows
(i) For affluent strata/classes : 4 households from second- stage stratum 1 and 6 households from second-stage stratum 2
(ii) For other strata/classes : 2 households from second-stage stratum 1 and 8 from second-stage stratum 2.
Households were then selected circular systematically with a random start.

Shortfall in the required number of household in any second-stage stratum was made up by increasing the quota for the other second stage stratum.

A total of 7284 sample villages (Rural) and 4792 sample blocks (Urban) were allotted in central sample. 6983 sample villages and 470 sample blocks were successfully surveyed covering 356351 persons in sample villages and 208389 persons in sample blocks.

Deviations from Sample Design

There was no deviation from the original sampling design.

Weighting

Two different weights have been provided in each file in the data set. Details are as follows:-

1. Weight for each sub sample is stored in the variable name : Wgt_SubSample
2. Combined subsample weight is stored in the variable name : Wgt_Combined

Questionnaires

Overview

Summary description of the schedule 1.0 on consumer expenditure for NSS 50th round consisted of 14 blocks is given below.

Blocks 0, 1 and 2 - identification of sample households and particulars of field operations.

Blocks 3.1 and 3.2 - Household Characteristics.

Block 3.3 - Particulars of goods and services received as part of wages and salaries or perquisites and gifts given and gifts received by the household during the last 30 days

Block 4 - Particulars of household members

Block 5 - Cash purchase and consumption of food, pan, tobacco, intoxicants and fuel and light during the last 30 days

Block 6.1 - Cash purchase and consumption of clothing during the last 30 days

Block 6.2 - Cash purchase and consumption of clothing during the last 365 days

Block 7.1 - Cash purchase and consumption of footwear during the last 30 days

Block 7.2 - Cash purchase and consumption of footwear during the last 365 days

Block 8 - Expenditure (cash and kind) on the miscellaneous goods and services and rents & taxes during the last 30 days

Block 8.1 - Expenditure (cash & kind) on educational and medical goods and services during the last 30 days and 365 days

Block 9.1 - Expenditure (cash and kind) for purchase and construction (including repair) of durable goods for domestic use during the last 30 days

Block 9.2 - Expenditure (cash and kind) for purchase and construction (including repair) of durable goods for domestic use during the last 365 days

Block 10 - Perception of household regarding sufficiency of food

Block 11 - Insurance particulars of the household during the last 365 days

Block 12 - Particulars of dwelling unit

Block 13.1 - Particulars of ceremonies performed and meals served by the household during the last 30 days

Block 13.2 - Particulars of ceremonies performed and meals served by the household during the last 365 days

Block 14 - Summary of consumer expenditure during the last 30 days

File Description

Variable List

Blocks 1,2,3,10,11,12,13_Household characteristics

Content	This data file contains records on household characteristics from various blocks. Blocks 0, 1 and 2 record identification of sample households and particulars of field operations. Household characteristics like, household size, principal industry-occupation, social group, land possessed and cultivated, use of hired labour, monthly per capita expenditure etc. have been recorded in block 3. Block 10 records the perception of household regarding sufficiency of food. Insurance particulars of the household during the last 365 days have been recorded in block 11. Particulars of dwelling unit have been recorded in block 12. Particulars of ceremonies performed and meals served by the household have been recorded in block 13.

V513	B10_q3	Whether Item_63 (Do all members get two square meals?) actually asked from the informant	discrete	character	Whether the question "Do all members get two square meals?" was actually asked from the informant?
V514	B11_Ins_Type_1	Insurance Type	discrete	character	Which type of insurance policy has been made by the household in the last year?
V515	B11_Yrly_Prem_1	Yearly premium	contin	numeric	How much yearly premium do you pay on account of the insurance policy?
V516	B11_Ins_Type_2	Insurance Type	discrete	character	Which type of insurance policy has been made by the household in the last year?
V517	B11_Yrly_Prem_2	Yearly premium	contin	numeric	How much yearly premium do you pay on account of the insurance policy?
V518	B11_Ins_Type_3	Insurance Type	discrete	character	Which type of insurance policy has been made by the household in the last year?
V519	B11_Yrly_Prem_3	Yearly premium	contin	numeric	How much yearly premium do you pay on account of the insurance policy?
V520	B11_Ins_Type_4	Insurance Type	discrete	character	Which type of insurance policy has been made by the household in the last year?
V521	B11_Yrly_Prem_4	Yearly premium	contin	numeric	How much yearly premium do you pay on account of the insurance policy?
V522	B11_Ins_Type_5	Insurance Type	discrete	character	Which type of insurance policy has been made by the household in the last year?
V523	B11_Yrly_Prem_5	Yearly premium	contin	numeric	How much yearly premium do you pay on account of the insurance policy?
V524	B11_Ins_Type_6	Insurance Type	discrete	character	Which type of insurance policy has been made by the household in the last year?
V525	B11_Yrly_Prem_6	Yearly premium	contin	numeric	How much yearly premium do you pay on account of the insurance policy?
V526	B11_Ins_Type_7	Insurance Type	discrete	character	Which type of insurance policy has been made by the household in the last year?

ID	Name	Label	Type	Format	Question
V527	B11_Yrly_Prem_7	Yearly premium	contin	numeric	How much yearly premium do you pay on account of the insurance policy?
V528	B11_Ins_Type_8	Insurance Type	discrete	character	Which type of insurance policy has been made by the household in the last year?
V529	B11_Yrly_Prem_8	Yearly premium	contin	numeric	How much yearly premium do you pay on account of the insurance policy?
V530	B11_Ins_Type_9	Insurance Type	discrete	character	Which type of insurance policy has been made by the household in the last year?
V531	B11_Yrly_Prem_9	Yearly premium	contin	numeric	How much yearly premium do you pay on account of the insurance policy?
V532	B13_Cerm_Code_1	Ceremony Code	discrete	character	Which ceremony did the household perform?
V533	B13_No_Meals_srvd_1	No. of meals served to guests in ceremony	contin	numeric	How many meals were served by the household during the ceremony?
V534	B13_Cerm_Code_2	Ceremony Code	discrete	character	Which ceremony did the household perform?
V535	B13_No_Meals_srvd_2	No. of meals served to guests in ceremony	contin	numeric	How many meals were served by the household during the ceremony?
V536	B12_q1	Ownership of dwelling	discrete	character	Does the household own any dwelling?
V537	B12_q2	Covered Area (Whole number)	contin	numeric	How much is the covered area of the dwelling?
V538	B12_q3	Land Possession Code	discrete	character	Does the household possess any land?
V539	B12_q4	Type of Dwelling	discrete	character	What is the type of dwelling of the household? Is it an independent house or a flat or a chawl or bustee or any other type of dwelling?
V540	B12_q5	Type of Structure	discrete	character	What is the type of structure of the dwelling? Is it pucca, semi pucca or katchcha?
V541	B12_q6	Floor Type	discrete	character	What is the floor type of dwelling?
V542	B12_q7	Type of Latrine	discrete	character	What type of latrine is being used by the household?
V543	B12_q8	Primary Source of Water	discrete	character	What is the primary source of water for the household?
V544	B12_q9	Monthly Rent (Actual) (in Rs.)	contin	numeric	How much monthly rent is being paid by the household?
V567	B12_q10	Imputed Value (in Rs.)	contin	numeric	
V546	B12_q11	Condition of the house	discrete	character	What is the condition of the house?
V547	B13_2_q1	No. of meals served to guests (other than those served during ceremony)	contin	numeric	Did you serve food to the guests (other than those served during ceremony) in the last 30 days?
V548	B13_2_q2	No. of meals served to employees (other than those served during ceremony)	contin	numeric	Did you serve food to the employees (other than those served during ceremony) in the last 30 days?
V549	B13_2_q3	Total meals (other than those served during ceremony)	contin	numeric	

ID	Name	Label	Type	Format	Question
V550	B4_Adult_Males	No. of Adult Males in the Household	contin	numeric	
V551	B4_Adult_Females	No. of Adult Females in the Household	contin	numeric	
V552	B4_Child_Males	No. of Child Males in the Household	contin	numeric	
V553	B4_Child_Females	No. of Child Females in the Household	contin	numeric	
V554	MPCE_Code	Monthly Per Capita Expenditure Code	discrete	character	
V555	Size_Class_of_Town	Size Class of Town Code	discrete	character	
V556	Consumer_Unit	Consumer Unit (0.00)	contin	numeric	
V557	B4_Age_of_Head	Age of Head Code	contin	numeric	What is the age of the head of the household?
V558	B4_Sex_of_Head	Sex of Head Code	discrete	character	What is the gender of the head of the household?
V559	Rent_Code	Rent Code	discrete	character	
V560	WGT_SS	Sub - sample Multiplier (0.00)	contin	numeric	
V561	WGT_SS_Combined	Combined multiplier (0.00)	contin	numeric	
V562	Old_PC	Old P C	discrete	character	

Block 3pt3 - Household gift records

Content	This file contains household gift records.
Cases	78078
Variable(s)	25
Structure	Type: relational Keys: B3_3_q1(Gift Item Code), HHID(Key to identify a household)
Version	
Producer	NSSO
Missing Data	

Variables

ID	Name	Label	Type	Format	Question
V336	HHID	Key to identify a household	discrete	character	
V313	Rd_Sch	Round Schedule	discrete	character	Round schedule
V314	St_Region	State - Region	discrete	character	State - Region
V337	State	State	discrete	character	State
V315	S_Sample	Sub Sample "1"or "2"	discrete	character	Sub Sample "1"or "2"
V316	Sample	Sample	discrete	character	Sample
V317	Sector	Sector "1"or "2"	discrete	character	Sector "1"or "2"
V318	Stratum	Stratum	discrete	character	Stratum
V319	S_Round	Sub - round	discrete	character	Sub - round
V320	FSU_Srl_No	FSU Serial No.	discrete	character	FSU Serial No.
V321	Second_Stratum	Second Stage Stratum "1"or "2"	discrete	character	Second Stage Stratum "1"or "2"
V322	HH_No	Sample Household No.	discrete	character	Sample Household No.
V323	Level	Level	discrete	character	
V324	Month_Yr_Code	Month / Year Code	discrete	character	Month / Year Code
V325	B3_3_q1	Gift Item Code	discrete	character	Gift Item Code
V326	Type_Code_Srl_No	Type Code / Serial No.	discrete	character	Type Code / Serial No.
V327	B3_3_q2	Block Reference	discrete	character	Block Reference
V568	B3_3_q5	Quantity of Goods and Services Received	contin	numeric	How many goods and services did the household receive in the last 30 days?
V569	B3_3_q6	Value of Goods and Services Received	contin	numeric	What was the value of goods and services received by the household in the last 30 days?
V570	B3_3_q7	Quantity of Gifts Given	contin	numeric	How many gifts were given by the household in the last 30 days?
V571	B3_3_q8	Value of Gifts Given	contin	numeric	What was the value of gifts given by the household in the last 30 days?
V572	B3_3_q9	Quantity of Gifts Received	contin	numeric	How many gifts were received by the household?
V573	B3_3_q10	Value of Gifts Received	contin	numeric	What was the value of gifts received?
V334	Wgt_SubSample	Sub sample Multiplier	contin	numeric	

ID	Name	Label	Type	Format	Question
V335	Wgt_Combined	Combined Multiplier	contin	numeric	

Block 4 - Person records

Content	In this Block the detailed demographic particulars including age, sex, educational level, marital status, number of meals usually taken in a day etc. were recorded. Besides this information on consumption of tobacco was also recorded in this block.
Cases	564537
Variable(s)	33
Structure	Type: relational Keys: Person_key(Primary key - unique identifier for a person in a household), HHID(Key to identify a household)
Version	
Producer	NSSO
Missing Data	

Variables

ID	Name	Label	Type	Format	Question
V370	Person_key	Primary key - unique identifier for a person in a household	discrete	character	
V368	HHID	Key to identify a household	discrete	character	
V338	Rd_Sch	Round Schedule	discrete	character	Round schedule
V339	St_Region	State - Region	discrete	character	State - Region
V369	State	State	discrete	character	State
V340	S_Sample	Sub Sample "1"or "2"	discrete	character	Sub Sample "1"or "2"
V341	Sample	Sample	discrete	character	Sample
V342	Sector	Sector "1"or "2"	discrete	character	Sector "1"or "2"
V343	Stratum	Stratum	discrete	character	Stratum
V344	S_Round	Sub - round	discrete	character	Sub - round
V345	FSU_Srl_No	FSU Serial No.	discrete	character	FSU Serial No.
V346	Second_Stratum	Second Stage Stratum "1"or "2"	discrete	character	Second Stage Stratum "1"or "2"
V347	HH_No	Sample Household No.	discrete	character	Sample Household No.
V348	Level	Level	discrete	character	
V349	B4_q1	Serial No. of members	discrete	character	Serial No. of members
V350	B4_q3	Relation to Head Code	discrete	character	What is your relation to head of the household?
V351	B4_q4	Sex Code	discrete	character	Sex of the member
V352	B4_q5	Age	contin	numeric	Age of the member
V353	B4_q6	Marital Status Code	discrete	character	Marital status of the member
V354	B4_q7	General Education Code	discrete	character	Education of the member
V355	B4_q8	No. of days stayed away	contin	numeric	How many days a member has stayed away from home during the last 30 days?
V356	B4_q9	No. of meals taken in a day	contin	numeric	How many meals are usually taken in a day by the household?

ID	Name	Label	Type	Format	Question
V357	B4_q10	No. of meals taken away from home - from school, balwadi etc.	contin	numeric	If you or any member of the household take meals free of cost from school, balwadi etc, then how many such meals are taken in a day?
V358	B4_q11	No. of meals taken away from home - from employer	contin	numeric	If you or any member of the household take meals free of cost from employer, then how many such meals do you take in a day?
V359	B4_q12	No. of meals taken away from home - from others	contin	numeric	If you or any member of the household take meals free of cost from others, then how many such meals do you take in a day?
V360	B4_q13	No. of meals taken away from home - on payment	contin	numeric	If you or any member of the household take meals away from home on payment, then how many such meals do you take?
V361	B4_q14	Meals taken at home	contin	numeric	How many meals are taken at home in a day?
V362	B4_q15	Consumption of tobacco - smoking	discrete	character	Does any member of the household smoke?
V363	B4_q16	Consumption of tobacco - chewing zarda etc.	discrete	character	Does any member of the household chew zarda etc.?
V364	B4_q17	Consumption of tobacco - snuff	discrete	character	Does any member of the household take snuff?
V365	B4_q18	Consumption of tobacco - burnt tobacco powder	discrete	character	Does any member of the household use burnt tobacco powder?
V366	Wgt_SubSample	Sub sample Multiplier	contin	numeric	
V367	Wgt_Combined	Combined Multiplier	contin	numeric	

Block 5 - Monthly household expenditure on food and non food items

Content	In this block cash purchase and consumption of food, pan, tobacco, intoxicants and fuel and light during the last 30 days were recorded.
Cases	6322009
Variable(s)	23
Structure	Type: relational Keys: B5_q1(Block 5 Item Code), HHID(Key to identify a household)
Version	
Producer	NSSO

Type: Discrete	Valid cases: 115354
Format: character	Invalid: 0
Width: 3	

Description

Indicates the NSS round number and schedule number of this survey.

Literal question

Round schedule

State - region (St_Region)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete	Valid cases: 115354
Format: character	Invalid: 0
Width: 3	

Description

Regions are hierarchical domains of study below the level of State/ Union Territory in the NSS.

Literal question

State - Region

Interviewer instructions

State and NSS region to which the sample village/ block belongs to will be recorded here as per the code list.

State (State)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete	Valid cases: 115354
Format: character	Invalid: 0
Width: 2	

Description

This refers to the following states of India: Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal.

Literal question

State

Interviewer instructions

State to which the sample village/ block belongs to will be recorded here as per the code list.

Sub - sample (S_Sample)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 115354

Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Literal question

Sub Sample "1" or "2"

Interviewer instructions

Record 1 or 2 depending on whether the selected sample village/block is central sample or state sample

Sample (Sample)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Invalid: 0

Literal question

Sample

Sector (Sector)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 115354

Invalid: 0

Description

Sector : A word used for the rural-urban demarcation.

Literal question

Sector "1" or "2"

Interviewer instructions

Record 1 or 2 depending on whether the selected sample village/ block is classified as Rural or Urban.

Stratum (Stratum)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Stratum (Stratum)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Type: Discrete
Format: character
Width: 2

Valid cases: 115354
Invalid: 0

Description

Within each state two basic strata will be formed: (i) rural stratum comprising of all rural areas of the state and (ii) urban stratum comprising of all the urban areas of the state.

Literal question

Stratum

Sub round (S_Round)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 115354
Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

Literal question

Sub - round

FSU Serial No. (FSU_Srl_No)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete
Format: character
Width: 5

Valid cases: 115354
Invalid: 0

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. However, for some of the newly declared towns of 1991 census for which UFS frame has not been received, the 1991 census enumeration blocks are the first-stage units. This variable indicates the serial number assigned to such units.

Literal question

FSU Serial No.

Second Stage Stratum (Second_Stratum)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete	Valid cases: 115354
Format: character	Invalid: 0
Width: 1	

Description

The information as to which of two schedules is canvassed first has been recorded in terms of 2 codes against this item. Code 1 has been recorded if this schedule i.e. schedule 1.0, is canvassed first, otherwise code 2 has been recorded. For this purpose, filling in of the major part of the schedule has been considered as 'canvassing' of the schedule.

Literal question

Survey Sequence

Informants Relation to Head (B1_q15)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Valid cases: 115354

Format: character

Invalid: 0

Width: 1

Description

The relation of the principal informant to the head of the household has been recorded in terms of codes against this item. The relevant codes are :

head of the household 1
 other member of the household 2
 others 9

Literal question

What is your relationship to the head of the household?

Response Code (Resp_Code)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Valid cases: 115354

Format: character

Invalid: 0

Width: 1

Description

The entry against this item has been made after collecting all the required information for all the items in the schedule. The entry has been in code on the basis of the impression formed by the investigator regarding overall quality of response of the informant and the informant's perception about the schedule.

Literal question

Response Code

Survey Code (Survey_Code)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Valid cases: 115354

Format: character

Invalid: 0

Width: 1

Description

The item records whether the originally selected household or a substitute household has been surveyed or no household could be surveyed. The entries have been made in terms of codes. Code 1 has been recorded when originally selected household is surveyed and code 2 has been recorded when a substitute household is surveyed. If neither the originally selected household nor a substitute household could be surveyed, i.e. if the sample household is a casualty, code 3 has been recorded.

Literal question

Survey Code

Interviewer instructions

In case of a casualty, only block 0-2 were to be filled in and the word 'CASUALTY' was to be written in block capitals on the top of the front page of the schedule.

Reason of 1st Substitute (Substn_Code)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Reason of 1st Substitute (Substn_Code)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 115354

Invalid: 0

Description

If the originally selected household could not be surveyed, irrespective of whether a substituted household could be surveyed or not, the reason for the one originally selected becoming a casualty has been recorded against this item in terms of codes.

Literal question

Reason of 1st Substitute

Date of Survey DDMMYY (B2_q2)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Format: character

Width: 6

Valid cases: 115354

Invalid: 0

Literal question

Date of Survey DDMMYY

Household Size (B3_1_q1)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Continuous

Format: numeric

Width: 2

Decimals: 0

Valid cases: 115354

Invalid: 0

Description

The size of the household i.e. the total number of members normally residing together in the household surveyed have been recorded here.

A group of persons normally living together and taking food from a common kitchen constitutes a household. The word "normally" means that temporary visitors are excluded but temporary stay-aways are included. Thus a son or daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host's household. "Living together" is usually given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria are in conflict; however, in the special case of a person taking food with his family but sleeping elsewhere (say in a shop or a different house) due to space shortage, the household formed by such a person's family members is taken to include the person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc. is considered as a single-member household except that a family living in a hotel (say) is considered as one household only; the same applies to residential staff of such establishments.

Literal question

How many members are there in the household?

Industry Occupation Code (B3_1_q2a)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Industry Occupation Code (B3_1_q2a)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Type: Discrete
Format: character
Width: 3

Valid cases: 115354
Invalid: 0

Description

The description of the principal household industry occupation will be recorded in the space provided along with the item description. The right hand side of item 2 has been divided into two lines. The appropriate three digit industry code of the NIC 1987 will be recorded in the first line and the relevant occupation family of the NCO 1968 will be entered in the second line.

Refer to NIC codes in external resources.

Literal question

Which industry are you working in?

Interviewer instructions

To determine the principal household industry-occupation, the general procedure to be followed is to list all the gainful occupations pursued by the members of the household excluding those employed by the household and paying guests (who in view of their starving and taking food in the household are considered its normal members) during the one year period preceding the date of survey, no matter whether such occupations are pursued by the members in their principal or subsidiary (on the basis of earnings) capacity. Out of the occupations listed, that one which fetched the maximum earnings to the household during the last 365 days preceding the date of survey would be considered as the principal household occupation. It is quite possible that the household occupation, thus determined as the principal one, may be pursued in different industries by one or more members of the household. In such cases, the particular industry out of all the different industries corresponding to the principal occupation, which fetched, the maximum earnings, should be considered as the principal industry of the household. In extreme cases, the earnings may be equal in two different occupations or industry occupation combinations. By convention, in such cases, priority will be given to the occupation or industry-occupation of the senior most among the participating members.

Occupation Code (B3_1_q2b)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete
Format: character
Width: 3

Valid cases: 115354
Invalid: 0

Description

Refer to NCO codes in external resources.

Literal question

Which occupation are you in?

Type Code (B3_1_q3)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Religion Code (B3_1_q4)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 115354

Invalid: 0

Literal question

What is your religion?

Interviewer instructions

The religion of the household will be recorded against this item in codes. If different members of the household claim to belong to different religions, the religion of the head of the household will be considered as the religion of the households.

Social Group Code (B3_1_q5)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 115354

Invalid: 0

Literal question

Which social group do you belong to?

Post question

Do you come under scheduled caste or scheduled tribe or others category?

Interviewer instructions

Whether or not the household belongs to scheduled tribe or scheduled caste will be indicated against this item in terms of the specified codes which are :

scheduled tribe 1

scheduled caste 2

others 9

Those who do not come under any one of first two groups will be assigned code 9 meant to cover all other categories. In case different members belong to different social groups, the group to which the head of the households belongs will be considered as the 'social group' and the group code appropriate for the household will be assigned. It may be noted that household belonging to neo-Buddhist category will also be considered as scheduled caste.

Whether owns any land (B3_1_q6)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 115354

Invalid: 0

Literal question

Does the household own any land?

Interviewer instructions

Whether owns any land (B3_1_q6)

File: Blocks 1,2,3,10,11,12,13 Household characteristics

A plot of land is considered 'owned by the household' if permanent heritable possession, with or without the right to transfer the title is vested in a member of members of the household. Land held in owner like possession under long term lease or assignment is also considered as land owned. Thus, in determining the ownership of a plot of land, two basic concepts are involved, namely,

(a) land owned by the household i.e., land on which the household has the right of permanent heritable possession with or without the right to transfer the title e.g. pattadars, Bhumidars, Jenmons, Bhumiswamis, Rayat, Sithibans etc. A plot of land may be leased out to others by the owner without losing the right of permanent heritable possession.

(b) Land held under special conditions such that the holder does not possess the title of ownership but the right for long-term possession of the land (for example, land possessed under perpetual lease, hereditary tenure and long-term lease for 30 years or more) will be considered as being held under owner like possession. In the states where land reform legislation has provided for full proprietorship to erstwhile tenants, they are to be considered as having owner-like possession, even if they have not paid the full compensation.

Sometimes a plot may be possessed by a tribal in accordance with traditional tribal rights from local chieftains or villages/district council. Again a plot may be occupied by a tenant for which the right of ownership vests in the community. In both the cases the tribal or other individual (tenant) will be taken as owner, for in all such cases, the holder has owner-like possession of land in question. (From Instructions to Field Staff - Vol.I, 48th round.)

Against this item code 1 or 2 will be recorded depending on whether the household owns any land or not as on the date of survey.

Type of land owned (B3_1_q7)

File: Blocks 1,2,3,10,11,12,13 Household characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 115354
Invalid: 0

Literal question

What type of land do you own?

Interviewer instructions

Item 7 : if yes in item 6, type of land owned (homestead only-1, homestead and other land - 2, other land only - 3) : Homestead of household is defined as the dwelling house of the household together with any courtyard, compound, garden, out-house, place of working, family courtyard, guest-house, shop, workshop/offices for running household enterprises, tanks, wells, latrine, drains and boundary walls which are annexed to the dwelling house. All land coming under homestead is defined as homestead land.

Homestead may constitute only a part of a plot. Some-times gardens,, orchards or plantations, though adjacent to the homestead and lying within the boundary walls, may be located on a clearly distinct piece of land. In such cases, land under garden, orchard or plantation will not be considered as homestead land and will be noted as other land'.

Codes will be recorded against the item depending on the type of land owned. If the household owns only homestead and no other land, the appropriate code will be 1. But, if the household owns some other piece of land along with homestead land, code 2 will be entered against this item. Code 3 will be applicable when a household owns a piece of land but not the homestead land.

Width: 8	Minimum: 1
Decimals: 2	Maximum: 68559
Range: 1-68558.97	Mean: 432.2
	Standard deviation: 582.6

Description

For a household, this is household consumer expenditure over a period of 30 days divided by household size. A person's MPCE is understood as that of the household to which he/she belongs.

Interviewer instructions

This item will be filled in after completing recording of entries in block 14, 'Summary of consumer expenditure'. The derived figure recorded in block 14, item 33, column (6), will be copied here.

Cooking Code (B3_1_q21)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete	Valid cases: 115354
Format: character	Invalid: 0
Width: 1	

Literal question

What is the primary source of energy that is being used by the household for cooking?

Interviewer instructions

Against these two items, the appropriate codes for the primary source of energy that is being used by the household for the purposes of cooking and lighting respectively will be recorded. If more than one type of energy is utilised, the primary or principal one on the basis of its use will have to be identified and the corresponding code will be noted in the appropriate box.

The sources of energy codes will be restricted to the following :

fuel
 coke, coal 1 charcoal 6
 firewood and chips 2 kerosene 7
 gas (coal), oil or L.P.G.).. 3 others 8
 gobar gas 4 no cooking arrangement.... 9
 dung cake 5

Do all members get two square meals? (B10_q1)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 115354
Invalid: 0

Literal question

Do all members usually get two square meals?

Interviewer instructions

This block will be filled after completion of the enquiry on all the preceding blocks. The expression in item 1 - "getting two square meals a day" - as used in common parlance, conveys that the concerned person gets, by and large, sufficient food to eat. This question is asked in order to know the perception of the household regarding sufficiency of food. While putting this question to the informant, it is thus presumed that the informant has a clear understanding of its meaning. There are equivalent phrases conveying the same meaning in regional languages. It is, therefore, important to put the proper question in the local language and record the answer given by the informant in the appropriate code.

Care should be taken to see that the informant is not offended by this question. The question should, in fact, not be asked to those whose reported consumption would obviously indicate that they get sufficient food to eat. In item 1, if the members of the household are reported as getting two square meals a day, throughout the year, the code to be entered in the box space of this block is 1. If adequate food is available in only a few months of the year code 2 will be noted. Code 3 will indicate that the household does not usually get two square meals a day for all its members. Here the reference period is last 12 calendar months preceding the date of enquiry.

If adequate food was available in only some months of the year i.e. if code 2 is recorded in item 1, those calendar months in which all members of the household did not have two square meals a day will be recorded in cells provided against item 2 in codes. For example, suppose all members of a sample household did not have two square meals a day in the months of January and March during the reference period. The entries to be made are 01 & 03 in first two cells out of the 12 cells provided in the block against item 2.

Pre question

Are there any insurance policies made by the household at any time in the past and premium paid on their account during the last 365 days preceding the date of survey?

Literal question

Which type of insurance policy has been made by the household in the last year?

Interviewer instructions

In this block information will be collected on insurance policies made by the household at any time in the past and premium paid on their account during the last 365 days preceding the date of survey. It is clarified that only schemes which are primarily meant for insurance will be covered. Hence schemes like LIP, peerless etc. which are primarily saving schemes will not be covered in this block. Again, the 'insurance cover' during journey by Air or Rail provided by the Govt. in which no premium is required to be paid separately, will not be accounted for in this block.

Descriptions of different types of insurance and their corresponding codes are printed in columns (1) and (2) respectively. "Householder's comprehensive insurance scheme" covers a number of risks for which insurance policies can, alternatively, be made separately. Bearing this in mind, entries should be made against the proper "type of insurance". Thus if burglary insurance (say) is made as part of comprehensive insurance policy, no entry should be made against burglary (only) insurance.

Ownership of dwelling (B12_q1)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 115354
Invalid: 0

Literal question

Does the household own any dwelling?

Interviewer instructions

In this block information will be collected on living accommodation, such as ownership, area covered, rent etc., and also on housing amenities such as drinking water, sanitation, etc. The dwelling house (unit) has been defined as the accommodation availed of by a household for its residential purpose. It may be an entire structure or a part there of or may consist of more than one structure. There may be cases of more than one household occupying a single structure such as those living in independent flats or sharing a single housing unit, in which case there will be as many dwelling units as the numbered of households sharing the structure.

There may also be cases of one household occupying more than one structures (e.g. detached structure for sitting sleeping, cooking, bathing etc.) for its housing accommodation. In such cases, all the structure together constitute a single dwelling unit. In general, accommodation availed of for residential purpose will cover living room, kitchen, store, bath, latrine, garage, open and closed verandah etc. A structure or a portion thereof used exclusively for other than residential purposes or let out to other households does not form part of the dwelling unit of the household under consideration. However, a portion of a structure used for both residential and non-residential purposes is treated as part of the dwelling unit except when the residential purpose use of this portion is very nominal.

Covered Area (Whole number) (B12_q2)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Continuous
Format: numeric
Width: 5
Decimals: 0
Range: 0-84212

Valid cases: 115354
Invalid: 0
Minimum: 0
Maximum: 84212
Mean: 491.9
Standard deviation: 832.7

Literal question

How much is the covered area of the dwelling?

Interviewer instructions

This is the sum of the floor areas of all rooms, kitchen etc. and covered and/or uncovered verandah of the building. The area will be recorded in whole number of square feet. A verandah means a roofed space often without a door adjacent to a living room or other room. The term "verandah" will not, however, cover la passage or a corridor used mainly as an access to the dwelling unit itself.

Land Possession Code (B12_q3)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 115354
Invalid: 0

Literal question

Does the household possess any land?

Interviewer instructions

Land Possession Code (B12_q3)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

The land on which the dwelling unit is constructed may be either owned, or rented, or leased in by the household or otherwise occupied. The codes to be recorded against this item are :

no land 1
 owned 2
 rented 3
 leased..... 4
 others 9

In case of a multistoreyed building, land possession code of its apartments will be 2 or 3 or 4 or 9 as the case may be.

Type of Dwelling (B12_q4)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete

Valid cases: 115354

Format: character

Invalid: 0

Width: 1

Literal question

What is the type of dwelling of the household? Is it an independent house or a flat or a chawl or bustee or any other type of dwelling?

Interviewer instructions

Information on the type of dwelling unit will be entered against this item in codes. The codes are :
 independent house - 1, flat - 2, chawl - 3, others - 9.

An independent house is one which has a separate structure and entrance with self-contained arrangements. In other words, if the dwelling unit land the entire structure of the house are physically the ;same it should be considered an independent house. In some parts especially in rural areas, two or more structures together may constitute a single housing unit.

such as housing will also be treated as an independent house.

A flat is a self-contained housing arrangement occupying a portion of a building. It consists of one or more rooms with normal housing facilities like water supply, bath and toilet for exclusive use of a single household. If a household occupying a portion of a building has some housing facilities like water supply, bath and/or toilet for its exclusive use in a detached structure(s), it is also regarded as occupying a flat.

A chawl may be described as a building with a numbers of generally single-roomed having common corridor and bathing and toilet facilities. In case of three/four storeyed chawl the common facilities of a bath land toilet may be ;available in each floor for the tenements of that floor.

Others : covers all other types of housing arrangements. This will include flat-like dwellings which are not self-contained in respect of water, bath and toilets facilities, hostel accommodation etc.

Type of Structure (B12_q5)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Valid cases: 115354

Format: character

Invalid: 0

Width: 1

Literal question

What is the type of structure of the dwelling? Is it pucca, semi pucca or katchcha?

Interviewer instructions

Type of Structure (B12_q5)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

The structures have been classified into three categories, viz. pucca, semi-pucca and katcha on the basis of the materials used for construction. Entry against this item is to be made in codes. The codes are : pucca - 1, semi-pucca - 2, katcha - 3.

A katcha structure is one whose walls and roofs are made of mud, bamboo, grass, leaves, reeds, thatch or unbrunt bricks. A pucca structure is one whose walls and roof are made of burnt bricks, stone, cement concrete, jack board (cement-plastered reeds), mosaic, tiles or timber. Tiles galvanized as tin or asbestos cement sheets used in construction of roofs will be regarded as pucca material. A semi-pucca structure is one of which either the roof or the walls, but not both, is made exclusively of pucca materials like burnt bricks, stones, cement, concrete or timber.

Overview

Primary Source of Water (B12_q8)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Type: Discrete
 Format: character
 Width: 1

Valid cases: 115354
 Invalid: 0

Literal question

What is the primary source of water for the household?

Interviewer instructions

The information in respect of the households primary source of drinking water will be collected and recorded in codes against this item. The codes are :

tap 1
 tube well, hand pump 2
 well3
 tank, pond reserved
 for drinking 4
 other tank5
 river, canal, lake 6
 spring 7
 others 9

If an arrangement is made by corporation, municipality, panchayat or other local authorities or any private or public housing estate or agency to supply water through pipe and if the sample household is availing itself of such facility, then the appropriate code will be 1. drinking water carried through pipe from sources like well, tank river etc. for the convenience of only one or a group of households, however, will not be treated as tap water. Instead, such a source will get the code appropriate to the actual source from which water is carried through pipe. The other codes are self-explanatory. If a household gets drinking water from more than one source, the source which is in major use will be considered. If the sources of drinking water of a household is different in different seasons, the major source of drinking water is to be ascertained and the corresponding code has to be noted against this item.

Monthly Rent (Actual) (in Rs.) (B12_q9)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Continuous
 Format: numeric
 Width: 6
 Decimals: 0
 Range: 0-112000

Valid cases: 115354
 Invalid: 0
 Minimum: 0
 Maximum: 112000
 Mean: 43.6
 Standard deviation: 502.9

Literal question

How much monthly rent is being paid by the household?

Interviewer instructions

Item 9 will be filled in for households of both rural and urban areas whereas item 10 will be filled in for the households of urban areas only. Actual monthly rent of the dwelling unit will be noted if it is taken on rent. But if a household in urban areas is not residing in a rented house, that is, is residing in a house which it either owns or otherwise occupied without paying any rent, then an imputed rent will be recorded. Imputation will be done on the basis of prevailing rate of rent for similar houses in the locality or surrounding areas. Rent does not include any salami/Pugree or any kind of cuss payable to local bodies or Government or monthly maintenance charges payable to co-operative society etc. It is merely an amount payable to the owner or some other party as per contract between the occupier and the person who lets it out. A household may occupy a dwelling unit which is neither owned, nor hired in. In such cases also the imputed rent will be recorded.

Imputed Value (in Rs.) (B12_q10)

Condition of the house (B12_q11)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 115354
 Invalid: 0

Literal question

What is the condition of the house?

Interviewer instructions

"Condition" refers to the physical condition of the house. This will have to be assessed at the time of investigation. Entry against this item is to be recorded in the code. If the house is excellent for habitation and seems to need no major repairs then code 1 is to be entered. In case the house is fairly good and needs no major repairs code 2 is to be recorded. If the condition is bad, dilapidated and impoverished (either needs immediate repairs/structural changes or is not suitable for permanent habitation at all) code 3 is to be noted.

No. of meals served to guests (other than those served during ceremony) (B13_2_q1)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Continuous
 Format: numeric
 Width: 4
 Decimals: 0
 Range: 0-1130

Valid cases: 115354
 Invalid: 0
 Minimum: 0
 Maximum: 1130
 Mean: 1.6
 Standard deviation: 14.9

Description

In this item the number of meals served by the household to its guests during the reference period of 30 days preceding the date of enquiry on non-ceremonial occasions were recorded.

Literal question

Did you serve food to the guests (other than those served during ceremony) in the last 30 days?

Interviewer instructions

No. of meals served to guests (other than those served during ceremony) (B13_2_q1)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Only the meals served on non-ceremonial occasions during the reference period of 30 days proceeding the date of enquiry were to be recorded.

In this item the number of meals served by the household to its guests and to its employees, during the reference period of 30 days proceeding the date of enquiry on non-ceremonial occasions will be recorded in the box spaces provided against lines 1 and 2 respectively. While reckoning the number of meals served to guests, those meals which have already been accounted for in item 2 that is, 'meals served to guests during ceremonies' should not be counted in making entries in this item.

An employee of the household who lives under the same roof and takes food from the same household kitchen as the other members of the household do, should by NSS convention, be treated as a normal member of the household. Hence meals served to employee members should not be counted for making entry against line 2 of this item. The number of meals served to guests as well as employees will be totaled & recorded in the box space provided against line 3, i.e., total.

No. of meals served to employees (other than those served during ceremony) (B13_2_q2)

Monthly Per Capita Expenditure Code (MPCE_Code)

File: Blocks 1,2,3,10,11,12,13_Household characteristics

Overview

Type: Discrete
 Format: character
 Width: 2

Valid cases: 115354
 Invalid: 0

Description

MPCE classes :

It is the usual practice, in NSS consumer expenditure reports, to present various estimates, including state and all-India level values of different socio-economic indicators, and distributions of households and all-India level values of different socio-economic indicators, and distributions of households and persons over different socio-economic categories or statuses, separately for a number of classes of the population formed on the basis of MPCE. For the 50th round, 12 MPCE classes were drawn up for each sector - rural and urban - as follows. For the rural (urban) sector, the class limits were so chosen that each class, excepting the top two classes and the bottom two, approximately contained an estimated 10% of the rural (urban) population, while the remaining four classes each contained an estimated 5% of the population. Some adjustments were, however, made to keep some common class limits for the rural and urban sectors. Tabulation of results by MPCE class from the 43rd to the 49th round of NSS, incidentally, was done using MPCE classes derived in a similar way, using 43rd round MPCE data. In other words, the MPCE classification is being updated for the first time since the 43rd round. The classification used here is :

RURAL URBAN

(Rs.) (Rs.)

1. below 120 below 160
2. 120 - 140 160 - 190

Description

This refers to the following states of India: Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal.

Literal question

State

Interviewer instructions

State to which the sample village/ block belongs to will be recorded here as per the code list.

Sub Sample "1"or "2" (S_Sample)

File: Block 3pt3 - Household gift records

Overview

Type: Discrete	Valid cases: 78078
Format: character	Invalid: 0
Width: 1	

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Literal question

Sub Sample "1"or "2"

Interviewer instructions

Record 1 or 2 depending on whether the selected sample village/block is central sample or state sample

Sample (Sample)

Gift Item Code (B3_3_q1)

File: Block 3pt3 - Household gift records

Overview

Type: Discrete	Valid cases: 78078
Format: character	Invalid: 0
Width: 3	

Description

A three-digit code system for identification of each item of consumer expenditure has been used. The digit in the hundreds place indicates broad division of items; the hundred and tens places together specify groups of items and all the three digits together indicate a particular item. Item code ending with '8' represents 'others', that is, any item belonging to the particular group but not listed separately. Similarly, a code with '9' in the unit place is a sub-total item.

Type: Discrete

Format: character

Width: 1

Valid cases: 564537

Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

Literal question

Sub - round

FSU Serial No. (FSU_Srl_No)

File: Block 4 - Person records

Overview

Type: Discrete

Format: character

Width: 5

Valid cases: 564537

Invalid: 0

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. However, for some of the newly declared towns of 1991 census for which UFS frame has not been received, the 1991 census enumeration blocks are the first-stage units. This variable indicates the serial number assigned to such units.

File: Block 4 - Person records

Overview

No. of days stayed away (B4_q8)

File: Block 4 - Person records

Type: Continuous
Format: numeric
Width: 2
Decimals: 0
Range: 0-30

Valid cases: 564537
Invalid: 0
Minimum: 0
Maximum: 30
Mean: 0.4
Standard deviation: 2.4

Literal question

How many days a member has stayed away from home during the last 30 days?

Interviewer instructions

The number of days for which the member 'stayed away from home' during the 30 days preceding the date of enquiry should be recorded here. A continuous absence from home for 24 hours will be reckoned as a 'day stayed away.' That is, the entry will be made in completed number of days and any fraction of a day will be ignored. The location of the place where the person stayed while away from his/her own household may also be within the same village/town, hence it may be noted that staying away will not only mean physical absence but also non-participation in food consumption from his/her own household. If the number of days stayed away is found to be zero '00', may be recorded.

No. of meals taken in a day (B4_q9)

File: Block 4 - Person records

Overview

Type: Continuous
Format: numeric
Width: 1
Decimals: 0
Range: 0-3

Valid cases: 564537
Invalid: 0

Description

A 'meal' is composed of one or more readily eatable (generally cooked) items of food, the usual major constituent of which is cereals. The meals consumed by a person twice or thrice a day provide him/her the required energy (calories) and other nutrients for living and for pursuing his/her normal avocations. A 'meal' opposed to 'snacks', 'nashta' or 'high tea' contains larger quantum and variety of food. In rare cases, a full meal may contain larger quantity of non-cereal food. Even then if the quantum of food in a plate is heavy as a meal, the contents of the food food plate will also be considered as a 'meal'. Sometimes the contents of a 'nastha' may not be very different from the contents of a 'meal'. The difference in quantity will therefore be the guiding factor for deciding whether the plate is to be labeled as a 'meal' or a 'nastha'.

Literal question

How many meals are usually taken in a day by the household?

Interviewer instructions

The number of meals consumed by a person is usually reported as 2 or 3. In rare cases, one may come across a person who may be taking food only once in a day or more than three times a day. While in the former case the number of meals for the person will be 1 per day, in the latter case, only 3 should be entered. That is, in this column, the recorded number of meals taken in a day even if it is reported to be higher, should not exceed 3. A breast-fed baby does not directly share the food consumed by members of the household. Hence for such babies the entry in this column will be '0'.

No. of meals taken away from home - from school, balwadi etc.

(B4_q10)

File: Block 4 - Person records

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Standard deviation: 2.3

Literal question

No. of meals taken away from home - from school, balwadi etc. (B4_q10)

File: Block 4 - Person records

If you or any member of the household take meals free of cost from school, balwadi etc, then how many such meals are taken in a day?

No. of meals taken away from home - from employer (B4_q11)

File: Block 4 - Person records

Overview

Type: Continuous	Valid cases: 564537
Format: numeric	Invalid: 0
Width: 2	Minimum: 0
Decimals: 0	Maximum: 90
Range: 0-90	Mean: 0.2
	Standard deviation: 2.5

Literal question

If you or any member of the household take meals free of cost from employer, then how many such meals do you take in a day?

Interviewer instructions

A person rendering domestic services (like cleaning utensils, dusting and cleaning rooms, washing lines, fetching water from outside etc.) to a number of households during the daytime gets some food from each of the households he/she serves. Although the quantum of food received from a single household may, going by quantity, be far less than a full meal, the total quantity of food received from all the households taken together would often, if not more, be at least equivalent to a full meal. In this particular situation, the person will be considered to be consuming one meal every day under 'meals taken away from home'.

No. of meals taken away from home - from others (B4_q12)

Sub Sample "1"or "2" (S_Sample)

File: Block 5 - Monthly household expenditure on food and non food items

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 6322009

Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Block 5 Item Code (B5_q1)

File: Block 5 - Monthly household expenditure on food and non food items

Overview

Type: Discrete

Valid cases: 6322009

Format: character

Invalid: 0

Width: 3

Description

Block 5 Item Code (B5_q1)

File: Block 5 - Monthly household expenditure on food and non food items

A three-digit code system for identification of each item of consumer expenditure has been used. The digit in the hundreds place indicates broad division of items; the hundred and tens places together specify groups of items and all the three digits together indicate a particular item. Item code ending with '8' represents 'others', that is, any item belonging to the particular group but not listed separately. Similarly, a code with '9' in the unit place is a sub-total item.

Groups of consumption items : The following broad item groups have been taken. These are (1) cereals (2) gram (3) cereal substitutes (4) pulses & pulses products (5) milk and milk products (6) edible oil (7) meat, fish & egg (8) vegetables (9) fruits & nuts (10) sugar (11) salt (12) spices (13) beverages, refreshments & processed food (14) pan, tobacco & intoxicants (15) fuel & light

Beverages, etc.: This refers to the food group beverages, refreshments & processed food. Processed food includes confectionery, biscuits, jam, pickles, etc. unless these are prepared within the household (in which case consumption would be accounted under the various ingredients such as sugar, flour, etc.) and, importantly, cooked meals purchased and consumed by household members.

Literal question

Block 5 Item Code

Cash Purchase - Quantity (B5_q3)

File: Block 5 - Monthly household expenditure on food and non food items

Overview

Type: Continuous	Valid cases: 6322009
Format: numeric	Invalid: 0
Width: 9	Minimum: 0
Decimals: 2	Maximum: 500000
Range: 0-500000	Mean: 51.8
	Standard deviation: 396.4

Literal question

How much quantity of the item was purchased by the household in cash in the last 30 days?

Cash Purchase - Value (B5_q4)

File: Block 5 - Monthly household expenditure on food and non food items

Overview

Type: Continuous	Valid cases: 6322009
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 2	Maximum: 10000
Range: 0-10000	Mean: 42.2
	Standard deviation: 88.8

Literal question

How much money was spent by the household in cash on the purchase of the item in the last 30 days?

Interviewer instructions

The quantity and value respectively of items purchased in exchange of money during the last 30 days prior to the date of survey will be recorded. Here purchase will be mean only those purchased against cash payment (including those made on credit but to be paid in cash). Barter purchase, if any, will not be considered here. Purchase made for domestic consumption only should be considered. It may be noted that purchase made for gifts, charities etc. for household ceremonial purposes should be considered as household purchase and the total quantity and value of purchase should be inclusive of such purchases. In case may purchase should be inclusive of such purchases. In case any purchase is both for productive and consumption purposes, the part ascribable to productive purposes should be excluded.

Consumption out of home grown stock - Quantity (B5_q5)

File: Block 5 - Monthly household expenditure on food and non food items

Consumption out of home grown stock - Value (B5_q6)

File: Block 5 - Monthly household expenditure on food and non food items

Overview

Type: Continuous	Valid cases: 6322009
Format: numeric	Invalid: 0
Width: 7	Minimum: 0
Decimals: 2	Maximum: 7100
Range: 0-7100	Mean: 11.1
	Standard deviation: 69.5

Literal question

How much of home grown item was consumed by the household in the last 30 days in terms of monetary value?

Interviewer instructions

The value will be imputed at the ex-farm or ex-factory price. Home-produced agricultural produce includes any produce obtained from cultivation by the household or obtained in the form of rent-share of land leased out. Produce brought from village home and consumed in urban residence will also be treated as home-grown stock. Transport charges for carrying the commodity to the place of residence for consumption should not be added to the ex-farm/ex-factory value.

Total consumption - Quantity (B5_q7)

File: Block 5 - Monthly household expenditure on food and non food items

Total consumption - Value (B5_q8)

File: Block 5 - Monthly household expenditure on food and non food items

Overview

Total consumption - Value (B5_q8)

File: Block 5 - Monthly household expenditure on food and non food items

Type: Continuous
 Format: numeric
 Width: 9
 Decimals: 2
 Range: 0-100531.42

Valid cases: 6322009
 Invalid: 0
 Minimum: 0
 Maximum: 100531.4
 Mean: 55.9
 Standard deviation: 123.3

Interviewer instructions

In this block information will be collected on purchase, consumption out of home-grown stock and total consumption of each item of food, pan, tobacco, intoxicants and fuel and light for the household during the last 30 days prior to the date of survey. Purchase and consumption of items by members of the household during their days of absence from the usual residence should also be taken into account, as far as possible, while making entries against the items of this block. For certain important items, the break-up of purchase and consumption figure by two sources, namely "public distribution system" and "other sources" is required. The purpose is to study the extent of availability and utilization of the public distribution system.

The total consumption data should be strictly restricted to the domestic consumption of the household. The expenditure incurred on account of pet animals will be excluded. The expenditure should be recorded under item 593 of block 8. It may be noted that consumption by livestock belonging to the household will not be included in the household consumption. Accounting should, however, be made of the livestock products like milk, meat, egg, etc., obtained from such livestock and consumed by the household. While making entries on household consumption, care should be taken not to include any transfer payment in kind like, loans, advances, charities, gifts, etc. made in kind. But consumption from transfer receipts will be included. Total consumption of the household will consist of consumption made out of :-

- (1) commodities purchased in cash;
- (2) commodities received in exchange of goods and services;
- (3) home-grown/home-produced stock;
- (4) transfer receipts such as gifts, loans, charities, etc., and
- (5) free collection.

Literal question

Sample

Sector "1"or "2" (Sector)

File: Block 6 - Household expenditure on clothing

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 978051
Invalid: 0

Description

Sector : A word used for the rural-urban demarcation.

Literal question

Sector "1"or "2"

Interviewer instructions

Record 1 or 2 depending on whether the selected sample village/ block is classified as Rural or Urban.

Stratum (Stratum)

File: Block 6 - Household expenditure on clothing

Overview

Stratum (Stratum)

File: Block 6 - Household expenditure on clothing

Type: Discrete
 Format: character
 Width: 2

Valid cases: 978051
 Invalid: 0

Description

Within each state two basic strata will be formed: (i) rural stratum comprising of all rural areas of the state and (ii) urban stratum comprising of all the urban areas of the state.

Literal question

Stratum

Sub - round (S_Round)

File: Block 6 - Household expenditure on clothing

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 978051
 Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

Literal question

Sub - round

FSU Serial No. (FSU_Srl_No)

File: Block 6 - Household expenditure on clothing

Overview

Type: Discrete
 Format: character
 Width: 5

Valid cases: 978051
 Invalid: 0

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. However, for some of the newly declared towns of 1991 census for which UFS frame has not been received, the 1991 census enumeration blocks are the first-stage units. This variable indicates the serial number assigned to such units.

Literal question

FSU Serial No.

Second Stage Stratum "1" or "2" (Second_Stratum)

File: Block 6 - Household expenditure on clothing

Overview

Width: 1	

Literal question

Month / Year Code

Clothing Item Code (B6_q1)

File: Block 6 - Household expenditure on clothing

Overview

Type: Discrete	Valid cases: 978051
Format: character	Invalid: 0
Width: 3	

Description

A three-digit code system for identification of each item of consumer expenditure has been used. The digit in the hundreds place indicates broad division of items; the hundred and tens places together specify groups of items and all the three digits together indicate a particular item. Item code ending with '8' represents 'others', that is, any item belonging to the particular group but not listed separately. Similarly, a code with '9' in the unit place is a sub-total item.

Apart from clothing proper, this category includes bedsheets, bedcovers, pillows, curtains, mattresses, blankets, rugs, mats and mattings, cotton yarn, wool, and knitting wool. It, however, excludes tailoring charges, which come under "miscellaneous goods and services".

Literal question

Clothing Item Code

Cloth Type Code (B6_q3)

File: Block 6 - Household expenditure on clothing

Overview

Cloth Type Code (B6_q3)

File: Block 6 - Household expenditure on clothing

Type: Discrete
 Format: character
 Width: 1

Valid cases: 978051
 Invalid: 0

Literal question

Cloth Type Code

Interviewer instructions

Type code : In this column, the type code will be entered for the item recorded in column (2). A 'type code' will specify the material e.g. cotton, wool, silk etc. of which the item of clothing is made. If an item is made of cotton, a further distinction will be made between mill-made, power-loom, hand-loom, and khadi production. The type codes are :

type of clothing code type of clothing code

cotton : silk and synthetic :
 mill made1 art silk, rayon or other
 power loom2 other synthetic
 handloom3 textile6
 khadi4 pure silk7
 wool5 mixed :
 wool/synthetic/cotton/silk8
 others :9

It may be noted that if items of clothing of different 'type's' are purchased and/or consumed it will be necessary to fill in one line for each item and 'type' combination.

Cash Purchase - Quantity (B6_q4)

File: Block 6 - Household expenditure on clothing

Overview

Type: Continuous
 Format: numeric
 Width: 8
 Decimals: 2
 Range: 0-28000

Valid cases: 978051
 Invalid: 0
 Minimum: 0
 Maximum: 28000
 Mean: 11.2
 Standard deviation: 143

Literal question

How much quantity of the clothing item was purchased by the household in cash in both the last 30 days and the last 365 days?

Cash Purchase - Value (B6_q5)

File: Block 6 - Household expenditure on clothing

Overview

Type: Continuous
 Format: numeric
 Width: 8
 Decimals: 2
 Range: 0-62950

Valid cases: 978051
 Invalid: 0
 Minimum: 0
 Maximum: 62950
 Mean: 420.4
 Standard deviation: 832.5

Literal question

How much money was spent by the household in cash on the purchase of the clothing item in both the last 30 days and the last 365 days?

Consumption out of home grown stock - Quantity (B6_q6)

File: Block 6 - Household expenditure on clothing

Overview

Type: Continuous	Valid cases: 978051
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 2	Maximum: 14000
Range: 0-14000	Mean: 0
	Standard deviation: 17.5

Literal question

How much quantity of the clothing item was consumed by the household out of the home grown stock in both the last 30 days and the last 365 days?

Consumption out of home grown stock - Value (B6_q7)

File: Block 6 - Household expenditure on clothing

Overview

Type: Continuous	Valid cases: 978051
Format: numeric	Invalid: 0
Width: 7	Minimum: 0
Decimals: 2	Maximum: 4520
Range: 0-4520	Mean: 0.8
	Standard deviation: 23.6

Literal question

How much of home grown clothing item was consumed by the household in both the last 30 days and the last 365 days in terms of monetary value?

Interviewer instructions

Consumption of an item of clothing is defined as taking place when the item is brought in maiden or first use. Out of the home-produced stock accordingly, only those items which were brought into first use during the reference period will be taken into account for recording the quantity and value of consumption out of home-produced stock. For example, if a household weaves two pieces of cloth and puts into use only one piece in the reference period keeping the other for future, the quantity and value of one piece only will be entered in columns (6) and (7) respectively.

Total consumption - Quantity (B6_q8)

File: Block 6 - Household expenditure on clothing

Description

This refers to the following states of India: Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal.

Literal question

State

Interviewer instructions

State to which the sample village/ block belongs to will be recorded here as per the code list.

Sub Sample "1"or "2" (S_Sample)

File: Block 7 - Household expenditure on footwear

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 328048
Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Literal question

Sub Sample "1"or "2"

Interviewer instructions

Record 1 or 2 depending on whether the selected sample village/block is central sample or state sample

Cash & Kind (0.00) (B8_q4)

File: Block 8 - Monthly household expenditure on misc goods and services

Overview

Type: Continuous	Valid cases: 1896656
Format: numeric	Invalid: 0
Width: 9	Minimum: 0
Decimals: 2	Maximum: 250035
Range: 0-250035	Mean: 48.4
	Standard deviation: 480.2

Literal question

How much was spent by the household in cash and kind on the purchase of the item in the last 30 days?

Interviewer instructions

In this block, relating to miscellaneous goods and services excepting educational and medical expenses, information will be collected on expenditure for purchase of these items during the reference period. The actual expenditure incurred towards purchase of these items for non-productive purposes will be considered as the consumer expenditure of the household on these items. But for items like club fees, telephone charges, rent, taxes & cesses, water charges etc. for which payment is normally not made every month, the amount of last payment made divided by the number of months for which the payment was made will be taken into account. Expenditure both in cash and in kind will be taken into account. The reference period will be the last 30 days prior to the date of survey.

State - Region (St_Region)

File: Block 8pt1 - Household expenditure on education and medical goods and services

Overview

Type: Discrete
Format: character
Width: 3

Valid cases: 472554
Invalid: 0

Description

Regions are hierarchical domains of study below the level of State/ Union Territory in the NSS.

Literal question

State - Region

Interviewer instructions

State and NSS region to which the sample village/ block belongs to will be recorded here as per the code list.

State (State)

File: Block 8pt1 - Household expenditure on education and medical goods and services

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 472554
Invalid: 0

Description

This refers to the following states of India: Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal.

Literal question

State

State (State)

File: Block 8pt1 - Household expenditure on education and medical goods and services

Interviewer instructions

State to which the sample village/ block belongs to will be recorded here as per the code list.

Sub Sample "1"or "2" (S_Sample)

File: Block 8pt1 - Household expenditure on education and medical goods and services

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 472554

Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Literal question

Sub Sample "1"or "2"

Interviewer instructions

Record 1 or 2 depending on whether the selected sample village/block is central sample or state sample

Sample (Sample)

Valid cases: 472554

Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

Literal question

Sub - round

FSU Serial No. (FSU_Srl_No)

File: Block 8pt1 - Household expenditure on education and medical goods and services

Overview

Type: Discrete

Format: character

Width: 5

Valid cases: 472554

Invalid: 0

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. However, for some of the newly declared towns of 1991 census for which UFS frame has not been received, the 1991 census enumeration blocks are the first-stage units. This variable indicates the serial number assigned to such units.

FSU Serial No. (FSU_Srl_No)

Block 8.1 Item Code (B8_1_q1)

File: Block 8pt1 - Household expenditure on education and medical goods and services

Overview

Type: Discrete

Format: character

Width: 3

Valid cases: 472554

Invalid: 0

Description

Block 8.1 Item Code (B8_1_q1)

File: Block 8pt1 - Household expenditure on education and medical goods and services

A three-digit code system for identification of each item of consumer expenditure has been used. The digit in the hundreds place indicates broad division of items; the hundred and tens places together specify groups of items and all the three digits together indicate a particular item. Item code ending with '8' represents 'others', that is, any item belonging to the particular group but not listed separately. Similarly, a code with '9' in the unit place is a sub-total item.

Literal question

Block 8.1 Item Code

Cash Purchase - Quantity (0.00)- in the last 30 days (B8_1_q3)

Block 9 Item Code (B9_q1)

File: Block 9 - Household expenditure on durable goods

Overview

Type: Discrete
 Format: character
 Width: 3

Valid cases: 1138392
 Invalid: 0

Description

A three-digit code system for identification of each item of consumer expenditure has been used. The digit in the hundreds place indicates broad division of items; the hundred and tens places together specify groups of items and all the three digits together indicate a particular item. Item code ending with '8' represents 'others', that is, any item belonging to the particular group but not listed separately. Similarly, a code with '9' in the unit place is a sub-total item.

Durable goods :

This term refers to durable goods other than clothing and footwear; items included here are distinguished from miscellaneous goods by having a longer expected lifetime of use (roughly, one year or more). Expenditure incurred on repairs and construction of durables used for domestic purpose is included in "expenditure on durable goods".

Literal question

FSU Serial No. (FSU_Srl_No)

File: Block 13 - Household expenditure on ceremony

Overview

Type: Discrete
 Format: character
 Width: 5

Valid cases: 13796
 Invalid: 0

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. However, for some of the newly declared towns of 1991 census for which UFS frame has not been received, the 1991 census enumeration blocks are the first-stage units. This variable indicates the serial number assigned to such units.

Serial no. of ceremony (B13_1_q1)

File: Block 13 - Household expenditure on ceremony

Overview

Type: Discrete	Valid cases: 13796
Format: character	Invalid: 0
Width: 3	

Description

Block 13.1 contains particulars of ceremonies performed and meals served by the household during the last 30 days prior to the date of survey. Ceremonies are performed to solemnize notable events of life e.g. birth, marriage etc. Members of a household may have to perform some religious rites consequent upon the death of a person. For various religious faiths, there are some days in a year which are observed with ceremonial performances like offering of puja, prayer, celebration of rituals etc. Such ceremonies may be performed by household members as required under the social/religious customs without incurring any expenditure for entertaining guests. On the other hand, households may have to spend something under different heads for the purpose of entertainment. Conventionally these expenditures are considered as essential part of the ceremonies performed by them. The purpose of providing this block in this schedule is to estimate the no. of meals served to guests during ceremonies performed by the household in the last 30 days preceding the date of enquiry as also the meals served to guests and employees (non-members only) on any other occasion (other than ceremonies) and also to estimate the amount of expenditure incurred by the household on these occasions under various broad groups of items e.g. food, clothing & footwear, misc. goods & services, durable goods etc.

Literal question

Serial no. of ceremony

Interviewer instructions

This item is to be filled in if the household had reported to have performed one or more ceremonies. Particulars about the ceremony performed last (within the reference period 30 days) are to be recorded first. Other ceremonies performed within the period are to be noted one by one in sequential order of the dates of performance of the ceremonies.

Code of ceremony (B13_1_q3)

File: Block 13 - Household expenditure on ceremony

Overview

State - Region (St_Region)

File: Block 14 - Summary of household expenditure

Overview

Type: Discrete
Format: character
Width: 3

Valid cases: 115354
Invalid: 0

Description

Regions are hierarchical domains of study below the level of State/ Union Territory in the NSS.

Literal question

State - Region

Interviewer instructions

State and NSS region to which the sample village/ block belongs to will be recorded here as per the code list.

State (State)

File: Block 14 - Summary of household expenditure

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 115354
Invalid: 0

Description

This refers to the following states of India: Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal.

Literal question

State

Interviewer instructions

State to which the sample village/ block belongs to will be recorded here as per the code list.

Sub Sample "1"or "2" (S_Sample)

File: Block 14 - Summary of household expenditure

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 115354
Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Literal question

Sub Sample "1"or "2"

Interviewer instructions

Record 1 or 2 depending on whether the selected sample village/block is central sample or state sample

Sample (Sample)

File: Block 14 - Summary of household expenditure

Description

In this entry the household expenditure on broad group of footwear in the last 30 days has been recorded.

Value of total consumption of misc consumer goods (in Rs. 0.00) in the last 30 days (B8_Item_579_Col_4)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 9	Minimum: 0
Decimals: 2	Maximum: 100035
Range: 0-100035	Mean: 101
	Standard deviation: 311.7

Description

In this entry the household expenditure on broad group of miscellaneous consumer goods in the last 30 days has been recorded.

Value of total consumption of misc consumer services (in Rs. 0.00) in the last 30 days (B8_Item_629_Col_4)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 9	Minimum: 0
Decimals: 2	Maximum: 250035
Range: 0-250035	Mean: 133.2
	Standard deviation: 1084.4

Description

In this entry the household expenditure on broad group of miscellaneous consumer services in the last 30 days has been recorded.

Value of total consumption on rent (in Rs. 0.00) in the last 30 days (B8_Item_639_Col_4)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 7	Minimum: 0
Decimals: 2	Maximum: 5500
Range: 0-5500	Mean: 40
	Standard deviation: 152.5

Description

In this entry the household expenditure on broad group of rent in the last 30 days has been recorded.

Value of total consumption on taxes and cesses (in Rs. 0.00) in the last 30 days (B8_Item_649_Col_4)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 7	Minimum: 0
Decimals: 2	Maximum: 1651.5
Range: 0-1651.5	Mean: 6.5
	Standard deviation: 34.4

Description

In this entry the household expenditure on broad group of taxes and cesses in the last 30 days has been recorded.

Value of total consumption on education (in Rs. 0.00) in the last 30 days (B8_1_Item_659_Col_4)

File: Block 14 - Summary of household expenditure

Overview

Value of total consumption on education (in Rs. 0.00) in the last 30 days (B8_1_Item_659_Col_4)

File: Block 14 - Summary of household expenditure

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 9	Minimum: 0
Decimals: 2	Maximum: 400154
Range: 0-400154	Mean: 140
	Standard deviation: 1234.1

Description

In this entry the household expenditure on broad group of education in the last 30 days has been recorded.

Value of total consumption on medical expenses : non- institutional (in Rs. 0.00) in the last 30 days (B8_1_Item_669_Col_4)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 4	Minimum: 0
Decimals: 2	Maximum: 0
Range: 0-0	Mean: 0
	Standard deviation: 0

Description

In this entry the household expenditure on broad group of medical expenses (non-institutional) in the last 30 days has been recorded.

Value of total consumption on medical expenses : institutional (in Rs. 0.00) in the last 30 days (B8_1_Item_679_Col_4)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 4	Minimum: 0
Decimals: 2	Maximum: 0
Range: 0-0	Mean: 0
	Standard deviation: 0

Description

In this entry the household expenditure on broad group of medical expenses (institutional) in the last 30 days has been recorded.

Value of total consumption of durable goods (in Rs. 0.00) in the last 30 days (B8_1_Item_819_Col_4)

File: Block 14 - Summary of household expenditure

Overview

Value of total consumption of durable goods (in Rs. 0.00) in the last 30 days (B8_1_Item_819_Col_4)

File: Block 14 - Summary of household expenditure

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 9	Minimum: 0
Decimals: 2	Maximum: 180000
Range: 0-180000	Mean: 65.1
	Standard deviation: 965.7

Description

In this entry the household expenditure on the broad group of durables in the last 30 days has been recorded.

Value of total consumption of non food items (in Rs. 0.00) in the last 30 days (Tot_Exp_Non_Food)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 9	Minimum: 0
Decimals: 2	Maximum: 400773.6
Range: 0-400773.55	Mean: 783.4
	Standard deviation: 2131.5

Description

In this entry the household expenditure on the broad group of non-food items in the last 30 days has been recorded.

Value of total monthly consumption expenditure on food and non-food items (in Rs. 0.00) in the last 30 days (Tot_Exp_Food_Non_Food)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 9	Minimum: 4
Decimals: 2	Maximum: 402855.7
Range: 4-402855.69	Mean: 1859.9
	Standard deviation: 2432.3

Description

In this entry the household expenditure on the food and non-food items in the last 30 days has been recorded.

Household Size (HH_Size)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 4	Minimum: 100
Decimals: 0	Maximum: 6400
Range: 100-6400	Mean: 489.4
	Standard deviation: 255.4

Description

Total number of members in the household

Household Size (HH_Size)

File: Block 14 - Summary of household expenditure

Literal question

How many members are there in the household?

Monthly Per Capita Expenditure (in Rs. 0.00) in the last 30 days (Tot_Exp_Food_Non_Food / HH_Size) (MPCE)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 8	Minimum: 1
Decimals: 2	Maximum: 68559
Range: 1-68558.97	Mean: 432.2
	Standard deviation: 582.6

Description

It has been obtained by dividing the total consumer expenditure by the household size. The result of the division has been recorded in rupees with two places of decimal.

For a household, this is household consumer expenditure over a period of 30 days divided by household size. A person's MPCE is understood as that of the household to which he/she belongs.

Interviewer instructions

In this block, the expenditure on broad groups of items is to be recorded in column(6). The figures for this summary block should be copied from the entries made against various sub-total/total lines of block 5 to 9.2.

Value of total consumption of clothing (in Rs. 0.00) in the last 365 days (B6_2_Item_509_Col_9)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 2	Maximum: 38550
Range: 0-38550	Mean: 1624.8
	Standard deviation: 1600.1

Description

In this entry the household expenditure on the broad group of clothing in the last 365 days has been recorded.

Value of total consumption of footwear (in Rs. 0.00) in the last 365 days (B7_2_Item_519_Col_8)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 2	Maximum: 10300
Range: 0-10300	Mean: 278.3
	Standard deviation: 358.2

Description

Value of total consumption of footwear (in Rs. 0.00) in the last 365 days (B7_2_Item_519_Col_8)

File: Block 14 - Summary of household expenditure

In this entry the household expenditure on the broad group of footwear in the last 365 days has been recorded.

Value of total consumption of education (in Rs. 0.00) in the last 365 days (B8_1_Item_659_Col_6)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 9	Minimum: 0
Decimals: 2	Maximum: 401504
Range: 0-401504	Mean: 792.9
	Standard deviation: 2419.6

Description

In this entry the household expenditure on the broad group of education in the last 365 days has been recorded.

Value of total consumption on medical expenses : institutional (in Rs. 0.00) in the last 365 days (B8_1_Item_679_Col_6)

File: Block 14 - Summary of household expenditure

Overview

Type: Continuous	Valid cases: 115354
Format: numeric	Invalid: 0
Width: 4	Minimum: 0
