Overview

ABSTRACT
An all-India survey on the situation of employment and uemployment and migration particulars in India was carried out during NSS 64th round (July, 2007 to June, 2008). In this survey, a nation-wide enquiry was conducted in a moderately large sample of households to provide estimates on various characteristics pertaining to employment and unemployment and migration particulars in India and some characteristics associated with them at the national and state levels. Information on various facets of employment and unemployment and migration in India were collected through a schedule of enquiry (Schedule 10.2).

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
Randomly selected households based on sampling procedure and members of the household

Scope

NOTES
In this round, the scope of the survey on employment and unemployment was enhanced with the collection of information on migration particulars of the households, of the household members and of the out-migrants.

NSSO collected data on employment-unemployment characteristics, based on which, estimates of employment and unemployment, measured in terms of three basic approaches, viz., usual status, current weekly status and current daily status can be obtained. The reference period for these approaches differ - it being 365 days preceding the date of survey for 'usual

status', 7 days preceding the date of survey for 'current weekly status' and each day of the 7 days preceding the date of survey for 'current daily status'. Data were collected on the activity status of all persons, i.e. for workers, for those seeking or available for work and also for those remaining out of labour force. A worker could be self-employed or enjoy regular salaries/wages or be employed on casual wage basis. Data on this aspect, along with the industry of work of the worker and his/her occupation, were collected during this survey. In order to reveal the multi-dimensional features of the employment-unemployment situation in India, information on several correlates pertaining to it were also gathered. For the purpose of

collection of information on industry of activity, National Industrial Classification (NIC), 2004 and National Classification of Occupation (NCO) 2004 was used in this survey. The concepts used to collect data on employment-unemployment are similar to those used in the usual quinquennial rounds.

In the present survey, migration particulars of the households and the household members were also collected through Schedule 10.2 (Employment & Unemployment and Migration Particulars). Regarding households which have migrated to the place of enumeration during the last 365 days, particulars such as location of last usual residence, pattern of migration and reason for migration were collected. Particulars of out-migrants who migrated out to other village/ town, from the household, any time in the past, such as present place of residence, reason for migration, period since leaving the household, whether presently engaged in any economic activity, whether sent remittances, number of times and amount of remittances

sent during last 365 days to the households by such former members who had migrated out were collected. Information on the use of remittances received by the households during last 365 days from the members who migrated out any time in the past was also collected.From each of the sample migrants, information on reason for migration, period elapsed since migration, location of last usual place of residence, usual activity pursued at the time of migration, whether a return migrant, etc., was collected. In this survey, to assess the short duration movements of the people of India, for the household members who had stayed away for employment or in search of employment for a period of 30 days to 6 months, information on number of spells of duration of 15 days or more, destination for longest spell and industry of work, if worked, were collected.

The present round, Schedule 10.2 on employment-unemployment and migration particulars consisted of 12 blocks, including sub-block 3.1.

The first three blocks, viz. Blocks 0, 1 and 2, were used to record identification of sample households and particulars of field operations, as is the common practice in usual NSS rounds. Blocks 8, 9 and 10 were for recording the remarks of investigator/senior investigator, superintendent/senior superintendent and other supervisory officer, respectively. Of the remaining blocks,

Block 3 was for recording the household characteristics like household size, household industry, occupation, religion, social group, household type, land possessed, migration particulars of the households which migrated to the place of enumeration during the last 365 days, amount of remittances received and use of remittances by those households from which there were some out-migrants and monthly household consumer expenditure, etc.

Block 3.1 is for recording the particulars of out-migrants who migrated out from the household any time in the past.

Block 4 was for recording the demographic particulars, usual activity particulars, both principal and subsidiary, of all the household members.

The daily time disposition for different activities, for each of the seven days prior to the date of survey, along with the particulars of the activities, such as status, industry, operation (for rural areas only), etc. were recorded for each of the household members in Block 5. For the regular wage/salaried employee and casual labourers, wage and salary earnings were also be collected in this block. Besides, the current weekly status (cws) will be derived in this block from the daily time disposition data.

In Block 6, information collected, from each household member, on whether stayed away from the village/town for a period of 30 days or more but less than 6 months during the last 365 days and whether the place of enumeration is different from the last upr. For those household members, who had stayed away for a period of 30 days or more but less than 6 months from a household, information will be collected regarding number of spells, destination during longest spell and if worked, industry of work at 2- digit level of NIC-2004 for the longest duration of work. Besides, for those household members whose last upr is different from the present place of enumeration, details will be collected such as whether a return migrant, nature of movement, period since leaving last usual place of residence, particulars of last usual place of residence, usual activity status at the time of migration, reason for migration, etc.

In block 7, information on household consumer expenditure on 19 items were collected. The information on household consumer expenditure derived from this block was used as classificatory variable for analysis of employment-unemployment and migration data.

TOPICS

Topic	Vocabulary	URI
Labor Markets	World Bank	http://www.surveynetwork.org/toolkit

KEYWORDS

Employment, Unemployment, Indebtedness of rural labour, Usual principal activity, Usual subsidiary activity, Time disposition during the week, Migration

Coverage

GEOGRAPHIC COVERAGE

The survey covered the whole of the Indian Union except (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir (for central sample), (ii) interior villages of Nagaland situated beyond five kilometres of the bus route and (iii) villages in

Andaman and Nicobar Islands which remain inaccessible throughout the year.

UNIVERSE

The survey used the interview method of data collection from a sample of randomly selected households and members of the household

Sampling

Sampling Procedure

A stratified multi-stage design was adopted for the 64th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. However, for the newly declared towns and out growths (OGs) in Census 2001 for which UFS were not done, each individual town/ OG were considered as an FSU. The ultimate stage units (USU) were the households in both the sectors. In case of large FSUs, i.e. villages/ towns/ blocks requiring hamlet-group (hg)/ sub-block (sb) formation, one intermediate stage was the selection of two hgs/ sbs from each FSU. Details of the sample design and estimation procedure is given as a document in external resource .

Deviations from Sample Design

There was no deviation from the original sample deviation.

Response Rate

At the all-India level, 12,688 FSUs (7,984 villages and 4,704 urban blocks) was allocated for survey. Out of these 12,688 FSUs allotted for survey, 12,589 FSUs could be surveyed – 7,921 in rural and 4,668 in urban. A sample of 10 households was planned for survey from each selected village and urban block.The survey covered a sample of 1,25,578 households (79,091 in rural areas and 46,487 in urban areas) and a sample of 5,72,254 persons (3,74,294 in rural areas and 1,97,960 in urban areas).

Weighting

For generating any estimate, one has to extract relevant portion of the data, and aggregate after applying the weights.

Weights (or multipliers) VARIABLES are given at the end of record of each dataset. The weights (multipliers) are WGT_SS for Sub-sample-wise estimation and WGT_Combined for combined subsample estimates.

All records of a household will have same weight figure. In case of those Blocks/Levels, where Item/Person Sl.No. is not applicable the field is filled up with 00000.

Use of subsample-wise weights (multipliers)

For generating subsample-wise estimates based on data of all subrounds taken together, either Subsample-1 households or Subsample-2 households are to be considered at one time. Subsample code is available in the dataset For generating subsample-combined estimates based on data of all subrounds taken together all households are to be considered.

Questionnaires

Overview

Summary description of the schedule : The schedule 10 on employment-unemployment for NSS60th round consisted of 10 blocks as given below.

Block 0: Descriptive identification of sample household
Block 1: Identification of sample household
Block 2: Particulars of field operations
Block 3 - Household Characteristics.
Block 3.1 :particulars of out-migrants who migrated out any time in the past
Block 4: demographic and usual activity particulars of household members
Block 5: Time disposition of members during the week ended on ....
Block 6: Migration particulars of household members
Block 7: Household consumer expenditure
Block 8: Remarks by investigator
Block 9: Comments by superintendent / senior superintendent
Block 10: Comments by other supervisory officer(s)

Data Collection

Data Collection Dates

Start	End	Cycle
2007-07-02	2007-09-29	subround-1

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

The fieldwork of 64th round of NSSO started from 1st July, 2007 and continued till 30th June, 2008. As usual, the survey period of this round was divided into four sub-rounds, each with a duration of three months, the 1st sub-round period ranging from July to September, 2007, the 2nd sub-round period from October, 2007 to December, 2007, 3rd sub-round from January, 2008 to March, 2008 and 4th sub-round from April, 2008 to June, 2008. An equal number of sample villages/blocks (FSUs), as far as
possible, were allotted for survey in each of these four sub-rounds.

Questionnaires

Summary description of the schedule : The schedule 10 on employment-unemployment for NSS60th round consisted of 10 blocks as given below.

Block 0: Descriptive identification of sample household
Block 1: Identification of sample household
Block 2: Particulars of field operations
Block 3 - Household Characteristics.
Block 3.1 :particulars of out-migrants who migrated out any time in the past
Block 4: demographic and usual activity particulars of household members
Block 5: Time disposition of members during the week ended on ....
Block 6: Migration particulars of household members
Block 7: Household consumer expenditure
Block 8: Remarks by investigator
Block 9: Comments by superintendent / senior superintendent
Block 10: Comments by other supervisory officer(s)

Block-6-members-migration-records

Content	This dataset contains information on the migration particulars of the household members, such as nature of movement, period since leaving last usual place of residence (upr), particulars of last upr, usual activity status at the time of migration, reason for leaving last upr and information on return migration. Besides, for the household members, who had stayed away from the household for employment or in search of employment for a period of 1 month to 6 months, contains information on the number of 'spells' of continuous stay away of 15 days or more, 'destination' during the longest spell and if worked, 'industry of work', at 2-digit level of NIC-2004, for the longest duration of work.

Interviewer instructions

The size of the sample household will be recorded against this item. This number will be same as the last serial number recorded in column 1 of block 4.

NIC-2004 Code(5-digit) (B3_q2)
File: Block-3-household-characteristics-ecords

Overview	
Type: Discrete	Valid cases: 114905
Format: character	Invalid: 0
Width: 5	

Interviewer instructions

The description of the principal household industry will be recorded in the space provided. The appropriate five-digit industry code of the NIC-2004 is to be recorded against 5 cells provided for recording NIC codes putting one digit in each cell. For households deriving income from non-economic activities only, (e.g.. for a household where income is derived only from pension/ begging/ prostitution, etc.) a dash (-) may be put against this item.

NCO-2004 Code(3-digit) (B3_q3)
File: Block-3-household-characteristics-ecords

Overview	
Type: Discrete	Valid cases: 114780
Format: character	Invalid: 0
Width: 3	

Interviewer instructions

The description of the principal household occupation will be recorded in the space provided. The appropriate three-digit occupation code of the NCO-2004 is to be recorded against 3 cells provided for recording the NCO codes putting one digit in each cell. For households deriving income from non-economic activities only, a dash (-) may be put against this item.

Household type (B3_Q4)

Religion (B3_q5)
File: Block-3-household-characteristics-ecords

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 125575
Invalid: 0

Interviewer instructions

The religion of the household will be recorded against this item in codes. If different members of the household claim to belong to different religions, the religion of the head of the household will be considered as the religion of the household.

Social Group (B3_q6)
File: Block-3-household-characteristics-ecords

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 125567
Invalid: 0

Interviewer instructions

Whether the household belongs to scheduled tribe, scheduled caste or other backward class will be indicated against this item in terms of codes:

Land possessed code (B3_q7)
File: Block-3-household-characteristics-ecords

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 125456
Invalid: 0

Interviewer instructions

Land possessed is given by land owned (including land under 'owner like possession') + land leased in - land leased out + land held by the household but neither owned nor leased in (e.g., encroached land). The land area possessed by the household within the country as on the date of survey will be worked out in hectares and the relevant code is to be recorded against this item.

whethe migrated to (B3_q8)
File: Block-3-household-characteristics-ecords

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 125578
Invalid: 0

Literal question

Whether the household migrated to the village/town of enumeration during the last 365 days.

Interviewer instructions

whethe migrated to (B3_q8)
File: Block-3-household-characteristics-ecords

This item is for recording the information on movement of the sample household. If the entire household, as now being enumerated has moved to the place of enumeration during the last 365 days preceding the date of survey, the same will be considered for recording 'yes' against this item. If one member of the household has moved ahead of other members to the present household and others have joined later (but all of them during the reference year) such cases will also be considered for recording 'yes'. Where, some members of the household were born or married into households which have moved, during the last 365 days, the entire household is to be treated as moved to the place of enumeration. When more than one household migrate to the village/town of enumeration and merge into a single household, the merged household will be treated as a migrant household. For such migrant household, the information for items 9, 10 and 11 of block 3 will correspond to the household (as it existed before migration) to which the head of the merged household belonged. Within a village or town, shifting of house from one locality to another should not be considered as migration of the household. The entry will be recorded in codes, i.e., 1 for 'yes' and 2 for 'no'.

Location of last usual place of residence (B3_q9)
File: Block-3-household-characteristics-ecords

Overview	
Type: Discrete	Valid cases: 4353
Format: character	Invalid: 0
Width: 1	

Pre question

Check whether the household with code 1 in item 8, then the migration particulars of the households will be recorded in items 9 to 11.

Interviewer instructions

The type of the place from which the household moved to the place of enumeration is to be recorded in codes.

Pattern of migration (B3_q10)
File: Block-3-household-characteristics-ecords

Overview	
Type: Discrete	Valid cases: 4306
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

The pattern of migration of the household is classified as either a temporary migration or a permanent migration. The movement of the household to the place of enumeration may be treated as a temporary migration, if the household intends to move again to the last usual residence or to any other place. If the household, in normal course, is likely to stay at the place of enumeration and does not plan to move out of the place of enumeration, it will be treated as a permanent migration. If the pattern of migration is temporary, code 1 will be recorded and if the pattern of migration is permanent, code 2 will be recorded.

Reason for migration (B3_q11)
File: Block-3-household-characteristics-ecords

Overview	
Type: Discrete	Valid cases: 4345
Format: character	Invalid: 0
Width: 2	

Interviewer instructions

For each household, which has migrated, the reason for such migration will be ascertained and recorded in codes. While ascertaining the reason, it may be noted that though different members of the household may have different reasons for migration, only that factor which is the basic reason for migration of the household is to be ascertained and recorded. This reasons for migration of the household is to be recorded in terms of the codes:

Any Former member migrated out (B3_q12)
File: Block-3-household-characteristics-ecords

Overview	
Type: Discrete	Valid cases: 125578
Format: character	Invalid: 0
Width: 1	

Literal question

Whether any former member of the household migrated out any time in the past

No. of members migrated out - male (B3_q13)
File: Block-3-household-characteristics-ecords

Overview	
Type: Continuous	Valid cases: 43185
Format: numeric	Invalid: 82393
Width: 2	
Decimals: 0	
Range: 0-11	

Interviewer instructions

Items 13 and 14 will be filled in for those households with entry 1 in item 12, i.e., for those households from which at least one former member had migrated out. The number of male and female members who had migrated out any time in the past will be recorded in items 13 and 14, respectively.

No. of members migrated out - female (B3_q14)

Use of remittances - first code (B3_q16i)
File: Block-3-household-characteristics-ecords

Use of remittances - first code (B3_q16i)
File: Block-3-household-characteristics-ecords

Overview	
Type: Discrete	Valid cases: 29963
Format: character	Invalid: 0
Width: 2	

Interviewer instructions

his item relates to how the remittances, received by the household, were used. In some cases, remittances received and income/ receipts of the household from other resources may be merged together and may be used by the household for any purposes. As such it becomes difficult, in those cases, to distinguish the use to which the remittances are put from the use to which other receipts of the household are put. Still the household should be able to identify some categories, among those listed in code list for this item, on which expenditure has been made possible by the remittances or on which expenditure has been increased to some extent due to the remittances. Provision has been made to record at most 3 such 'uses' of remittances, in codes, in the descending order of the amount used. If an equal amount was spent on two or more of the items listed in the code list

Overview

Usual principal activity - status (B4_c9)
File: Block-4-demographic-usual-activity-members-records

Type: Discrete
Format: character
Width: 2

Valid cases: 572254
Invalid: 0

Interviewer instructions

For each of the members, the usual principal activity status will be recorded in this column. In the first instance, the broad usual principal activity of the person will be identified based on the various activities pursued by the person during the reference period of last 365 days adopting a 'relatively long time (or major time)' criterion, not necessarily for a continuous period. The broad usual principal activity status will be one of the three categories viz. 'employed' (working), 'unemployed' (available for work) or 'not in labour force' (neither working nor available for work). It is to be noted that in deciding this, only the period normally available in a day for pursuing various activities need to be considered, and not the 24 hours of a day.

Usual principal activity- NIC-2004 code (B4_c11)
File: Block-4-demographic-usual-activity-members-records

Overview

Type: Discrete
Format: character
Width: 5

Valid cases: 207608
Invalid: 0

Interviewer instructions

Columns 11 and 12 will be filled-in for those who are 'working', i.e., those with any one of codes 11, 12, 21, 31, 41, or 51 in column 9. The description of the industry-occupation relevant to the type of economic activity pursued by the person in the status recorded in column 9 will be given in column 10. The corresponding 5-digit industry code (NIC-2004) and the 3-digit occupation code (NCO-2004) will be entered in columns 11 and 12, respectively. In case, two or more industry-occupation combinations corresponding to the status code given in column 9 have been reported by a person, the principal industry-occupation will be the one in which relatively more time has been spent during the preceding 365 days by the person.

Whether engaged in subsidiary capacity (B4_c13)
File: Block-4-demographic-usual-activity-members-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 572254
Invalid: 0

Interviewer instructions

For each member of the household listed in this block, it has to be ascertained whether he/she worked in a subsidiary capacity during the 365 days preceding the date of survey or in other words if he had any subsidiary economic status. A person will be considered to have worked in the subsidiary capacity if he/she has worked for a minimum period of 30 days, not necessarily for a continuous period, during the last 365 days, and for them code 1 will be recorded in this column. Otherwise, code will be 2.

Usual subsidiary economic activity-status (B4_c14)
File: Block-4-demographic-usual-activity-members-records

Overview	
Type: Discrete	Valid cases: 53071
Format: character	Invalid: 0
Width: 2	

Interviewer instructions

For all persons engaged in any 'work' in subsidiary capacity, i.e., for those with code 1 in column 13, the status codes of the economic activities pursued by them in their subsidiary capacity will be recorded in column 14. Activity status codes 11, 12, 21, 31, 41 and 51 relate to economic activity and only these codes are applicable for column 14.

Usual subsidiary activity-NIC-2004 code (B4_c16)
File: Block-4-demographic-usual-activity-members-records

Overview	
Type: Discrete	Valid cases: 53071
Format: character	Invalid: 0
Width: 5	

Interviewer instructions

Columns 15 to 17 will be filled-in for those who are 'working' in the subsidiary status, i.e., for those with code 1 in column 13. The description of the industry-occupation relevant to the type of economic activity pursued by the person in the status recorded in column 14 will be given in column 15. The corresponding 5-digit industry code (NIC-2004) and the 3-digit occupation code (NCO-2004) will be entered in columns 16 and 17, respectively. In case, two or more industry-occupation combinations corresponding to the status code given in column 14 have been reported by a person, the subsidiary industry-occupation will be the one, in which relatively more time has been spent during the preceding 365 days by the person. Note that, to identify certain category of workers separately, NIC-2004 industry class code 9500 has been split. Those are to be considered here also. Moreover, it may be noted that the industry divisions 96 and 97 of NIC-2004 will not be used for collection of industry of work activity for the persons

Interviewer instructions

Srl. No. of activity (B5_c3)
File: Block-5-members-time-disposition-records

For each person listed in column 1 of this block (which will be same as listed in column 1 of block 4), different activities pursued by them during all the seven days of the reference week will be serially numbered and this serial number of activity will be recorded in column 3. Presuming that the likelihood of one person pursuing more than four different activities in a week is rather remote, only four lines are provided for each person. As stated earlier, if a person pursues more than four different activities, the lines meant for the next person may be utilised. The current activity of a person in the rural areas is denoted by his status-cum-industry-cum-operation. Thus, for a person in the rural areas with the same status, if the industry division (2-digit NIC-2004 code) or operation are different on the same or different days, he will be considered to have pursued different activities and these activities will be entered in different lines. Similarly, in urban areas, the current activity of a person is denoted by his status-cum-industry. Thus, if a person in urban area ploughs his own field in the first half of the day and sows in the second half of the day, he will be considered to have only one activity during the day. But, in rural areas, he will be considered to have two activities.

current activity 'status' (B5_c4)
File: Block-5-members-time-disposition-records

Overview	
Type: Discrete	Valid cases: 638443

Interviewer instructions

The current activity 'status' codes corresponding to the serial number of activity entered in column 3 will be recorded in this column.

NIC-2004 code(2- digit) (B5_c5)
File: Block-5-members-time-disposition-records

Overview	
Type: Discrete	Valid cases: 230237
Format: character	Invalid: 0
Width: 2	

Interviewer instructions

For each status code grouped under the activity category 'working' (i.e., for the status codes 11-72 recorded in column 4), the 2-digit NIC-2004 code will be entered in column 5.

For rural areas only, type of operation (B5_c6)
File: Block-5-members-time-disposition-records

Overview	
Type: Discrete	Valid cases: 158082
Format: character	Invalid: 0
Width: 2	

Interviewer instructions

his column will be filled in for persons belonging to the rural households only. The actual working operation performed by the persons relevant to the status codes grouped under the activity category working (i.e., status codes 11-72) will be entered in terms of codes in this column. It may be noted that for regular wage/salaried employees on leave or holiday, the 'operation' will relate to their respective function in the work or job from which he is temporarily off in view of his taking leave or holiday. Similarly for persons categorised 'self-employed' (status codes 11, 12 & 21) if they are not at work on a particular day in spite of their having work on that day, operation to be recorded will relate to the work they would have done if they had not enjoyed leisure on that day.

Intensity- 7th day(0.0) (B5_c7)
File: Block-5-members-time-disposition-records

Overview	
Type: Continuous	Valid cases: 586796
Format: numeric	Invalid: 51647
Width: 3	
Decimals: 1	
Range: 0.5-1	

Interviewer instructions

For each activity recorded in column 3, the intensity with which the particular activity is performed on the different days of the reference week will be recorded in quantitative terms 'half' or 'full' in these columns. As described earlier, for each activity listed in column 3 either one 'full' intensity or two 'half' intensity may be assigned to a person on any one of the seven days of the reference week. For a particular activity, the recording of entries in columns 7 - 13 should start from column 7 which is provided for recording the intensity of that activity on the seventh day of the reference week, i.e., the day preceding the date of survey. Similarly, the intensity of that activity on the sixth, fifth and earlier days of the week will be recorded in columns 8, 9, 10, 11, 12 and 13 respectively. If the intensity of an activity is 'full' on a particular day, '1.0' will be recorded in the relevant column. On the other hand, if the intensity is 'half', the entry will be '0.5'. If that particular activity is not pursued on some other days of the reference week, the corresponding columns provided in the block for those days will be left blank against that activity.

Decimals: 1	Maximum: 7
Range: 0.5-7	Mean: 6.3
	Standard deviation: 1.6

Interviewer instructions

The number of days for which a particular activity was pursued during the seven days, i.e., the total of columns 7 to 13 will be recorded in one place of decimal in column 14 separately for each activity listed in column 3. It may be noted that the total number of days for all the activities taken together should always be 7.0 for each individual entered in column 1.

Wage & Salary Earnings-Cash (B5_c15)
File: Block-5-members-time-disposition-records

Overview	
Type: Continuous	Valid cases: 95551
Format: numeric	Invalid: 542892
Width: 6	Minimum: 0
Decimals: 0	Maximum: 500000
Range: 0-500000	Mean: 929.4
	Standard deviation: 2495.3

Interviewer instructions

The wage and salary earnings (not total earnings) receivable for the wage/ salaried work done during the reference week, separately for each of the relevant activities pursued by each person, will be recorded in these columns. The wage and salary earnings are collected for regular wage/salaried employees and casual wage labours, the relevant status codes for which wages & salary are to be recorded are 31, 41, 42, 51, 71 and 72. The wages and salaries receivable for the work done during the reference week may be already received or may still be due to be received in cash or in kind or partly in cash and partly in kind. The total wage or salary receivable for the week in cash will be recorded in column 15 and the value of salary or wages in kind (evaluated at the current retail price) receivable for the week will be recorded in column 16. The total of columns 15 and 16 will be entered in column 17. The entries for all these columns will be made in whole number in rupees. For recording the wages or salaries, amount receivable as 'overtime' for the additional work done even from the same economic activity beyond normal working time will be excluded. Bonus (expected or paid) and perquisites evaluated at retail prices duly apportioned for the reference week, will be considered as wages and included for making entries in these columns. For the activity statuses '71' and '72', the amount receivable for the week will be worked out on the basis of the number of days reported under the activity during the week.

Width: 1	

Interviewer instructions

Whether stayed away from village/ town (B6_c3)
File: Block-6-members-migration-records

For each person, it is to be ascertained whether during last 365 days preceding the date of survey, he/she stayed away from the village/town for 1 month or more but less than 6 months for the purpose of employment or in search of employment. Code 1 is to be assigned if the reply is in the affirmative, otherwise entry will be 2. For filling in this column, the following points may be kept in mind:

(i) for the purpose of determining the period of staying away, only those periods will be considered for which the member stayed away from the household continuously for 15 days or more during the last 365 days.
(ii) a continuous period of staying away for 15 days or more from the village/ town is termed as a spell.
(iii) a period of 30 days will be considered as 1 month.
(iv) the purpose of stay away from village/town should be 'for employment or in search of employment' only.

No. of spells (B6_c4)
File: Block-6-members-migration-records

Overview	
Type: Discrete	Valid cases: 18748
Format: numeric	Invalid: 553506
Width: 2	
Decimals: 0	
Range: 0-12	

Interviewer instructions

A spell is defined as a continuous period of staying away from the village/town for a period of 15 days or more. In this column, the number of such spells will be entered.

Destination during longest spell (B6_c5)
File: Block-6-members-migration-records

Overview	
Type: Discrete	Valid cases: 18764
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

A household member may have stayed away from the village/ town in a number of spells of varying durations during the last 365 days. Among all such spells, the place where the household member had stayed for the longest period will be ascertained and the entry will be made in terms of the following codes:

If worked, industry of longest spell(NIC-2004) (B6_c6)
File: Block-6-members-migration-records

Overview	
Type: Discrete	Valid cases: 16086
Format: character	Invalid: 0
Width: 2	

Interviewer instructions

In this column, industry of work, at 2-digit level of NIC-2004 will be entered for those household members who have worked during the period of their staying away from the village/town. In many situations it may so happen that during the period of staying away from the village/ town, a household member was engaged in different economic activities. In such situations, the industry at 2-digit level of NIC-2004 will correspond to the work in which the household member was engaged for the longest duration.

Place of enumeration differs from last upr (B6_c7)
File: Block-6-members-migration-records

Overview	
Type: Discrete	Valid cases: 572254
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

This column is intended to capture the information on migration of the household members. This will be decided based on the concept of change in the usual place of residence (upr). The usual place of residence here is defined as a place (village or town) where the person has stayed continuously for a period of six months or more. The place of enumeration refers to the place (village or town) where the person is being enumerated or surveyed, i.e., the present place of residence of the person. This column will record whether the person now enumerated had a different upr previously (called the last upr). Code 1 will be entered for persons whose place of enumeration is different from the last upr. For those who have been staying in the same village or town since their birth code 2 will be entered. Visits of daughters to their parent's place for child birth or for treatments etc. will not be considered even if it is for more than six months.

Place of enumeration was upr any time in past (B6_c8)
File: Block-6-members-migration-records

Overview	
Type: Discrete	Valid cases: 169339
Format: character	Invalid: 0
Width: 1	

Pre question

Columns 8 to 16 will be filled in only for those persons whose place of enumeration is different from the place of last upr (i.e., for those with code 1 recorded in column 7).

Interviewer instructions

For those persons whose last upr was different from the place of enumeration, it is to be ascertained if the place of enumeration was their usual place of residence at any time in the past. In other words, it is to be enquired, if the person who has moved to the place of enumeration from some other place had been a resident of the present place (where he is now enumerated) earlier. Code 1 or 2 will be entered as the case may be.

Nature of movement (B6_c9)
File: Block-6-members-migration-records

Overview	
Type: Discrete	Valid cases: 169320
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

Among those who had reported change in the usual place of residence in column 7, the nature of their movement will be collected in this column in terms of codes. The movement of the household member to the place of enumeration may be treated as a temporary migration, if he/she intends to move again to the last usual residence or to any other place. If the household member, in normal course, is likely to stay at the place of enumeration and does not plan to move out of the place of enumeration, it will be treated as a permanent migration. If the nature of migration is temporary and the expected duration of stay of the household member is less than 12 months in the village/town then code 1 will be recorded. For those household members who had temporary nature of movement but with expected duration of stay for 12 months or more code 2 will be recorded. If the nature of migration is permanent code 3 will be recorded.

Period since leaving the last upr(years) (B6_c10)
File: Block-6-members-migration-records

Overview

Period since leaving the last upr(years) (B6_c10)
File: Block-6-members-migration-records

Type: Continuous
Format: numeric
Width: 2
Decimals: 0
Range: 0-97

Valid cases: 168566
Invalid: 403688
Minimum: 0
Maximum: 97
Mean: 16.4
Standard deviation: 14.4

Interviewer instructions

For each such person, the years since leaving last upr i.e., the years elapsed since leaving the last upr till the date of survey, will be recorded in this column in whole number. Periods of temporary stay (less than six months) in other places after leaving the last upr will also be included while determining the years since leaving last upr.

Particulars of last upr- location (B6_c11)
File: Block-6-members-migration-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 169280
Invalid: 0

Interviewer instructions

Location refers to the type of last usual place of residence of the person. The relevant code, is to be assigned to each of the person:

Particulars of last upr- State/ u.t./country code (B6_c13)
File: Block-6-members-migration-records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 169254
Invalid: 0

Interviewer instructions

The state/u.t./country to which the last upr belongs to will be recorded in these columns.

Usual activity(ps) - status code (B6_c14)
File: Block-6-members-migration-records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 169233
Invalid: 0

Interviewer instructions

For determining the usual principal activity status of the person at the time of leaving the last upr, the reference period to be adopted will be 365 days preceding the date of leaving last upr.

Usual activity(ps) - for codes NIC-2004 (B6_c15)
File: Block-6-members-migration-records

Overview

Usual activity(ps) - for codes NIC-2004 (B6_c15)
File: Block-6-members-migration-records

Type: Discrete
Format: character
Width: 2

Valid cases: 41417
Invalid: 0

Interviewer instructions

For the persons assigned any of the activity status codes 11-51 in column 14 (i.e., those categorised working as per usual principal status), the appropriate industry division code (2 digit NIC-2004) will be recorded in this column. The column will be left blank if entry in column 14 is any one of 81 to 95 and 97.

Reason for leaving the last upr code (B6_c16)
File: Block-6-members-migration-records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 168524
Invalid: 0

Interviewer instructions

For each person who had changed the last upr, the reason for doing so will be ascertained and recorded in terms of codes in this column. Only the reason for leaving the last upr will be considered.

Interviewer instructions

A household procures different items for its consumption by different ways. The different ways of collecting items of consumption are:

1) purchase
2) receipt in exchange of goods and services
3) home-grown/home-produced stock
4) transfer receipts such as gifts, loans, charities, etc., and
5) free collection

Value of consumption(Rs.) - last 30 days (B7_q3)
File: Block-7-household-consumer-expenditure-records

Mean: 755.3
Standard deviation: 1694.5

Interviewer instructions

If an item is purchased and consumed by a household, the value of consumption can be taken as its purchase value. But, the value of an item consumed out of commodities received in exchange of goods and services, home-grown/home-produced stock, transfer receipts or free collection requires imputation.

Value of consumption(Rs.) - last 365 days (B7_q4)
