## Overview

### Identification

---

ID NUMBER  
IND-CSO-ASI-2013-14

### Version

---

VERSION DESCRIPTION  
Version1.0

PRODUCTION DATE  
2016-08-08

#### NOTES

The final unit level data of ASI 2013-14 is available in electronic media that can be had from Computer Centre, MOSPI on payment. The same is reproduced here. Meta data

contains Schedule, Code list and Tabulation programme. These may be referred before processing the data.

Reports/Tables and related documents are attached.

Variable common to all the blocks is DSL.

## Overview

---

ABSTRACT  
Introduction

The Annual Survey of Industries (ASI) is the principal source of industrial statistics in India. It provides statistical information to assess and evaluate, objectively and realistically, the changes in the growth, composition and structure of organized manufacturing sector comprising activities related to manufacturing processes, repair services, gas and water supply and cold storage. The survey has so far been conducted annually under the statutory provisions of the Collection of Statistics (COS) Act, 1953 and the rules framed there-under in 1959 except in the State of Jammu & Kashmir where it is conducted under the J&K Collection of Statistics Act, 1961 and rules framed there under in 1964. From ASI 2010-11 onwards, the survey is to be conducted annually under the statutory provisions of the Collection of Statistics (COS) Act, 2008 and the rules framed there-under in 2011 except in the State of Jammu & Kashmir where it is to be conducted under the J&K Collection of Statistics Act, 1961 and rules framed there under in 1964.

ASI schedule is the basic tool to collect required data for the factories registered under Sections 2(m)(i) and 2(m)(ii) of the Factories Act, 1948. In addition to Sections 2(m)(i) & 2(m)(ii) of the Factories Act, 1948, bidi & cigar units, employing 10 or more workers with the aid of power and 20 or more workers without the aid of power and registered under the Bidi & Cigar Workers (Conditions of Employment) Act, 1966 are also covered in ASI. Although the scope of the ASI is extended to all registered manufacturing establishments in the country, establishments under the control of the Defence Ministry, oil storage and distribution units, restaurants and cafes and technical training institutions not producing anything for sale or exchange were kept outside the coverage of the ASI.

The schedule for ASI, at present, has two parts. Part-I of ASI schedule, processed at the CSO (IS Wing), Kolkata, aims to collect data on assets and liabilities, employment and labour cost, receipts, expenses, input items: indigenous and imported, products and by-products, distributive expenses, etc. Part-II of ASI schedule is processed by the Labour Bureau. It aims to collect data on different aspects of labour statistics, namely, working days, man-days worked, absenteeism, labour turnover, man-hours worked etc. The concepts and definition of various terms used in collection of ASI data are given in Chapter Two, and the details of the schedule, item descriptions and procedures for collecting information for each item.

## KIND OF DATA

Sample survey data [ssd]

## UNITS OF ANALYSIS

The primary unit of enumeration in the survey is a factory in the case of manufacturing industries, a workshop in the case of repair services, an undertaking or a licensee in the case of electricity, gas & water supply undertakings and an establishment in the case of bidi & cigar industries. The owner of two or more establishments located in the same State and pertaining to the same industry group and belonging to same scheme (census or sample) is, however, permitted to furnish a single consolidated return. Such consolidated returns are common feature in the case of bidi and cigar establishments, electricity and certain public sector undertakings.

## Scope

## NOTES

ASI schedule is the basic tool to collect required data for the factories registered under Sections 2(m)(i) and 2(m)(ii) of the Factories Act, 1948. The schedule for ASI, at present, has two parts. Part-I of ASI schedule, processed at the CSO (IS Wing), Kolkata, aims to collect data on assets and liabilities, employment and labour cost, receipts, expenses, input items: indigenous and imported, products and by-products, distributive expenses, etc. Part-II of ASI schedule is processed by the Labour Bureau. It aims to collect data on different aspects of labour statistics, namely, working days, mandays worked, absenteeism, labour turnover, man-hours worked etc.

## TOPICS

Topic	Vocabulary	URI
Macroeconomics & Growth	World Bank	<a href="http://www.surveynetwork.org/toolkit">http://www.surveynetwork.org/toolkit</a>

## KEYWORDS

FIXED CAPITAL, WORKING CAPITAL, EMPLOYEES, WAGES AND SALARIES, TOTAL EMOLUMENTS, FUELS CONSUMED, DEPRECIATION, NET VALUE ADDED, TOTAL INPUT, TOTAL OUTPUT, BLOCK-A (IDENTIFICATION BLOCK FOR OFFICIAL USE), BLOCK-B (TO BE FILLED BY OWNERS), BLOCK-C (FIXED ASSETS), BLOCK-D (WORKING CAPITAL AND LOANS), BLOCK-E (EMPLOYMENT AND LABOUR COST), BLOCK-F (OTHER EXPENSES), BLOCK-G (OTHER OUTPUT/RECEIPTS), BLOCK-H (INPUT ITEMS - Indigenous items consumed), BLOCK-I (INPUT ITEMS - Directly imported items only (consumed)), BLOCK-J (PRODUCTS AND BY-PRODUCTS (Manufactured by the unit))

## Coverage

## GEOGRAPHIC COVERAGE

The ASI extends its coverage to the entire country upto state level.

## UNIVERSE

The survey cover factories registered under the Factory Act 1948.

## Sampling

### Sampling Procedure

---

The sampling design adopted in ASI has undergone considerable changes from time to time, taking into account the technical and other requirements. The earlier sampling design had been adopted from ASI 2007-08 to ASI 2011-12. From ASI 2012-13, a new sampling design has been adopted following the recommendation of Dr. S. L. Shetty Committee and approved by the SCIS subsequently. According to the new sampling design, all the factories in the updated frame are divided into two sectors, viz., Census and Sample.

Census Sector: Census Sector consists of the following units:

- a) All industrial units belonging to the six less industrially developed states/ UT's viz. Manipur, Meghalaya, Nagaland, Sikkim, Tripura and Andaman & Nicobar Islands.
- b) For the rest of the twenty-six states/ UT's., (i) units having 100 or more employees, and (ii) all factories covered under Joint Returns.
- c) After excluding the Census scheme units, as defined above, all units belonging to the strata (State x District x Sector x 4 digit NIC 2008) having less than or equal to 4 units are also considered under Census Scheme. It may be noted that in the formation of stratum, the sectors are considered as Bidi, Manufacturing and Electricity.

Sample Sector

All the remaining units in the frame are considered under Sample Scheme. For all the states, strata are formed for each State x District x Sector x 4 digit NIC2008 factories. The units are arranged in descending order of their number of employees. Samples are drawn as per Circular Systematic Sampling technique for this scheme. An even number of units with a minimum of 4 units are selected and distributed in four sub-samples. It may be noted that all the 4 sub-samples from a particular stratum may not have equal number of units. Out of these 4 sub-samples, two pre-assigned sub-samples are given to NSSO (FOD) and the other two sub-samples are given to State/UT for data collection.

The entire census units plus all the units belonging to the two sub-samples given to NSSO (FOD) are treated as the Central Sample.

The units belonging to the two sub-samples allocated to States/UTs are to be canvassed by the respective States/UTs. Hence, State/UT has to use the data (collected by NSSO (FOD) and processed by CSO (IS Wing)) along with the state sample data while deriving the district level estimates for their respective State/UT.

The entire census units plus all the units belonging to the two sub-samples given to NSSO (FOD) plus all the units belonging to the two sub-samples given to State/UT are required for pooling of Central and State Samples.

### Deviations from Sample Design

---

The sampling design adopted in ASI has undergone considerable changes from time to time, taking into account the technical and other requirements. The present sampling design has been adopted from ASI 2007-08. All the factories in the updated frame are divided into two sectors, viz., Census and Sample.

### Weighting

---

WGT (Multiplier Factor) is the weighing variable from Block A : Identification Block. For Census data WGT has been given weight as 1.

# Questionnaires

## Overview

---

Annual Survey of Industries Questionnaire is divided into different blocks:

**BLOCK A. IDENTIFICATION BLOCK** - This block has been designed to collect the descriptive identification of the sample enterprise. The items are mostly self-explanatory.

**BLOCK B. TO BE FILLED BY OWNER OF THE FACTORY** - This block has been designed to collect the particulars of the sample enterprise. This point onwards, all the facts and figures in this return are to be filled in by owner of the factory.

**BLOCK C: FIXED ASSETS** - Fixed assets are of a permanent nature having a productive life of more than one year, which is meant for earning revenue directly or indirectly and not for the purpose of sale in ordinary course of business. They include assets used for production, transportation, living or recreational facilities, hospital, school, etc. Intangible fixed assets like goodwill, preliminary expenses including drawing and design etc are excluded for the purpose of ASI. The fixed assets have, at the start of their functions, a definite value, which decreases with wear and tear. The original cost less depreciation indicates that part of value of fixed assets, which has not yet been transferred to the output. This value is called the residual value. The value of a fixed asset, which has completed its theoretical working life should always be recorded as Re.1/-. The revalued value is considered now. But depreciation will be taken on original cost and not on revalued cost.

**BLOCK D: WORKING CAPITAL & LOANS** - Working capital represents the excess of total current assets over total current liabilities.

**BLOCK E : EMPLOYMENT AND LABOUR COST** - Particulars in this block should relate to all persons who work in and for the establishment including working proprietors and active business partners and unpaid family workers. However, Directors of incorporated enterprises who are paid solely for their attendance at meeting of the Board of Directors are to be excluded.

**BLOCK F : OTHER EXPENSES** - This block includes the cost of other inputs as both the industrial and nonindustrial service rendered by others, which are paid by the factory and most of which are reflected in the ex-factory value of its production during the accounting year.

**BLOCK G : OTHER INCOMES** - In this block, information on other output/receipts is to be reported.

**BLOCK H: INPUT ITEMS (indigenous items consumed)** - This block covers all those goods (raw materials, components, chemicals, packing material, etc.), which entered into the production process of the factory during the accounting year. Any material used in the production of fixed assets (including construction work) for the factory's own use should also be included. All intermediate products consumed during the year are to be excluded. Intermediate products are those, which are produced by the factory but are, subjected to further manufacture. For example, in a cotton textile mill, yarn is produced from raw cotton and the same yarn is again used for manufacture of cloth. An intermediate product may also be a final product in the same factory. For example, if the yarn produced by the factory is sold as yarn, it becomes a final product and not an intermediate product. If however, a part of the yarn produced by a factory is consumed by it for manufacture of cloth, that part of the yarn so used will be an intermediate product.

**BLOCK I: INPUT ITEMS – directly imported items only (consumed)** - Information in this block is to be reported for all imported items consumed. The items are to be imported by the factory directly or otherwise. The instructions for filling up of this block are same as those for Block H. All imported goods irrespective of whether they are imported directly by the unit or not, should be recorded in Block I. Moreover, any imported item, irrespective of whether it is a basic item for manufacturing or not, should be recorded in Block I. Hence 'consumable stores' or 'packing items', if imported, should be recorded in Block I and not in Block H.

**BLOCK J: PRODUCTS AND BY-PRODUCTS (manufactured by the unit)** - In this block information like quantity manufactured, quantity sold, gross sale value, excise duty, sales tax paid and other distributive expenses, per unit net sale value and ex-factory value of output will be furnished by the factory item by item. If the distributive expenses are not available product-wise, the details may be given on the basis of reasonable estimation.

## Data Collection

### Data Collection Dates

---

Start	End	Cycle
2014-10-01	2015-06-30	N/A

### Data Collection Mode

---

Statutory return submitted by factories as well as Face to Face

### Data Collection Notes

---

ASI Schedule has two parts: Part-I and Part-II. Part-I of ASI schedule aims to collect data on assets and liabilities, employment and labour cost, receipts, expenses, input items - indigenous and imported, products and by-products, distributive expenses etc. Part-II of ASI schedule aims to collect data on different aspects of labour statistics, namely, working days, mandays worked, absenteeism, labour turnover, manhours worked, earning and social security benefits.

### Questionnaires

---

Annual Survey of Industries Questionnaire is divided into different blocks:

**BLOCK A. IDENTIFICATION BLOCK** - This block has been designed to collect the descriptive identification of the sample enterprise. The items are mostly self-explanatory.

**BLOCK B. TO BE FILLED BY OWNER OF THE FACTORY** - This block has been designed to collect the particulars of the sample enterprise. This point onwards, all the facts and figures in this return are to be filled in by owner of the factory.

**BLOCK C: FIXED ASSETS** - Fixed assets are of a permanent nature having a productive life of more than one year, which is meant for earning revenue directly or indirectly and not for the purpose of sale in ordinary course of business. They include assets used for production, transportation, living or recreational facilities, hospital, school, etc. Intangible fixed assets like goodwill, preliminary expenses including drawing and design etc are excluded for the purpose of ASI. The fixed assets have, at the start of their functions, a definite value, which decreases with wear and tear. The original cost less depreciation indicates that part of value of fixed assets, which has not yet been transferred to the output. This value is called the residual value. The value of a fixed asset, which has completed its theoretical working life should always be recorded as Re.1/-. The revalued value is considered now. But depreciation will be taken on original cost and not on revalued cost.

**BLOCK D: WORKING CAPITAL & LOANS** - Working capital represents the excess of total current assets over total current liabilities.

**BLOCK E : EMPLOYMENT AND LABOUR COST** - Particulars in this block should relate to all persons who work in and for the establishment including working proprietors and active business partners and unpaid family workers. However, Directors of incorporated enterprises who are paid solely for their attendance at meeting of the Board of Directors are to be excluded.

**BLOCK F : OTHER EXPENSES** - This block includes the cost of other inputs as both the industrial and nonindustrial service rendered by others, which are paid by the factory and most of which are reflected in the ex-factory value of its production during the accounting year.

**BLOCK G : OTHER INCOMES** - In this block, information on other output/receipts is to be reported.

**BLOCK H: INPUT ITEMS (indigenous items consumed)** - This block covers all those goods (raw materials, components, chemicals, packing material, etc.), which entered into the production process of the factory during the accounting year. Any material used in the production of fixed assets (including construction work) for the factory's own use should also be included. All intermediate products consumed during the year are to be excluded. Intermediate products are those, which are produced by the factory but are, subjected to further manufacture. For example, in a cotton textile mill, yarn is produced from raw cotton and the same yarn is again used for manufacture of cloth. An intermediate product may also be a final

product in the same factory. For example, if the yarn produced by the factory is sold as yarn, it becomes a final product and not an intermediate product. If however, a part of the yarn produced by a factory is consumed by it for manufacture of cloth, that part of the yarn so used will be an intermediate product.

**BLOCK I: INPUT ITEMS** – directly imported items only (consumed) - Information in this block is to be reported for all imported items consumed. The items are to be imported by the factory directly or otherwise. The instructions for filling up of this block are same as those for Block H. All imported goods irrespective of whether they are imported directly by the unit or not, should be recorded in Block I. Moreover, any imported item, irrespective of whether it is a basic item for manufacturing or not, should be recorded in Block I. Hence 'consumable stores' or 'packing items', if imported, should be recorded in Block I and not in Block H.

**BLOCK J: PRODUCTS AND BY-PRODUCTS** (manufactured by the unit) - In this block information like quantity manufactured, quantity sold, gross sale value, excise duty, sales tax paid and other distributive expenses, per unit net sale value and ex-factory value of output will be furnished by the factory item by item. If the distributive expenses are not available product-wise, the details may be given on the basis of reasonable estimation.

## Data Collectors

Name	Abbreviation	Affiliation
Field Operation Division, NSSO	NSSO( FOD)	Ministry of Statistics and Programme Implementation

## Supervision

NSSO under the the Ministry of Statistics and PI, Government of India is responsible for supervision of data collection.

The entire field work pertaining to central sample of Annual Survey of Industries is undertaken by the Field Operations Division (FOD) of NSSO. The ASI fieldwork is to be done by the Superintending Officers (S.Os) while the headquarters of FOD is responsible for the overall planning and execution of field work, control and monitoring of the progress at all India level, the Deputy Director Generals of the six Zonal Offices co-ordinate and monitor the progress in their jurisdiction. Planning and execution of the field work in the jurisdiction of Regional Office is the responsibility of the Regional Head.

Due to the introduction of Web Portal for collection, compilation and dissemination of ASI data, the entire operation will be web-based, and functions and operations as defined in the Operational Manual of ASI web portal. However, keeping in view that the existing practices and procedures will be followed for some more time either by FOD or by DES.

There is an in-built system of providing training to all Superintending Officers (S.Os) in the technique of conducting ASI work. Zonal training centres set up at Jaipur, Lucknow, Nagpur, Bangalore, Kolkata and Guwahati each headed by a Deputy Director General are responsible for providing training on ASI to S.Os. In these centers, special intensive courses of training on ASI are organised, in addition to other regular training programmes. This is apart from the training imparted to the S.Os in the Sub-Regional and Regional Offices before entrusting them with the actual field work

ASI is a time-bound survey. It is therefore extremely important to complete the entire fieldwork in the prescribed timeframe. For this purpose allotment to be made to the available number of S.Os in all the sub-regional offices/notional sub-regional offices at Regional Headquarters. In allotting the ASI factories among the S.Os, it is to be ensured that the total workload (including that of Agricultural Statistics work) per S.Os is as balanced and equitable as possible. This should be done after a proper assessment of size, location, geographical contiguity and the experience of the worker to the extent possible. It is also envisaged that at the time of allotting factories to the S.Os. the jurisdiction and factories be rotated among the S.Os in each SRO, as per the work allocation instructions issued by the Headquarters.

## Data Processing

### Data Editing

---

Data submitted by the factories undergo manual scrutiny at different stages.

- 1) They are verified by field staff of NSSO from factory records.
- 2) Verified returns are manually scrutinized by senior level staff before sending to data processing centre.
- 3) At the data processing centre these are scrutinized before data entry.
- 4) The entered data are subjected to computer editing and corrections.
- 5) Tabulated data are checked for anomalies and consistency with previous results.

### Other Processing

---

Inspection plays a very important role in reducing non-sampling errors. To have quality in ASI data, the fieldwork needs to be inspected by officers at different levels. In doing so the norms laid out by the Headquarters for Group A officers must be strictly adhered to. These inspections may be concurrent or non-concurrent. However, non-concurrent inspection is to be normally preferred and conducted. Immediately after conducting an inspection, a suitable inspection note is to be drawn on the prescribed format and handed over to the officers concerned on next working day. It will be desirable to pinpoint in the inspection note, the mistakes noticed and suggest remedial measures to avoid the recurrence of such errors in future. The findings of the inspections of different supervisory officers should also be discussed in the monthly meeting for refining the concept of the S.Os on ASI.

Scrutiny of the filled-in-returns is another important measure for maintaining quality of ASI data. It also facilitates taking immediate steps to apprise the concerned field worker about the mistakes committed by him. Therefore, the scrutiny work is to be taken up immediately after the S.O. has submitted the schedules to other S.O. He/She should scrutinise thoroughly all the returns submitted in accordance with the scrutiny instructions issued by the headquarters from time to time. The scrutiniser S.O. is required to note down the scrutiny points including arithmetical check, identification details/discrepancies noticed on the prescribed scrutiny sheet. The compiler S.Os are required to furnish the clarifications on the scrutiny points promptly. On receipt of the clarifications, the concerned officers should examine and incorporate corrections, if any, in the returns and attach the clarification with the office copy.

## Data Appraisal

### **Estimates of Sampling Error**

Relative Standard Error (RSE) is calculated in terms of worker, wages to worker and GVA using the formula (Please refer to Estimation Procedure document in external resources).

### **Other forms of Data Appraisal**

To check for consistency and reliability of data the same are compared with the NIC-2digit level growth rate at all India Index of Production (IIP) and the growth rates obtained from the National Accounts Statistics at current and constant prices for the registered manufacturing sector.

# File Description

# Variable List

**blka201314**

Content	Block - A- Identification Particulars : The file contains the Identification variables of Factory. It also contains the weighting coefficient or Multiplier - WGT. Variables under this blocks are: YR, DSL common in all the blocks and may be used for relation. Other Identification variables are Scheme, State, NIC 5 digit, District and Sector.
Cases	57968
Variable(s)	22
Structure	Type: relational Keys: Year(Year), DSL(DSL)
Version	
Producer	CSO (IS Wing) Kolkata, MOSPI
Missing Data	

**Variables**

ID	Name	Label	Type	Format	Question
V138	Year	Year	discrete	character	ASI 2013-14 is the accounting year of the factory ending on 31st March 2014.

**blkd201314**

Content	Working capital represents the excess of total current assets over total current liabilities. Working capital and loans: This is defined to include all physical inventories owned, held or controlled by the factory as on the closing day of the accounting year such as the materials, fuels and lubricants, stores, etc. that enter into products manufactured by the factory itself or supplied by the factory to others for processing. Physical working capital also includes the value of stock of materials, fuels and stores, etc. purchased expressly for re-sale, semi-finished goods and goods-in-process on account of others and goods made by the factory which are ready for sale at the end of the accounting year. However, it does not include the stock of the materials, fuels, stores, etc. supplied by others to the factory for processing. Finished goods processed by others from raw materials supplied by the factory and held by them are included and finished goods processed by the factory from raw materials supplied by others, are excluded. Outstanding loans represent all loans, whether short-term or long-term, whether interest bearing or not, outstanding according to the books of the factory as on the closing day of accounting year.

**blke201314**

Content	Block E - Employment and Labour cost : Information collected in this block is regarding employment and labour cost. In this block emoluments of the employees to be collected. Emoluments are defined as wages paid to all employees plus imputed value of benefits in kind, i.e., the net cost to the employers on those goods and services provided to employees free of charge or at markedly reduced cost which are clearly and primarily of benefit to the employees as consumers. It includes profit sharing, festival and other bonuses and ex-gratia payments paid at less frequent intervals (i.e. other than bonus paid more or less regularly for each period). Benefits in kind include supplies or services rendered such as housing, medical, education and recreation facilities. Personal insurance, income tax, house rent allowance, conveyance, etc. for payment by the factory also is included in the emoluments. The variables are : YR, DSL, Item No. representing category of staff- male workers, female workes, workers employed through contractors, supervisory staff, unpaid family members, Mandays (Manufacturing), Mandays (non-manufacturing), Average number of persons worked, No. of mandays paid for, Wages/salaries

**blkf201314**

Content	Block - F Other Expenses : (All the items are Expenditure incurred in Rs.) This block includes the cost of other inputs as both the industrial and nonindustrial service rendered by others, which are paid by the factory and most of which are reflected in the ex-factory value of its production during the accounting year. Variables in this block are: YR, DSL, work done by others, repair & maintenance of building, Repair & maintenance of fixed assets, operating expenses, non-operating expenses, Insurance charges, Rent paid for plant & machinery and other fixed assets, Total expenses, Rent paid for buildings, Rent/Royalties, Interest paid and Purchase value of goods sold in the same condition as purchased.

**blkh201314**

Content	Block H: indigenous input items consumed: This block covers all the goods (raw materials, components, chemicals, packing material, etc.) which entered into the production process of the factory during the accounting year. Any material used in the production of fixed assets (including construction work) for the factory's own use should also be included. All intermediate products consumed during the year are to be excluded. Intermediate products are those, which are produced by the factory but are, subjected to further manufacture. For example, in a cotton textile mill, yarn is produced from raw cotton and the same yarn is again used for manufacture of cloth. An intermediate product may also be a final product in the same factory. For example, if the yarn produced by the factory is sold as yarn, it becomes a final product and not an intermediate product. If however, a part of the yarn produced by a factory is consumed by it for manufacture of cloth, that part of the yarn so used will be an intermediate product.

**blkI201314**

Content	Block I:Input Items - Directly imported input items consumed Information in this block is to be reported for all imported items consumed. The items are to be imported by the factory directly or otherwise. All imported goods irrespective of whether they are imported directly by the unit or not, should be recorded in Block I. Moreover, any imported item, irrespective of whether it is a basic item for manufacturing or not, should be recorded in Block I. Hence "consumable stores" or "packing items", if imported, should be recorded in Block I and not in Block H.

## Year (Year)

File: blka201314

**Overview**

Type: Discrete	Valid cases: 57968
Format: character	Invalid: 0
Width: 4	

**Description**

ASI 2013-14 is the accounting year of the factory ending on 31st March 2014.

**Pre question**

ASI 2013-14 is the accounting year of the factory ending on 31st March 2014.

**Literal question**

ASI 2013-14 is the accounting year of the factory ending on 31st March 2014.

## Block (BLK)

File: blka201314

**Overview**

Type: Discrete	Valid cases: 57968
Format: character	Invalid: 0
Width: 1	

**Description**

Block A of Schedule (Questionnaire)

**Pre question**

Block A of Schedule (Questionnaire)

## DSL (DSL)

File: blka201314

**Overview**

Type: Discrete	Valid cases: 57968
Format: character	Invalid: 0
Width: 6	

**Description**

Despatch Serial number (DSL) numbers are unique across the region for a particular year of survey. However, the same factory may have different DSL numbers in different years of survey.

**Pre question**

Despatch Serial number (DSL)

## PSL (PSL)

File: blka201314

**Overview**

Type: Discrete	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 5	
Decimals: 0	

**Description**

The Permanent Serial Number (PSL) is unique in State X NIC X Sector.

**Pre question**

Permanent Serial Number (PSL)

## Scheme Code (Scheme)

File: blka201314

### Overview

Type: Discrete	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-2	

### Description

This is the code usually given for census and sample units as per sampling design. The census unit is given code 1 and sample unit is given code 2.

### Pre question

Scheme Code (Census -1, Sample -2)

## NIC 4 digit (NIC4digit)

File: blka201314

### Overview

Type: Discrete	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 4	
Decimals: 0	

### Description

Industry code as per frame: This number is provided by FOD offices while collecting the list from CIF as per detail given during registration. This code is given as per NIC 2008.

### Pre question

Ind. Code (4-digit level of NIC-2008). Not provided as such coded 9999.

## NIC 5 digit (NIC5digit)

File: blka201314

### Overview

Type: Continuous	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 5	Minimum: 1117
Decimals: 0	Maximum: 97000
Range: 1631-96010	Mean: 21810.1
	Standard deviation: 10174.2

### Description

Industry code as per return: This code is given as per maximum ex-factory value of output of major activities of the multiple products and byproducts manufactured by the units. A valid NIC code needs to be given from NIC 2008.

### Pre question

Industry code as per return: A valid NIC code needs to be given from NIC 2008.

## State Code (StateCode)

File: blka201314

### Overview

## State Code (StateCode)

File: blka201314

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 1-36

Valid cases: 57968  
Invalid: 0

### Description

The code has been provided for all the selected factories both under Census Sector and the Sample Sector.

### Pre question

State code for the states of India.

## District Code (District)

File: blka201314

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 99-99

Valid cases: 57968  
Invalid: 0

### Description

District code indicates district of the given State.

## Rural Urban Code (Rural\_Urban)

File: blka201314

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-2

Valid cases: 57968  
Invalid: 0

### Description

This code is to be given by FOD offices according to the location of the units. The codes for units located in the rural areas are 1 and for those in the urban areas are 2. No other code except 1 and 2 can be given here; nor should it be left blank.

### Pre question

The codes for units located in the rural areas are 1 and for those in the urban areas are 2.

## RO SRO Code (RO\_SRO)

File: blka201314

### Overview

Type: Discrete  
Format: numeric  
Width: 4  
Decimals: 0  
Range: 9999-9999

Valid cases: 57968  
Invalid: 0

### Description

The code has been provided for all the selected factories both under Census Sector and the Sample Sector and the same is to be reported by the field staff of FOD. This code is not provided as such it is recorded as 9999.

### Pre question

This code is not provided as such it is recorded as 9999.

## No of Units (NoofUnits)

File: blka201314

### Overview

Type: Continuous	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 2	Minimum: 1
Decimals: 0	Maximum: 60
Range: 1-60	Mean: 1.1
	Standard deviation: 0.7

### Description

Number of units for which the schedule (return) is compiled will be recorded against this item. Here the number of units will be greater than 1 in the case of joint returns.

### Pre question

Number of units for which the schedule (return) is compiled.

## Status of unit (Statusofunit)

File: blka201314

### Overview

Type: Discrete	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-9	

### Description

The number of 'status of unit' codes used in ASI - being too many - has been rationalised and are given below:

Open .....	1,
Closed (for less than or equal to 3 years).....	2,
NOP (for less than or equal to 3 years).....	3,
Deleted .....	4,
Existing but non-response due to closure and owner / occupier is not traceable.....	5
Non-response due to non-existence and owner not traceable (incl. the case of non-existent for more than 3 years) .....	6
Non-response due to production not yet started or accounting year not closed during the year .....	7
Non-response due to other reasons [incl. relevant records are with Court / Income tax or recalcitrant/refuse to submit the return, or factory under prosecution in respect of earlier ASI]....	8
Deleted due to any other reason (incl. de-registration; out of coverage i.e. defence, oil storage, technical training Institute etc. and hotel , etc; and other reason) .....	9

### Pre question

Status of unit (code).

## Bonus (Bonus)

File: blka201314

### Overview

Type: Continuous	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 10	Minimum: 0
Decimals: 0	Maximum: 3218060708
Range: 0-1134492298	Mean: 1527398.5
	Standard deviation: 19443732.4

### Description

## Bonus (Bonus)

### File: blka201314

Profit sharing Bonus

#### Pre question

Profit sharing Bonus.

## Provident Fund (ProvidentFund)

### File: blka201314

#### Overview

Type: Continuous	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 10	Minimum: 0
Decimals: 0	Maximum: 5408300000
Range: -353029-1980867583	Mean: 3097353.6
	Standard deviation: 37292595.6

#### Description

Contribution to Provident Fund and other funds.

#### Pre question

Contribution to Provident Fund and other funds.

## Welfare (Welfare)

### File: blka201314

#### Overview

Type: Continuous	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 10	Minimum: 0
Decimals: 0	Maximum: 3051104149
Range: -37752-3335927322	Mean: 2725948.1
	Standard deviation: 26487610.9

#### Pre question

Workman and staff welfare expenses.

## No. of Working days - Manufacturing (MWorkingdays)

### File: blka201314

#### Overview

Type: Continuous	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 3	Minimum: 0
Decimals: 0	Maximum: 366
Range: 0-486	Mean: 247.5
	Standard deviation: 114.3

#### Description

Number of working days ( Manufacturing Days)

#### Pre question

Number of working days ( Manufacturing Days)

## No. of Working days - Non Manufacturing (NMWorkingdays)

File: blka201314

### Overview

Type: Continuous	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 3	Minimum: 0
Decimals: 0	Maximum: 365
Range: 0-365	Mean: 7.1
	Standard deviation: 38.3

### Description

Number of working days ( Non- Manufacturing Days)

### Pre question

Number of working days ( Non- Manufacturing Days)

## Total no. of Working days (TWorkingdays)

File: blka201314

### Overview

Type: Continuous	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 3	Minimum: 0
Decimals: 0	Maximum: 366
Range: 0-486	Mean: 254.6
	Standard deviation: 110.9

### Description

Number of working days ( Total )

### Pre question

Number of working days ( Total )

## Cost of Production (CostofProd)

File: blka201314

### Overview

Type: Continuous	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 13	Minimum: 0
Decimals: 0	Maximum: 3234210000000
Range: 0-441834000000	Mean: 757695221.7
	Standard deviation: 16097378371.4

### Description

Total cost of production (in Rs.)

### Pre question

Total cost of production (in Rs.)

## Share % of products directly exported (Share)

File: blka201314

### Overview

## Share % of products directly exported (Share)

File: blka201314

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 0-70

Valid cases: 57968  
Invalid: 0  
Minimum: 0  
Maximum: 100  
Mean: 4.2  
Standard deviation: 17.9

### Description

Share (%) of products/ by-products directly exported.

### Pre question

Share (%) of products/ by-products directly exported.

## Multilplier Factor (Multilplier)

File: blka201314

### Overview

Type: Continuous  
Format: numeric  
Width: 11  
Decimals: 8  
Range: 1-26

Valid cases: 57968  
Invalid: 0  
Minimum: 1  
Maximum: 59.4  
Mean: 3.8  
Standard deviation: 5

### Description

Inflation/ Multiplier factor ( 9999.99999999 format)

### Pre question

Inflation/ Multiplier factor ( 9999.99999999 format)

## Year (Year)

File: blk201314

**Overview**

Type: Discrete	Valid cases: 57968
Format: character	Invalid: 0
Width: 4	

**Description**

ASI 2013-14 is the accounting year of the factory ending 31st March 2014.

**Pre question**

ASI 2013-14 is the accounting year of the factory ending on 31st March 2014.

## Block (BLK)

File: blk201314

**Overview**

Type: Discrete	Valid cases: 57968
Format: character	Invalid: 0
Width: 1	

**Description**

Block B of the schedule

**Pre question**

Block B of the schedule

## DSL (DSL)

File: blk201314

**Overview**

Type: Discrete	Valid cases: 57968
Format: character	Invalid: 0
Width: 6	

**Description**

Despatch Serial Number

**Pre question**

Despatch Serial Number

## Type of Organisation (TypeofOrg)

File: blk201314

**Overview**

Type: Continuous	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 1-19	

**Description**

## Type of Organisation (TypeofOrg)

File: blk201314

Type of Organisation

- a) Individual Proprietorship -1
- b) Joint Family (HUF) -2
- c) Partnership -3
- d) Public Limited Company -4
- e) Private Limited Company -5
- f) Government Departmental Enterprise (excluding Khadi, Handloom) -6
- g) Public Corporation by Special Act. of Parliament or State Legislature of PSU -7
- h) Khadi and Village Industries Commission -8
- i) Handlooms -9
- j) Co-operative Society -10
- k) Others (including Trusts, Wakf Boards, etc.) -19

### Pre question

Type of Organisation

## Type of Ownership (TypeofOwn)

File: blk201314

### Overview

Type: Discrete	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-6	

### Description

Type of ownership

### Pre question

Type of ownership

## Whether unit has ISO Certification, 14000 Series (ISO)

File: blk201314

### Overview

Type: Discrete	Valid cases: 57968
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-2	

### Description

Whether unit has ISO Certification, 14000 Series

If the units is having ISO Certificate of 14000 series, code 1 will be recorded, otherwise code 2 will be recorded. Note that the certification must be of 14000 series for recording „yes?. If for a factory, the ISO Certification 14000 series does not apply, it should be given the code 2.

### Pre question

Whether unit has ISO Certification, 14000 Series

## Year of Initial Production (YearofInProd)

File: blk201314

### Overview

## Year of Initial Production (YearofInProd)

File: blk201314

Type: Discrete  
Format: character  
Width: 4

Valid cases: 57968  
Invalid: 0

### Description

Year of initial production (in the format YYYY)

### Pre question

The year of initial production for the factory (and not the year of the completion of factory) is to be recorded here.

## Accounting Year From (AccYrFr)

File: blk201314

### Overview

Type: Discrete  
Format: character  
Width: 6

Valid cases: 57968  
Invalid: 0

### Description

Accounting year (in the format YYYY to YYYY): The accounting year for which the return relates to, is to be reported here.

### Pre question

Accounting year (in the format YYYY to YYYY): The accounting year for which the return relates to, is to be reported here.

## Accounting Year To (AccYrTo)

File: blk201314

### Overview

Type: Discrete  
Format: character  
Width: 6

Valid cases: 57968  
Invalid: 0

### Description

Accounting year (in the format YYYY to YYYY): The accounting year for which the return relates to, is to be reported here.

### Pre question

Accounting year (in the format YYYY to YYYY): The accounting year for which the return relates to, is to be reported here.

## Number of months in operation (Opermnth)

File: blk201314

### Overview

Type: Continuous  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-12

Valid cases: 57968  
Invalid: 0

### Description

Number of months of operation: This item is to record the total number of months in which the factory/industrial concern operated during the accounting year.

### Pre question

Number of months of operation: This item is to record the total number of months in which the factory/industrial concern operated during the accounting year.

## Does your unit have computerised A/C System? (CompAC)

File: blk201314

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-2

Valid cases: 57968  
Invalid: 0

### Description

Does your unit have computerised accounting system? The unit will be considered to have computerized accounting system if they are managing the accounting system using computerized software, and code 1 will be recorded in such cases. Otherwise, code 2 will be recorded.

### Pre question

Does your unit have computerised accounting system? The unit will be considered to have computerized accounting system if they are managing the accounting system using computerized software

## Can your unit supply ASI data in Computer Floppy (SupplyData)

File: blk201314

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-2

Valid cases: 57968  
Invalid: 0

### Description

Can your unit supply ASI data in computer media? If the unit is provided with the soft copy of the return and is able to supply data in soft mode as per the return through computer media, code 1 will be recorded in this item, else code 2.

### Pre question

Can your unit supply ASI data in computer media?

## Year (Year)

File: blkc201314

**Overview**

Type: Discrete	Valid cases: 375060
Format: character	Invalid: 0
Width: 4	

**Description**

ASI 2013-14 is the accounting year of the factory ending 31st March 2014.

**Pre question**

ASI 2013-14 is the accounting year of the factory ending on 31st March 2014.

## Mandays worked Manufacturing (MManDay)

File: blke201314

## Mandays worked Manufacturing (MManDay)

File: blke201314

### Overview

Type: Continuous	Valid cases: 320602
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 0	Maximum: 19799765
Range: 0-15583303	Mean: 29566.9
	Standard deviation: 153354.5

### Description

The total number of man-days worked during the accounting year by each category of employees is obtained by summing up the number of workers attending in each shift over all shifts worked on all working days during the accounting year. This figure excludes persons who are paid but remain on leave/ strike etc. Non-Working day is the day on which neither manufacturing process nor repairing and maintenance work is carried out but the factory and/or office remains open.

### Pre question

Mandays worked manufacturing

## Mandays worked Non Manufacturing (NMManDay)

File: blke201314

### Overview

**Description**

## Work done by others (workdoneby)

File: blkf201314

work done by others on material supplied by the Industrial/ Undertaking: This covers payments made by the factory for contract and commission

work done by others on materials supplied by the factory during the year. Payments to home workers and cost of similar work carried out by the factory?s sister concerns are to be included.

### Pre question

Work done by others

## Repair and Manintenance of Building & other construction

(Rep\_Maint\_buldg)

File: blkf201314

### Overview

Type: Continuous	Valid cases: 51007
Format: numeric	Invalid: 0
Width: 14	Minimum: 0
Decimals: 0	Maximum: 565937535
Range: 0-479200000	Mean: 1106464.4
	Standard deviation: 8899552.9

### Description

The cost of materials consumed by the factory for repair and maintenance of buildings, plant & machinery, pollution control equipment and other fixed assets and cost of repairs and maintenance carried out by others to the factory?s sister concerns is to be included but capitalized repairs are not included. It should be noted that materials consumed for repair and maintenance and those commodities that help to keep the fixed assets of a factory in shape and in a serviceable condition are distinguished from consumable stores, i.e., commodities which indirectly help in production, without having anything to do with the upkeep of fixed assets of the factory. Consumable stores will not be reported here.

### Pre question

Repair & Maintenance of Building & other construction

## Income from Services (Income\_serv)

File: blk201314

**Overview**

Type: Continuous	Valid cases: 46118
Format: numeric	Invalid: 0
Width: 14	Minimum: 0
Decimals: 0	Maximum: 3457000000
Range: 0-31657705112	Mean: 37009600.8
	Standard deviation: 367836983.9

**Description**

## Income from Services (Income\_serv)

File: blk201314

Income from services (industrial/non-industrial including work done for others on materials supplied by them): This item includes receipts for work done for others or for services of an industrial nature rendered to others, as for example contract or commission work done for other establishments on their materials or repair and maintenance on machinery and equipment, whether such services are rendered inside or outside the factory premises. The value reported should be the total amount charged to customers for the work or services performed. It also includes all receipts of the factory from others for services of non-industrial nature such as transportation, agency, consultancy, etc. Income due to exchange rate fluctuation should be included here.

### Literal question

Income from services (industrial/non-industrial including work done for others on materials supplied by them)

## variation in stock of semi-finished goods (Var\_st\_semi\_Fin)

File: blk201314

### Overview

Type: Continuous	Valid cases: 46118
Format: numeric	Invalid: 0
Width: 14	Minimum: -3481501570
Decimals: 0	Maximum: 17416801987
Range: -8286301206-14801471417	Mean: 2333417.2
	Standard deviation: 136614637.8

### Description

variation in stock of semi-finished goods

### Literal question

variation in stock of semi-finished goods

## Value in electricity generated and sold (Val\_elec\_gen\_sold)

File: blk201314

### Overview

Type: Continuous	Valid cases: 46118
Format: numeric	Invalid: 0
Width: 14	Minimum: 0
Decimals: 0	Maximum: 8675897551
Range: 0-44989374656	Mean: 2403597.6
	Standard deviation: 72904426.9

### Description

This item will be applicable to factories other than electricity undertaking where electricity is produced and sold. The entry against this item is not to be made in case of units engaged in the generation, transmission and distribution of electricity. In this case the quantity as well as the value of electricity produced will be shown in Block J. Book value of electricity produced will be shown in case of supply to sister concern under the same ownership and market value in other cases.

### Literal question

Value of electricity generated and sold:

## value of own construction (Val\_own\_Cons)

File: blk201314

### Overview

## value of own construction (Val\_own\_Cons)

File: blk201314

Type: Continuous	Valid cases: 46118

 Mean: 304351.6  
 Standard deviation: 5006912.6

### Description

Rent received for renting out the building for the financial year is reported here.

### Literal question

Rent received for building

## Rent received for land on lease or royalties on mines, quarries etc. (Rent\_land\_etc)

File: blk201314

### Overview

Type: Continuous  
 Format: numeric  
 Width: 14  
 Decimals: 0  
 Range: 0-70000000

Valid cases: 46118  
 Invalid: 0  
 Minimum: 0  
 Maximum: 324000000  
 Mean: 50597.4  
 Standard deviation: 2671634.4

### Description

Rent received for land on lease or royalties on mines, quarries and similar assets: The rent received for the land leased out by the factory or royalty received for any patent of assets.

### Literal question

Rent received for land on lease or royalties on mines, quarries and similar assets:

## Interest received (Int\_received)

File: blk201314

### Overview

## Interest received (Int\_received)

File: blk201314

Type: Continuous  
Format: numeric  
Width: 14  
Decimals: 0  
Range: 0-9239252522

Valid cases: 46118  
Invalid: 0  
Minimum: 0  
Maximum: 7370000000  
Mean: 3852771.9  
Standard deviation: 67419676.6

### Description

Include all interest received on factory account on loans irrespective of duration and nature of agency/party to which loan was given. The interest from fixed deposit will also be included here as fixed deposit of any tenure is now considered as current asset in ASI.

## Sale value of goods sold in the same condition as purchased (Sale\_val\_goods)

File: blk201314

### Overview

Type: Continuous  
Format: numeric  
Width: 14  
Decimals: 0  
Range: 0-58347708000

Valid cases: 46118  
Invalid: 0  
Minimum: 0  
Maximum: 97113586921  
Mean: 74656373.7  
Standard deviation: 839815045.3

### Description

Sale value of goods sold in the same condition as purchased: The sale value, ex-factory of all goods sold in the accounting year in the same condition as purchased is to be reported.

### Literal question

Sale value of goods sold in the same condition as purchased

## Total Subsidies (Tot\_Sub)

File: blk201314

### Overview

Type: Continuous  
Format: numeric  
Width: 14  
Decimals: 0  
Range: 0-22779868550

Valid cases: 46118  
Invalid: 0  
Minimum: 0  
Maximum: 34886500000  
Mean: 7105801.4  
Standard deviation: 329074418.8

### Description

A subsidy is a form of financial assistance paid to a business or economic sector. Most subsidies are made by the government to producers or distributors in an industry to prevent the decline of that industry (e.g., as a result of continuous unprofitable operations) or an increase in the prices of its products or simply to encourage it to hire more labour (as in the case of a wage subsidy). Examples are subsidies to encourage the sale of exports; subsidies on some foodstuffs to keep down the cost of living, especially in urban areas; and subsidies to encourage the expansion of farm production and achieve self-reliance in food production. Subsidies received for both input and output items should be taken in this item collectively.

## Year (Year)
