Overview

ABSTRACT

The National Sample Survey Organisation (NSSO) carried out the first country wide comprehensive survey of physically disabled persons during the 36th round survey (July - December, 1981). The next survey on the subject was carried out after a period of ten years in NSS 47th round (July - December, 1991). In NSS 36th and 47th round surveys, information was collected on three types of physical disabilities - visual, communication and loco motor - along with the cause of disability, aid/appliance acquired by the disabled, general and vocational educational level of the disabled etc. In addition, data on developmental milestones and behavioural pattern of all children of age 5-14 years, regardless of whether they were physically disabled or not, were collected.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected households based on sampling procedure and members of the household

Scope

NOTES

The schedule on Survey of Disabled Persons (Schedule 26) consists of the following blocks:

Block 0: descriptive identification of sample household

Block 1: identification of sample household

Block 2: particulars of field operation

Block 3: household characteristics

Block 4: demographic and other particulars of household members

Block 5: particulars of disability of the disabled member

Block 6: particulars of enrolment of disabled persons of age 5-14 years

Block 7: remarks by investigator

Block 8: comments by supervisory officer(s)

The identification particulars of the sample village/block and the sample household in which the survey schedule have been canvassed are to be recorded in blocks 0 & 1.

Block 2 is meant for recording the particulars of field operations.

Certain characteristics of the sample household, such as, size, social-group, principal occupation, etc., meant to be used as classificatory variables have been recorded in block 3.

The demographic particulars like age, sex and marital status, of all the normally resident members of the sample household and the particulars of degree of disability, blood relationship between parents, living arrangement, general education, etc. of all disabled members have been recorded in block 4.

Block 5 is meant for recording for each disabled member the detailed particulars of disability, such as, type of disability, degree of each type of disability, cause of disability, age at onset of disability, type of aid/appliance acquired etc.

The information as to whether or not a disabled child in the age-group 5-18 years was ever enrolled in a ordinary school/special school, whether the child is continuing in that school or not, reason for non-enrolment/discontinuation, etc., have been recorded in block 6.

Any relevant remarks of the investigator will be recorded in block 7.

The comments by the supervisory officer(s) in block 8.

Coverage

UNIVERSE

The survey used the interview method of data collection from a sample of randomly selected households and members of the household.

Sampling

Sampling Procedure

Outline of Sample Design:

A stratified multi-stage design was adopted for the conduct of survey of NSS 58th round. The first-stage units were census villages (panchayat wards for Kerala) in the rural sector and the NSSO Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units were households in both the sectors.

Sampling Frame for First-Stage Units:

For the rural sector, the list of Census 1991 villages (panchayat wards for Kerala) and Census 1981 villages for J & K constituted the sampling frame. For the urban sector, the list of latest available Urban Frame Survey (UFS) blocks was considered as the sampling frame.

Stratification

Rural sector:

Two special strata were formed as given below at the State/ UT level on the basis of Population Census 1991 viz.

Stratum 1: all FSUs with population between 0 to 50, and

Stratum 2: FSUs with population more than 15,000

The special stratum 1 was formed if at least 50 such FSU's were found in a State/UT. Similarly, special stratum 2 was formed if at least 4 such FSUs were found in a State/UT. Otherwise, such FSUs were merged with the general strata.

From the remaining FSUs (not covered under stratum 1 & 2) general strata (hereafter, stratum will refer to general stratum unless otherwise mentioned) was formed and numbered 3, 4, 5 etc. (even if no special strata have been formed). Each district of a State/UT was normally treated as a separate stratum. However, if the provisional population of the district was greater than or equal to 2.5 million as per Census 2001, the district was divided into two or more strata with more or less equal population as per population census 1991 by grouping contiguous tehsils. However, in Gujarat, some districts were not wholly included in an NSS region. In such cases, the part of the district falling in an NSS region constituted a separate stratum.

Urban sector:

In the urban sector, stratum was formed within each NSS region on the basis of size class of towns as per Census 1991 town population except for towns specified in Table 4. The stratum number and their composition (within each region) are given below:

stratum 1: all towns with population (P) < 0.1 million

stratum 2: all towns with $0.1 = P < 0.5$ million

stratum 3: all towns with $0.5 = P < 1$ million

stratum 4,5,6, ... each town with $P = 1$ million

The stratum numbers was retained as above even if, in some regions, some of the stratum is not formed.

Total sample size (FSUs):

A total number of 8338 and 9076 first-stage units were selected for survey in the Central and State samples respectively. The sample size by State and Sector is given in the Annexure

Allocation of total sample to States and UTs:

The total sample FSUs was allocated to the States and UTs in proportion to provisional population as per Census 2001 subject to the availability of investigators ensuring more or less uniform work-load.

Allocation of State/ UT level sample to Rural and Urban sectors:

State/UT level sample was allocated between two sectors in proportion to provisional population as per Census 2001 with double weightage to urban sector.

Allocation of Rural /Urban sector level sample size to strata / sub-strata:

Both rural and urban sector samples allotted to a State/UT were allocated to different strata in proportion to population of

the stratum. All the stratum-level allocations were adjusted to multiple of 2. Stratum-level sample size in the urban sector was further allocated to 2 sub-strata in proportion to the number of UFS blocks in them with double weightage to sub-stratum 1 subject to a minimum sample size of 2 or 4 to sub-stratum 1 according as stratum-level allocation is 4 or greater than 4. Sub-stratum level allocations in the urban sector were made even.

Selection of FSUs:

FSUs were selected in the form of two independent sub-samples in both the sectors. For special stratum 2 and all the general strata of rural sector, FSUs were selected by probability proportional to size with replacement (PPSWR) where size was the 1991 census population. For urban sector and special stratum 1 of rural sector, FSUs were selected by simple random sampling without replacement (SRSWOR).

Deviations from Sample Design

There was no deviation from the original sampling design.

Questionnaires

Overview

The schedule on Survey of Disabled Persons (Schedule 26) consists of the following blocks:

- Block 0: descriptive identification of sample household
- Block 1: identification of sample household
- Block 2: particulars of field operation
- Block 3: household characteristics
- Block 4: demographic and other particulars of household members
- Block 5: particulars of disability of the disabled member
- Block 6: particulars of enrolment of disabled persons of age 5-14 years
- Block 7: remarks by investigator
- Block 8: comments by supervisory officer(s)

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Informant's Reln. to Head (B1_q15)

File: Blocks 1, 3_Household characteristics

Overview

| | |
|-------------------|--------------------|
| Type: Discrete | Valid cases: 56649 |
| Format: character | Invalid: 0 |
| Width: 1 | |

Literal question

What is informant's relation to head of the household?

Interviewer instructions

The relationship of the principal informant (i.e. the person providing the bulk of the information) to the head of the household is to be recorded in the box space in terms of codes. The relevant codes are:

head of the household 1
 other member of the household ...2
 others 9

Response code (Resp_Code)

File: Blocks 1, 3_Household characteristics

Overview

| | |
|-------------------|--------------------|
| Type: Discrete | Valid cases: 56743 |
| Format: character | Invalid: 0 |
| Width: 1 | |

Literal question

Response Code

Interviewer instructions

This item will be filled in after collecting all the required information for all items in the schedule. The entry is to be made in terms of codes on the basis of the impression formed by the investigator regarding the overall response of the informant. The codes are:

informant co-operative and capable 1
 informant co-operative but not capable 2
 informant busy 3
 others9

Survey code (Survey_Code)

File: Blocks 1, 3_Household characteristics

Overview

| | |
|-------------------|--------------------|
| Type: Discrete | Valid cases: 56754 |
| Format: character | Invalid: 0 |
| Width: 1 | |

Literal question

Survey code

Interviewer instructions

Survey code: Whether the originally selected sample household has been surveyed or a substituted household has been surveyed will be indicated against this item by recording '1' if it is the originally selected sample household, and '2' if it is the substituted one. If neither the originally selected household nor the substituted household can be surveyed i.e., if the sample household is a casualty, code '3' will be recorded.

Reason for substitution (Substitution_Code)

File: Blocks 1, 3_Household characteristics

Overview

| | |
|-------------------|------------------|
| Type: Discrete | Valid cases: 362 |
| Format: character | Invalid: 0 |
| Width: 1 | |

Literal question

Reason for substitution

Interviewer instructions

If the originally selected household cannot be surveyed, irrespective of whether a substitute household can be surveyed or not, the reason for the originally selected household becoming a casualty will be recorded against this item in terms of codes. The codes are :

informants busy 1
 members away from home 2
 informant non-cooperative 3
 others 9

Household Size (B3_q1)

File: Blocks 1, 3_Household characteristics

Overview

| | |
|------------------|--------------------|
| Type: Continuous | Valid cases: 56762 |
| Format: numeric | Invalid: 0 |
| Width: 2 | |
| Decimals: 0 | |

Description

Household

A group of persons normally living together and taking food from a common kitchen constituted a household. The members of a household might not be related by blood to one another.

Household size:

The size of a household is taken to be the number of members normally residing in it. This size includes temporary stay-aways but excludes temporary visitors and guests of the household.

Literal question

How many members are there in the household?

Interviewer instructions

Size of the sample household i.e. the total number of persons normally residing together (under the same roof) and taking food from the same kitchen (including temporary stay-aways and excluding temporary visitors) will be recorded against this item.

Religion (code) (B3_q2)

File: Blocks 1, 3_Household characteristics

Overview

Type: Discrete

Valid cases: 56750

Format: character

Invalid: 0

Width: 1

Literal question

What is the religion of the household?

Interviewer instructions

Religion of the household will be recorded in terms of the specified code in this column. The codes are :

- 1 Hinduism
- 2 Islam
- 3 Christianity
- 4 Sikhism
- 5 Jainism
- 6 Buddhism
- 7 Zoroastrianism
- 9 Others

Social group (code) (B3_q3)

File: Blocks 1, 3_Household characteristics

Overview

Type: Discrete

Valid cases: 56736

Format: character

Invalid: 0

Width: 1

Literal question

Which social group do you belong to?

Do you come under scheduled caste or scheduled tribe or others category?

Interviewer instructions

SOCIAL GROUP : whether the household belongs to a scheduled tribe or a scheduled caste or 'others' , it will be indicated by an appropriate code against this item. A household will be classified as scheduled tribe/scheduled caste if the head of the household belongs to any scheduled tribe/scheduled caste community. All the remaining households will be considered to belong to the group 'others'. The codes for social group are :

- scheduled tribe1
- scheduled caste 2
- others 9

Principal occupation code (B3_q4)

File: Blocks 1, 3_Household characteristics

Overview

Type: Discrete

Valid cases: 56437

Format: character

Invalid: 0

Width: 3

Literal question

What is the occupation of the members of the household?

Interviewer instructions

The household occupation determined according to the definition occupation (NCO, 1968) codes for the household are to be recorded in the box spaces against item 4.

General education of the principal earner (B3_q5)

File: Blocks 1, 3_Household characteristics

Overview

Type: Discrete

Valid cases: 56673

Format: character

Invalid: 0

Width: 2

Literal question

What is the general education of the principal earner of the household?

Interviewer instructions

Principal earner of the household is that person among the household members who had the highest earnings during the 365 days preceding the date of survey from any type of activity economic or non-economic. Information regarding the general educational level attained by the principal earner will be recorded against this item in terms of the specified codes. For the purpose of making entries, only the course successfully completed will be considered. For instance, a person who had studied up to say, first year B.A., his educational attainment will only be higher secondary. The codes to be used are:

10 not literate

21 literate without formal schooling: through attending NFEC

22 through attending AEC

23 through other means

30 literate but below primary

40 primary

50 middle

60 secondary

70 higher secondary

80 graduate and above

Land possessed (code) (B3_q6)

File: Blocks 1, 3_Household characteristics

Overview

Type: Discrete

Valid cases: 56742

Format: character

Invalid: 0

Width: 2

Literal question

How much land does the household possess?

Interviewer instructions

The area of land possessed will include land 'owned', 'leased in' and 'neither owned nor leased in' by the household but exclude land 'leased out'. The total land area possessed by the household as on the date of survey will be worked out and recorded against this item in code. Codes are as follows:

01 less than 0.01 hectares

02 0.01 to 0.20 hectares

03 0.21 to 0.40 hectares

04 0.41 to 1.0 hectares

05 1.01 to 2.00 hectares

06 2.01 to 3.00 hectares

07 3.01 to 4.00 hectares

08 4.01 to 6.00 hectares

09 6.01 to 8.00 hectares

10 greater than 8.00 hectares

Average monthly expenditure (Rs.) (B3_q7)

File: Blocks 1, 3_Household characteristics

Overview

Average monthly expenditure (Rs.) (B3_q7)

File: Blocks 1, 3_Household characteristics

Type: Continuous
 Format: numeric
 Width: 5
 Decimals: 0

Valid cases: 56724
 Invalid: 38

Interviewer instructions

Item 7: average monthly consumer expenditure (Rs. in whole number): This is the expenditure of a household on domestic consumption and is same as the expenditure covered in the consumer expenditure surveys of NSS. The average monthly consumer expenditure worked out on the basis of the preceding 12 months from the date of survey will be recorded against this item. The expenditure will be entered in whole number in rupees.

Monthly per capita expenditure (Rs.) (B3_q8)

File: Blocks 1, 3_Household characteristics

Overview

Type: Continuous
 Format: numeric
 Width: 5
 Decimals: 0

Valid cases: 56724
 Invalid: 38

Description

Household consumer expenditure:

It is the expenditure of a household on domestic consumption only. It is the same as the expenditure covered in the consumer expenditure survey of the NSSO. Any expenditure incurred by the household on its enterprise account was excluded from consumer expenditure.

Household monthly per capita consumer expenditure (MPCE):

This was obtained from the household's total consumer expenditure during last 30 days divided by the household size and recorded in terms of rupees and paises.

No. of physically disabled members (B3_q9)

File: Blocks 1, 3_Household characteristics

Overview

Type: Continuous
 Format: numeric
 Width: 1
 Decimals: 0

Valid cases: 56762
 Invalid: 0

Description

Disability:

A person with restrictions or lack of abilities to perform an activity in the manner or within the range considered normal for a human being was treated as having disability. It excluded illness/injury of recent origin (morbidity) resulting into temporary loss of ability to see, hear, speak or move.

Literal question

How many members are physically disabled in the household?

Interviewer instructions

Item 9: no. of disabled members: This item will be filled-in after filling-in block 4. Whether or not each member of the sample household has any disability will be indicated in column 7 of block 4. The number of members listed in block 4 with any disability in column 7, will be recorded against this item.

 80 graduate and above

Whether any formal vocational course completed (B4_q12)

File: Block 4_Demographic and other particulars of household members

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 60974
 Invalid: 0

Literal question

Whether the member of the household completed any formal vocational course?

Interviewer instructions

Whether or not any vocational course has been successfully completed by a disabled member of the household will be indicated in this column. The vocational course completed may be in 'engineering trade' or 'non-engineering trade'. A disabled person might have also completed vocational course in both the trades (i.e. engineering and non-engineering). In such a case, the trade which appears first in the code list will be considered for recording. The codes that will be used are:

yes:
 engineering trade 1
 non-engineering trade 2
 no 3

Usual activity status (B4_q13)

File: Block 4_Demographic and other particulars of household members

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 61590
 Invalid: 0

Description

Usual activity status (B4_q13)

File: Block 4_Demographic and other particulars of household members

Economic activity:

Any activity resulting in production of goods and services that adds value to national product was considered as economic activity. Such activities included production of all goods and services for market i.e. production for pay or profit and the production of primary commodities for own consumption and own account production of fixed assets, among the nonmarket activities. The entire spectrum of human activity falls into two categories viz. economic and non-economic activities. The economic activities have two parts - market activities and non-market activities. Market activities are those that involve remuneration to those who perform it i.e., activity performed for pay or profit. These are essentially production of goods and services for the market including those of government services etc. Non-market activities are the production for own

consumption of primary products including own account processing of primary products and own account production of fixed assets.

Literal question

What is the usual activity status of the member of the household?

Interviewer instructions

This column is meant for recording the usual principal activity status of the disabled members the household. The codes to be used are:

worked in hh. enterprise (self-employed) as own account worker 11

worked in hh. enterprise (self-employed) as employer 12

worked as helper in hh. enterprises (unpaid family worker) 21

worked as regular salaried/wage employee 31

worked as casual wage labour : in public works 41

in other types of work 51

did not work but was seeking and/or available for work 81

attended educational institutions 91

attended domestic duties only 92

attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle- feed etc.) sewing, tailoring, weaving etc. for household use 93

rentiers, pensioners, remittance recipients, etc. 94

not able to work due to disability 95

beggars, prostitutes 96

others 97

If working, industry section (code) (B4_q14)

File: Block 4_Demographic and other particulars of household members

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 16123
Invalid: 0

Literal question

Which industry has the member of the household worked in?

Interviewer instructions

If working, industry section (code) (B4_q14)

File: Block 4_Demographic and other particulars of household members

This column will be filled in only for those disabled members of the household who are classified as 'working' (or employed) on the basis of the 'usual activity status' as recorded in column 13 (i.e. for those with codes 11 to 51 in column 13). For 'working' (or employed) disabled member, "industry division" relating to his/her sector of work will be recorded in terms of NIC codes in this column. Codes are as follows:

- 0 agriculture
- 1 mining and quarrying
- 2 manufacturing
- 3 manufacturing
- 4 electricity, gas and water
- 5 construction
- 6 wholesale and retail trade and restaurants and hotels
- 7 transport, storage and communication
- 8 financial, insurance, real estate and business services
- 9 community, social and personal services

Whether working before the onset of disability (B4_q15)

File: Block 4_Demographic and other particulars of household members

Valid cases: 61580

Invalid: 0

Literal question

Whether the member was working before the onset of disability?

Whether disability caused loss or change of work (B4_q16)

File: Block 4_Demographic and other particulars of household members

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 22866

Invalid: 0

Literal question

Whether disability caused loss or change of work to the member of the household?

Interviewer instructions

Whether disability caused loss or change of work (B4_q16)

File: Block 4_Demographic and other particulars of household members

Columns 15 & 16: 'whether working before the onset of disability' and 'if working before the onset of disability, whether disability caused loss or change of work?': The purpose of these items is to ascertain whether the disabled members who were working prior to the onset of disability had loss or change of work due to the onset of disability. In the case of persons having multiple disabilities, work status at the onset of each of the multiple disabilities will have to be determined separately and if the person is reported to be working at the onset of at least one of the multiple disabilities, code 1 will be recorded in column 15. For those who have disability since birth, and for children of age 0-4 years, code 2 will be recorded in column 15. Column 16 will be filled-in only for those who were working at the onset of disability (i.e. for those with code 1 in column 15). The codes to be used for recording entry in column 16 are:

loss of work 1
 change of work 2
 no loss or no change of work 3

For persons having only one disability and working at the onset of disability, no difficulty will arise in ascertaining whether the disability caused loss of work or change of work. For persons having two or more disabilities and working at the onset of each of the disabilities, all the three situations - loss of work, change of work and no loss or no change of work - may occur. In such cases, code 1 will get priority over codes 2 & 3 and code 2 over code 3. For self-employed persons, code 1 will be entered only if he/she lost the job due to the onset of disability. The 'change of work' will relate to any kind of change of type/nature of work. If the onset of disability did not cause loss or change of work, code 3 will be recorded in column 16.

Sub Sample (Sub_Sample)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 69451
Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Literal question

What type of disability does the member of the household has?

Srl. no. of disability (B5_q4)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 69451
Invalid: 0

Interviewer instructions

A disabled member of the household may have one or more than one type of disability. If he/she is having only one type of disability, serial number 1 will be recorded in this column against the type of disability that the person has. If a disabled member is having more than one type of disability, continuous serial numbers starting from 1 will be recorded in the relevant rows in the ascending order, one each against the type of disability the person is having.

Having visual disability - degree (code) (B5_q5)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 14133
Invalid: 0

Description

Having visual disability - degree (code) (B5_q5)

File: Block 5_Particulars of physical disability of the disabled member

Visual disability:

By visual disability, it was meant, loss or lack of ability to execute tasks requiring adequate visual acuity. For the survey, visually disabled included (a) those who did not have any light perception - both eyes taken together and (b) those who had light perception but could not correctly count fingers of hand (with spectacles/contact lenses if he/she used spectacles/contact lenses) from a distance of 3 metres (or 10 feet) in good day light with both eyes open. Night blindness was not considered as visual disability.

Literal question

What is the extent of visual disability of the member of the household?

Cause of visual disability (B5_q6)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Night blindness was not considered as visual disability.

Literal question

What is the cause of visual disability of the member of the household?

If having hearing disability (5 yrs & above) - degree (code) (B5_q7)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 12508
Invalid: 0

Description

Hearing disability:

This referred to persons' inability to hear properly. Hearing disability was judged taking into consideration the disability of the better ear. In other words, if one ear of a person was normal and the other ear had total hearing loss, then the person was judged as normal in hearing for the purpose of the survey. Hearing disability was judged without taking into consideration the use of hearing aids (i.e., the position for the person when hearing aid was not used). Persons with hearing disability might be having different degrees of disability, such as profound, severe or moderate. A person was treated as having 'profound' hearing disability if he/she could not hear at all or could only hear loud sounds, such as, thunder or understands only gestures. A person was treated as having 'severe' hearing disability if he/she could hear only shouted words or could hear only if the speaker was sitting in the front. A person was treated as having 'moderate' hearing disability if his/her disability was neither profound nor severe. Such a person would usually ask to repeat the words spoken by the speaker or would like to see the face of the speaker while he/she spoke or would feel difficulty in conducting conversations.

Literal question

What is the extent of hearing disability of the member of the household?

Cause of hearing disability (B5_q8)

If having locomotor disability - type (code) (B5_q11)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 48936
Invalid: 0

Description

Locomotor disability:

A person with - (a) loss or lack of normal ability to execute distinctive activities associated with the movement of self and objects from place to place and (b) physical deformities, other than those involving the hand or leg or both, regardless of whether the same caused loss or lack of normal movement of body - was considered as disabled with locomotor disability. Thus, persons having locomotor disability included those with (a) loss or absence or inactivity of whole or part of hand or leg or both due to amputation, paralysis, deformity or dysfunction of joints which affected his/her "normal ability to move self or objects" and (b) those with physical deformities in the body (other than limbs), such as, hunch back, deformed spine, etc. Dwarfs and persons with stiff neck of permanent nature who generally did not have difficulty in the normal movement of body and limbs was also treated as disabled.

Literal question

What is the extent of locomotor disability of the member of the household?

Cause of locomotor disability (B5_q12)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 69449
Invalid: 0

Description

Locomotor disability:

A person with - (a) loss or lack of normal ability to execute distinctive activities associated with the movement of self and objects from place to place and (b) physical deformities, other than those involving the hand or leg or both, regardless of whether the same caused loss or lack of normal movement of body - was considered as disabled with locomotor disability. Whether having the disability by birth (B5_q13)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 69450
Invalid: 0

Literal question

Whether the member of the household having the disability by birth?

Interviewer instructions

Code 1 will be recorded if the particular type of disability was from birth and otherwise, code 2 will be recorded. Persons who have acquired disability during infancy (below 1 year of age) without known reasons, would also be considered to have disability 'from birth' and code 1 will be assigned.

If 'no' then age at onset (B5_q14)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Continuous
Format: numeric
Width: 2
Decimals: 0

Valid cases: 59235
Invalid: 10216

Literal question

If the member of the household is not having the disability by birth, at what age the disability started?

Interviewer instructions

Entry under this column is to be made only for the types of disabilities which were not from the birth of the concerned person. For such disabilities, age of the person at onset of disability will be recorded in completed years. If the informant is unable to tell the exact age at the time of onset, the approximate age at the onset of the disability may be recorded.

Whether disability commenced during last one year (B5_q15)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 69451
Invalid: 0

Literal question

Whether disability commenced during last one year?

Interviewer instructions

Code 1 will be recorded if the disability commenced during the last 365 days preceding the date of survey. Otherwise, code 2 will be recorded.

If the disability is due to burns/injury, place of incident (code)
(B5_q16)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 8592
Invalid: 0

Literal question

If the disability is due to burns/injury, what was the place of incident?

Interviewer instructions

Entry in this column is to be made only for physical disabilities. If the disability was caused by burns or, injury other than burns, then the place of incident where the burns or injury took place will be recorded under this column.

The codes for recording the place of incident are:

- 1 agricultural field
- 2 mines
- 3 factory
- 4 other work site
- 5 transport accident
- 6 army action
- 7 home
- 9 others (specify)

Whether aid/appliance advised (code) (B5_q17)

File: Block 5_Particulars of physical disability of the disabled member

Whether aid/appliance advised (code) (B5_q17)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 55396
Invalid: 0

Literal question

Whether aid/appliance advised and it has been acquired?

Interviewer instructions

Whether or not a physically disabled member was advised for any aid/appliance for the disability is to be recorded in terms of codes. The codes are:

yes:
acquired 1
not acquired 2
no 3

In some cases aid/appliance are acquired without seeking advice/treatment. In such cases, it is to be considered as self-advice and code 1 may be recorded. Those who do not seek advice and also do not acquire aid/appliance will get code 3.

If aid/appliance acquired type (code) (B5_q18)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 32723
Invalid: 0

Literal question

Exactly what type of aid/appliance has been acquired by the member of the household?

How aid/appliance acquired (code) (B5_q19)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 6060
Invalid: 0

Literal question

How the aid/appliance was acquired by the disabled member of the household?

Interviewer instructions

How the aid/appliance relating to the disability was acquired by the disabled member, will be recorded in codes against this item. The codes are:

purchased 1
assistance from:
government 2
philanthropic organisation..... 3
others 9

If an aid/appliance is purchased using own money as well as financial assistance from any organisation, then the code 1 will be given if own money is more than the financial assistance. Else, one of codes 2, 3 or 9 will be assigned. Codes 2, 3 or 9 will also be applicable if the aid/appliance is given in kind.

If aid/appliance advised but not acquired, reason (code) (B5_q20)

File: Block 5_Particulars of physical disability of the disabled member

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 3598
Invalid: 0

Literal question

If the aid/appliance was advised to the disabled member of the household and still it has not been acquired, then what was the reason behind it?

Interviewer instructions

For each physical disability of the member for which aid/appliance was advised but was not acquired, reason for not acquiring the aid/appliance by the disabled member is to be recorded in this column. The codes to be used are:

not available 1
expensive 2
not necessary for:
economic independence 3
personal independence 4
others 9

'Economic independence' means that the disabled person does not face any difficulty in pursuing his/her livelihood. When the disabled person does not need any help from others for his daily chores he/she is considered to have 'personal independence'.

Column 7: if ever enrolled in a special school (code 1 in col. 6), whether continuing: If a disabled child was ever enrolled in a special school, code 1 will be recorded in this column if the child is continuing in the special school. If the child has discontinued, code 2 will be recorded.

If 'no' in item 6 reason for non-enrolment (B6_q8)

File: Block 6_Particulars of enrolment of physically disabled of age 5-14 years

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 5005

Invalid: 0

Literal question

If the disabled member of the household did not get enrolled in a special school, then what were the reasons behind it?

Interviewer instructions

The reason for non-enrolment in a special school will be recorded in terms of codes in this column. The entry will be made for those disabled children who were never enrolled in an ordinary school and also in a special school, and those who were enrolled in an ordinary school but discontinued and subsequently never enrolled in a special school. In case more than one reason is equally applicable, the code of the reason among the relevant ones, which appear first in the code list, will be recorded. The codes to be used are:

1 school not known

2 difficulty in getting admission

3 school far away

4 expensive

5 parents not interested

6 for participation in household economic activity

7 for other economic reasons

8 for attending domestic chores

9 other reasons
